EAN

**Codice EAN:** a tutti i profili contrassegnati da questo simbolo viene attaccata una etichetta contenente i dati principali per la corretta e certa identificazione del prodotto. I dati indicati sono:  
tracciabilità completa del prodotto in normativa GS1, codice alfanumerico, descrizione del prodotto, lunghezza, materiale e finitura.

**EAN code:** All profiles marked with this symbol are labelled with correct data for reliable identification of the product for the customer needs. These data are:  
complete traceability of the product in GS1 regulation, alphanumeric code, product description, length, material and finishing.

**Code EAN:** tous les profilés marqués de ce symbole portent une étiquette contenant les principales données nécessaires à l'identification correcte et certaine du produit. Les données indiquées sont:  
traçabilité complète du produit dans la norme GS1, code alphanumérique, description du produit, longueur, matériau et finition.

**Código EAN:** a todos los perfiles marcados con este símbolo se adjunta una etiqueta que contiene los datos principales para la correcta y cierta identificación del producto. Los datos indicados son:  
trazabilidad completa del producto en normativa GS1, código alfanumérico, descripción del producto, longitud, material y acabado.

FR

**Articoli disponibili nel Deposito Francia.**  
**Items available in the France warehouse.**  
**Articles disponibles dans l'entrepôt France.**  
**Artículos disponibles en el almacén de Francia.**

**Foratura:** i fori svasati permettono il perfetto alloggiamento della vite che rimane con la testa allineata al profilo.  
Le viti fornite sono dello stesso colore del profilo.

**Holes:** Screws fit perfectly with the screwhead laying flush with the surface of the profile, thanks to countersunk holes. The screws supplied are the same color as the profile.

**Perçage:** les trous évasés permettent le logement parfait de la visse qui reste avec la tête alignée au profilé. Les visses fournies sont de la même couleur que le profilé.

**Taladrado:** los orificios avellanados permiten el alojamiento perfecto del tornillo que permanece con la cabeza alineada al perfil. Los tornillos suministrados son del mismo color que el perfil.

**Antisdrucchiolo applicato.**  
**Non-slip tape applied.**  
**Antidérapant appliqué.**  
**Antideslizante aplicado.**

**Antisdrucchiolo non applicato.**  
**Non-slip tape not applied.**  
**Antidérapant non appliqué.**  
**Antideslizante no aplicado.**

**Profilo con base:** Il profilo viene fornito completo di base.  
**Profile with base:** The profile is supplied complete with base.  
**Profilé avec base:** Le profil est fourni complet avec base.  
**Perfil con base:** El perfil se suministra completo con base.

**Perfect Matching:** perfetto abbinamento tra finiture dei 3 cataloghi  
**Perfect matching:** different profiles from Arcansas range with same finishing, to create harmonious settings.  
**Perfect Matching:** correspondance parfaite entre les finitions des 3 Catalogues  
**Perfect Matching:** combinación perfecta entre los acabados de los 3 catálogos

**Profilo pellicolato color legno**  
**Wooden effect Film-coated profile**  
**Profilé film couleur bois**  
**Perfil recubierto con film color madera**

**Punti di forza:** caratteristiche specifiche e vantaggi  
**Strong points:** efficient features and advantage in usage and aesthetical effect  
**Points forts:** caractéristiques et avantages spécifiques  
**Puntos de fuerza:** características y ventajas específicas

**Protezione con pellicola**  
adesiva trasparente o termoretratta per permettere la maggior conservazione del profilo contro raggi UV, polvere e graffi. Ne permette inoltre il prelievo, la manipolazione ed il trasporto senza sporcare le mani e le superfici dell'auto. Si consiglia di rimuovere dopo l'installazione.

**Protective film:** Remove the special adhesive which has been used to protect the profile after intallation. Thanks to the protective film that Arcansas provides to its profiles, complete protection against UV rays, dust and scratches is possible. Furthermore, the protective film guarantees an ideal solution for all types of finishes. It is transparent and protects the customer from grease residues that form in the profile.

**Film de protection:** adhésif transparent ou thermo rétractable pour permettre une meilleure conservation du profilé contre les rayons UV, la poussière et les rayures. Il permet également le prélèvement, la manipulation et le transport sans se salir les mains et les surfaces de la voiture. Il est conseillé de le supprimer après l'installation.

**Protección con película:** adhesivo transparente o termorretráctil para una mejor conservación del perfil contra rayos UV, polvo y arañazos. También permite la extracción la manipulación y el transporte sin ensuciar las manos y las superficies del coche. Se recomienda quitar después de la instalación.

**Adesivo:** del tipo **Hot melt pressure sensitive** applicato a caldo (180°) direttamente sul profilo, è atossico. Può essere utilizzato a qualsiasi temperatura purchè non inferiore a 0°. Dopo l'installazione, l'adesivo diventa impermeabile all'acqua, solventi, detergenti e altri prodotti chimici. Prima dell'applicazione le superfici devono essere pulite ed esenti da grassi e polveri.

**Hot melt pressure sensitive Adhesive:** applied at a temperature of (180°) directly on to the profile and is non-toxic. It can also be used in lower temperatures to 0°. After installatin of the profile the adhesive becomes resistant to water, solvents, detergents and other chemicals. Before application, all surfaces must be clean; free from grease and dust particles.

**Adhésif:** type **Hot melt pressure sensitive** appliqué à chaud (180°) directement sur le profilé. il est non toxique. Il peut être utilisé à n'importe quelle température, à condition quelle ne soit pas inférieure à 0 °C. Après l'installation, l'adhésif devient imperméable à l'eau, solvants, détergents et autres produits chimiques. Avant l'application, les surfaces doivent être propres et exemptes de matières grasses et de poussière.

**Adhesivo:** del tipo **Hot melt pressure sensitive** aplicado en caliente (180°) directamente sobre el perfil, es atóxico. Puede utilizarse a cualquier temperatura, siempre que no sea inferior a 0°. Tras la instalación, el adhesivo se vuelve impermeable al agua, disolventes, detergentes y otros productos químicos. Antes de su aplicación, las superficies deben estar limpias y exentas de grasa y polvo.

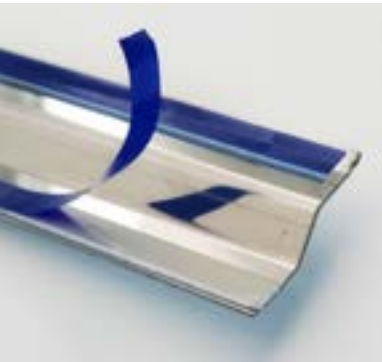

**Adesivo: Nastro biadesivo TESA** garantisce una maggior resistenza ed un'ottima durata nel tempo rispetto al pressure sensitive, le condizioni di uso possono essere verificate nella rispettiva tabella riportata di seguito.

**Adhesive: TESA double-sided tape** guarantees greater resistance and excellent durability over time compared to pressure sensitive, the conditions of use can be checked in the respective table below.

**Adhésif: Ruban adhésif double face TESA** garantit une plus grande résistance et une très bonne durée de vie par rapport à la pression sensitive, les conditions d'utilisation peuvent être vérifiées dans le tableau reporté ci-dessous.

**Adhesivo: Cinta adhesiva biadhesiva TESA** garantiza una mayor resistencia y una óptima duración en el tiempo respecto a las prensas sensitivas, las condiciones de uso se pueden verificar en la respectiva tabla a continuación.

**Blisteratura:** confezione termoretratta trasparente, resistente e appropriata per l'esposizione dei profili nell'espositore. Contiene istruzioni per la corretta applicazione del profilo.

**Blistering:** transparent, resistant and heat-shrink packaging for appropriate display of profiles. It contains instructions for the correct application of the profile.

**Blister:** emballage thermorétractable transparent, résistant et approprié pour l'exposition des profilés dans le présentoir. Il contient des instructions pour l'application correcte du profilé.

**Blisteratura:** envase termorretráctil transparente, resistente y adecuado para la exposición de los perfiles en el expositor. Contiene instrucciones para la correcta aplicación del perfil.

AVVERTENZE

I profili Arcanas non necessitano di particolari manutenzioni e sono facilmente pulibili con alcool o mediante l'impiego di normali detergenti non a base acida. Si consiglia di impiegare spugne e/o panni non abrasivi per evitare di graffiare e/o danneggiare l'anodizzazione, la brillantatura, la verniciatura e la finitura. La resistenza agli agenti chimici dipende dal grado di aggressione e quindi è necessario assicurarsi in maniera preventiva dagli effetti dei prodotti impiegati per la pulizia, per la posa e la manutenzione. Calce, malte e adesivi per piastrelle possono provocare delle macchie sulla superficie a vista dei profili. E' quindi indispensabile pulire tali parti subito dopo la posa in opera.

IMPORTANT NOTES

Arcanas profiles do not require particular maintenance and are easily cleaned with alcohol or by using normal non-acid-based detergents. It is recommended to use non-abrasive sponges and/or cloths to avoid scratching and/or damaging the anodizing, brightening, painting and finishing. Resistance to chemical agents depends on the degree of aggression and therefore it is necessary to preventively ensure the effects of the products used for cleaning, laying and maintenance. Lime, mortar and tile adhesives can cause stains on the visible surface of the profiles. It is therefore essential to clean these parts immediately after installation.

AVERTISSEMENTS

Les profilés Arcanas ne nécessitent pas d'entretien particulier et sont faciles à nettoyer à l'alcool ou à l'aide de détergents normaux à base non acide. Il est recommandé d'utiliser des éponges et/ou des chiffons non abrasifs pour éviter de rayer et/ou d'endommager l'anodisation, le polissage, la peinture et la finition. La résistance aux agents chimiques dépend du degré d'agression et il est donc nécessaire de s'assurer préventivement des effets des produits utilisés pour le nettoyage, la pose et l'entretien. La chaux, les mortiers et les autocollants pour tuiles peuvent provoquer des taches sur la surface visible des profilés. Il est donc indispensable de nettoyer ces pièces immédiatement après la pose.

ADVERTENCIAS

Los perfiles Arcanas no requieren un mantenimiento especial y pueden limpiarse fácilmente con alcohol o utilizando detergentes normales sin ácido. Se recomienda utilizar esponjas y/o paños no abrasivos para evitar rayar y/o dañar la anodización, el pulido, la pintura y el acabado. La resistencia a los agentes químicos depende del grado de agresión y por lo tanto es necesario asegurarse de los efectos preventivos de los productos utilizados para la limpieza, la instalación y el mantenimiento. La cal, las maltas y los adhesivos para baldosas pueden provocar manchas en la superficie visible de los perfiles. Por lo tanto, es indispensable limpiar estas partes inmediatamente después de la colocación.

# Alluminio Anodizzato satinato

Satin anodised alu/ Alu Anodisé satiné/  
Alu anodizado satinado

## Alluminio naturale e anodizzato satinato:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Subisce un trattamento di ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il profilo. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6000 per ottenere una colorazione uniforme dal massimo grado di finitura estetica oltre che funzionale.

## Vantaggi:

Facilmente lavorabili grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale.  
Elevata resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell'alluminio.

## Raw and satin anodised aluminium:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

The aluminum profile undergoes an anodic oxidation treatment by immersion in electrolytic tanks first and subsequently in colour tanks to create a protective layer that protects the profile. For the highest quality of protection, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. Arcansas uses the 6000 alloy to obtain a uniform colouring with the highest degree of aesthetic as well as functional finish.

## Advantages :

Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum.  
High scratch resistance.  
Suitable for indoors and outdoors.  
Recyclable.

## Aluminium naturel et anodisé satiné :

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

La transformation de ce matériau commence par sa plongée dans des cuves électrolytiques qui en permettent l'oxydation anodique. Dans la phase suivante les produits passent dans des cuves de peinture. Dans les dernières cuves de ce long procédé la couleur est fixée et une couche protectrice qui protège le profilé est créée. L'épaisseur du traitement Arcansas est de 10 à 15 micron (selon la couleur) pour garantir une protection optimale. Afin d'obtenir une coloration uniforme Arcansas utilise une ligue 6000, qui donne au produit une finition esthétique maximale mais aussi fonctionnelle.

## Avantages :

Facile à utiliser grâce à la ductilité conférée par la ligue 6000.  
Résistance à la corrosion acide, saline et aux intempéries (majeure par rapport aux profilés en aluminium naturel).  
Adaptables à l'intérieur et extérieur.  
Aluminium 100% recyclable.

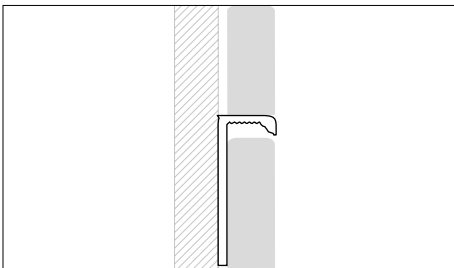

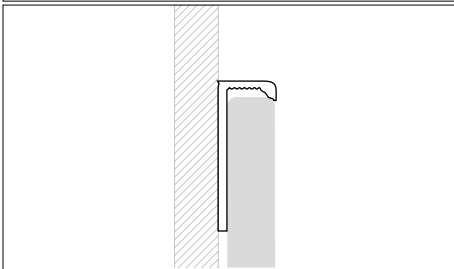

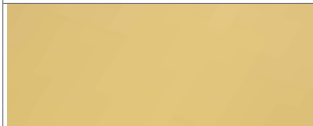

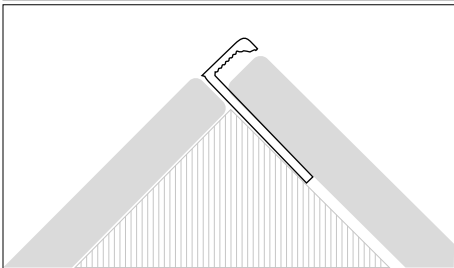

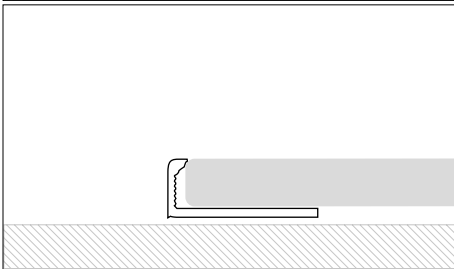

## Aluminio natural y anodizado satinado:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Se somete a un tratamiento de oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el perfil. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm según el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6000 para obtener una coloración uniforme con el más alto grado de acabado estético y funcional.

## Ventajas :

Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Elevado aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Alta resistencia al rayado.  
Adecuado para interiores y exteriores.  
Reciclable en el aluminio.

# Alluminio Anodizzato Lucido

Polished anodised Alu/ Alu Anodisé Brillant/ Alu Anodizado Brillo

## Alluminio anodizzato lucido:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

## Polished anodised Aluminium:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

## Aluminium anodisé brillant:

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

## Aluminio anodizado brillo:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Ottenuti mediante estrusione dell'alluminio, prima di poter essere anodizzato, subisce un trattamento meccanico di lucidatura a specchio per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura brillante a specchio, altamente decorativa. Viene sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 5 a 10µm secondo il tipo di colore per la massima qualità di brillantezza. Arcansas impiega la lega 6063 per ottenere una colorazione brillante ed uniforme dal massimo grado di finitura estetica oltre che funzionale.

Obtained by extruding aluminium, before anodization, it undergoes a mechanical mirror polishing treatment to eliminate any imperfection typical of the extrusion process and give the profile a highly decorative mirror shine finish. The anodic anodization process, done by immersion in electrolytic tanks and subsequently in the colour tanks, creates a protective layer that protects the colour itself. Arcansas guarantees a treatment thickness from 5 to 10µm according to the type of colour for the maximum quality of brilliance. Arcansas uses alloy 6063 to obtain a bright and uniform colouring with the highest degree of aesthetic as well as functional finish.

Obtenu par extrusion d'aluminium, avant d'être anodisé, il subit un traitement mécanique de polissage miroir pour éliminer toute imperfection typique du processus d'extrusion et conférer au profilé une finition miroir hautement décorative. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 5 à 10µm selon le type de couleur pour une qualité de brillance maximale. Arcansas utilise l'alliage 6063 afin d'obtenir une coloration brillante et uniforme pour une finition hautement esthétique et fonctionnelle.

Obtenido por extrusión de aluminio, antes de ser anodizado, se somete a un tratamiento mecánico de pulido espejo para eliminar cualquier imperfección típica del proceso de extrusión y darle al perfil un acabado de brillo espejo altamente decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en los tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 5 a 10 µm según el tipo de color para obtener la máxima calidad de brillo. Arcansas utiliza la aleación 6063 para obtener una coloración brillante y uniforme con el más alto grado de acabado estético y funcional.

## Vantaggi:

Altamente decorativo. Facilmente lavorabile grazie alla duttilità di questa lega. Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale. Buona resistenza ai graffi (non propria dell'alluminio naturale). Adatto per interni ed esterni. Riciclabile nell'alluminio.

## Advantages :

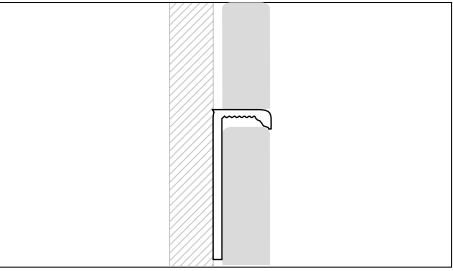

Highly decorative. Easily workable thanks to the ductility of this alloy. High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum. Good scratch resistance (not typical of natural aluminum). Suitable for indoors and outdoors. Recyclable.

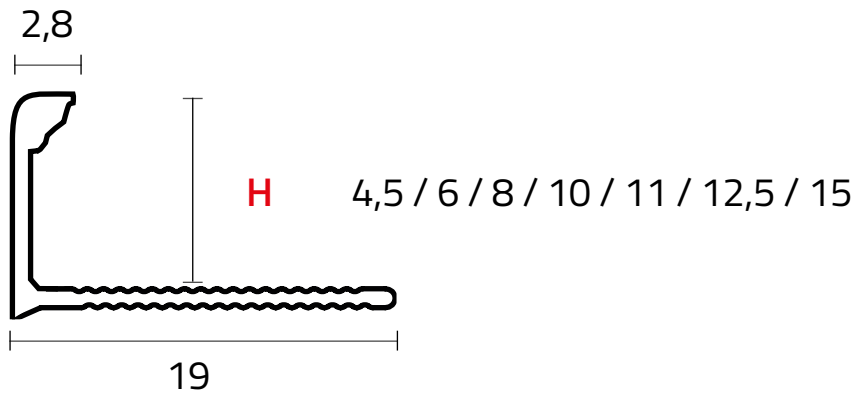

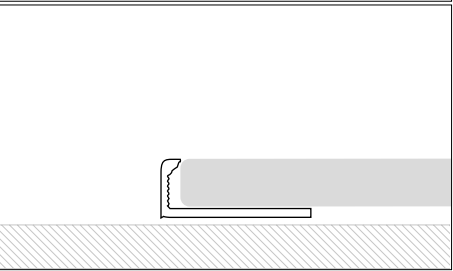

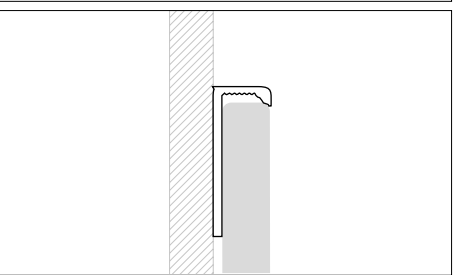

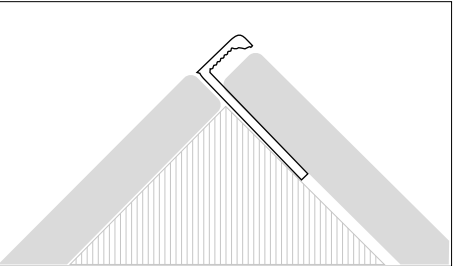

## Avantages :

Très décoratif. Facile à travailler grâce à la ductilité de cet alliage. Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel. Bonne résistance aux rayures (non typique de l'aluminium naturel). Convient pour l'intérieur et l'extérieur. Recyclable en aluminium.

## Ventajas :

Altamente decorativo. Facilmente mecanizable gracias a la ductilidad de esta aleación. Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural. Buena resistencia al rayado (no es típico del aluminio natural). Adecuado para interiores y exteriores. Reciclabile en el aluminio.

# Alluminio Anodizzato Spazzolato

Anodised Brushed Alu/Alu Anodisé Brossé/ Alu Anodizado Cepillado

**Alluminio anodizzato spazzolato:**  
I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

**Anodised Brushed Aluminum:**  
Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

**Aluminium Anodisé Brossé:**  
Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

**Aluminio Anodizado Cepillado:**  
Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Prima di poter essere anodizzato, subisce un trattamento meccanico di speciale spazzolatura in acqua per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura spazzolata e dai riflessi lucidi, altamente decorativa. Viene sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6060 per ottenere una colorazione spazzolata e dai riflessi variegati per il massimo grado di finitura estetica oltre che funzionale.

Before being anodised, it undergoes a mechanical treatment of special brushing in water to eliminate any imperfection typical of the extrusion process and give the profile a highly decorative brushed finish with glossy reflections. It is then dipped in the electrolytic tanks for anodic oxidation and subsequently in the colour tanks to create a protective layer that protects the profile. For the maximum quality of brilliance, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. For the maximum degree of aesthetic as well as functional finish, Arcansas uses the alloy 6060 to obtain a brushed color and variegated reflections.

Avant d'être anodisé, il subit un traitement mécanique de brossage spécial à l'eau pour éliminer toute imperfection typique du processus d'extrusion et donner au profilé une finition brossée très décorative aux reflets brillants. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur ou celle-ci est fixée dans les derniers réservoirs de ce long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 10 à 15 µm selon le type de couleur pour une protection de la plus grande qualité. Arcansas utilise l'alliage 6060 pour obtenir une couleur brossée et des reflets moirés avec un degré maximal de finition esthétique et fonctionnelle.

Antes de ser anodizado, se somete a un tratamiento mecánico de cepillado especial en agua para eliminar cualquier imperfección típica del proceso de extrusión y darle al perfil un acabado cepillado con reflejos brillantes altamente decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm de acuerdo con el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6060 para obtener un color cepillado y reflejos variados para obtener el máximo grado de acabado estético además que funcional.

**Vantaggi:**  
Altamente decorativo.  
Facilmente lavorabile grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale.  
Buona resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell'alluminio.

**Advantages :**  
Highly decorative.  
Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum.  
Good scratch resistance (not typical of natural aluminum).  
Suitable for indoors and outdoors.  
Recyclable.

**Avantages :**  
Très décoratif.  
Facile à travailler grâce à la ductilité de cet alliage.  
Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel.  
Bonne résistance aux rayures (non typique de l'aluminium naturel).  
Convient pour l'intérieur et l'extérieur.  
Recyclable en aluminium.

**Ventajas :**  
Altamente decorativo.  
Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Buena resistencia al rayado (no es típico del aluminio natural).  
Adecuado para interiores y exteriores.  
Reciclabile en el aluminio.

# Alluminio Verniciato

Powder Coated alu/ Alu verni/ Alu pintado

## Alluminio verniciato:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche invrudite a forno, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e preverniciatura per conferire resistenza e massima adesione alla successiva verniciatura. Arcansas garantisce uno spessore minimo di 80 micron e una brillantezza di 100 gloss. Disponibile nei colori bianco RAL 9003 e nero RAL 9005.

## Vantaggi:

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Resistente ai graffi.  
Riciclabile.

## Powder Coated Aluminum :

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and finishing.

Obtained by extrusion and subsequent painting with electrostatic epoxy powders hardened in the oven, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting. Arcansas guarantees a minimum thickness of 80 microns and a gloss of 100 gloss. Available in white RAL 9003 and black RAL 9005.

## Advantages:

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Scratch resistant.  
Recyclable.

## Aluminium Verni :

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Obtenu par extrusion et ultérieur vernissage avec des poudres époxy électrostatiques durcies au four, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante. Arcansas garantit une épaisseur minimale de 80 microns et un brillant de 100 brillants. Disponible en blanc RAL 9003 et noir RAL 9005.

## Les avantages:

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Résistant aux rayures.  
Recyclable.

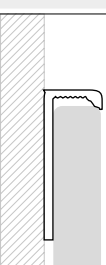

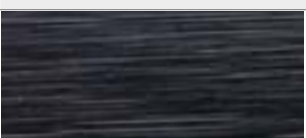

## Aluminio Pintado :

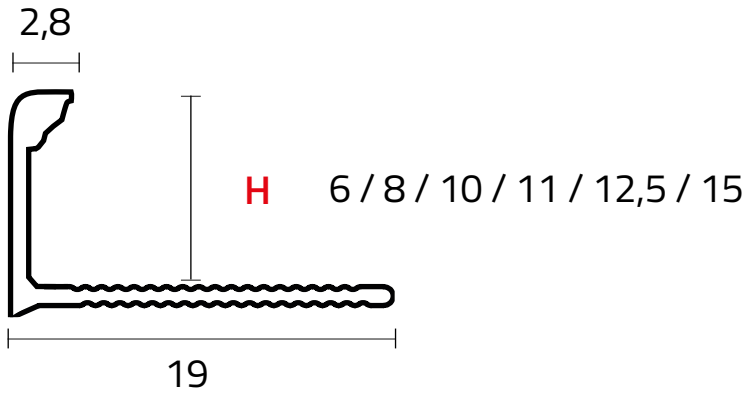

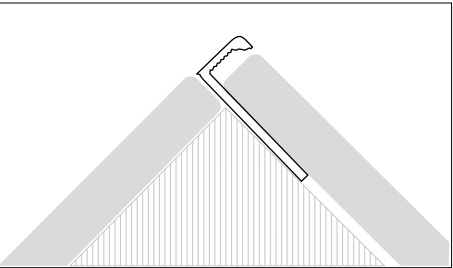

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos endurecidos en el horno, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior. Arcansas garantiza un espesor mínimo de 80 micras y un brillo de 100 gloss. Disponible en los colores blanco RAL 9003 y negro RAL 9005.

## Ventajas:

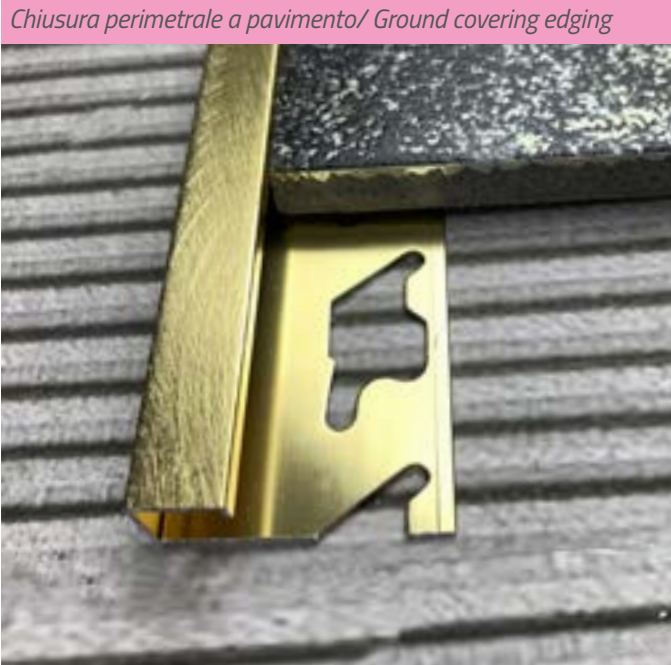

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Resistente a los arañazos.  
Reciclabile.

Stone Finish Alu/ Alu Effet Pierre/ Alu Efecto Piedra

## Alluminio effetto pietra:

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e pre-verniciatura per conferire resistenza e massima adesione alla successiva verniciatura.

Queste finiture si adattano perfettamente alle nuove tendenze di arredamento delle piastrelle ceramiche effetto pietra, con finiture opache e naturali.

Arcansas garantisce uno spessore minimo di 80 micron, disponibile nei colori pietra naturali.

## Vantaggi:

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Molto resistente ai graffi.  
Riciclabile nell' alluminio.

## Stone Finish Aluminum:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings.  
Available in different sections, heights and finishing.

Obtained by extrusion and subsequent painting with electrostatic epoxy powders, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting.

These finishes are perfectly suited to the new furnishing trends of stone effect ceramics, with matte and natural finishes.

Arcansas guarantees a minimum thickness of 80 microns, available in natural stone colors.

## Advantages :

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Very resistant to scratches.  
Recyclable.

## Aluminium Effet Pierre:

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

Obtenus par extrusion et peinture ultérieure avec des poudres époxy électrostatiques, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante.

Ces finitions sont parfaitement adaptées aux nouvelles tendances d'ameublement du céramique effet pierre, avec des finitions mates et naturelles.

Arcansas garantit une épaisseur minimale de 80 microns, disponible en couleurs de pierre naturelle.

## Avantages :

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Très résistant aux rayures.  
Recyclable.

## Aluminio Efecto Piedra:

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior.

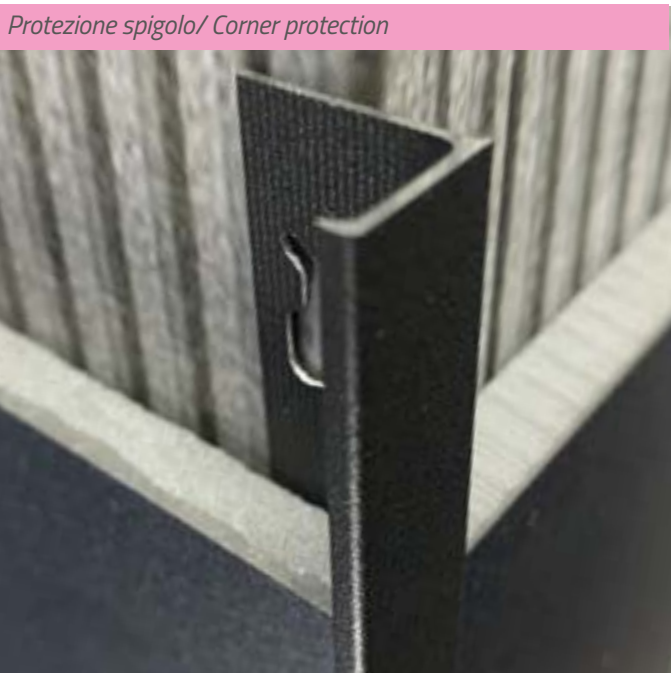

Estos acabados se adaptan perfectamente a las nuevas tendencias de decoración de cerámica con efecto de piedra, con acabados mate y natural.

Arcansas garantiza un espesor mínimo de 80 micras, disponible en colores de piedra natural.

## Ventajas :

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Muy resistente a los arañazos.  
Reciclabile.

# Alluminio naturale

Raw alu/ Alu naturel/ Alu natural

## Alluminio naturale :

I profili di protezione Arcansas sono una linea di profili in alluminio progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e finiture.

L'alluminio naturale ha un'elevata resistenza naturale alla corrosione salina, acida o atmosferica.  
Colore : argento naturale semilucido.

## Vantaggi :

Maggior lavorabilità rispetto all'alluminio anodizzato o verniciato in quanto privo di strati aggiunti.  
Saldabile, verniciabile, calpestabile.  
Prezzo più competitivo.  
Riciclabile nell'alluminio.

## Raw aluminium:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings.  
Available in different sections, heights and finishing.

The natural aluminum has a chaa high natural resistance to saline, acid or atmospheric corrosion.  
Colour: semi-gloss natural silver.

## Advantages :

Greater workability than anodised or painted aluminum as it has no added layers.  
Weldable, paintable, walkable.  
More competitive price.  
Recyclable.

## Aluminium naturel :

Les profilés de protection Arcansas sont une gamme de profilés en aluminium conçus pour connecter et protéger les coins externes des revêtements en céramique. Disponible en différentes sections, hauteurs et finitions.

L'aluminium naturel a une haute résistance naturelle à la corrosion acide, saline et aux intempéries  
Couleurs disponibles : argent naturel.

## Les avantages :

Aucune couche n'est rajoutée au profilé. Cela permet une transformation plus aisée par rapport à l'aluminium anodisé ou laqué.  
Possibilité de vernir ou souder le matériel.  
Piétiner sur ces profilés n'abime pas le matériel.  
Prix plus compétitif que les autres matériels.  
Aluminium 100% recyclable.

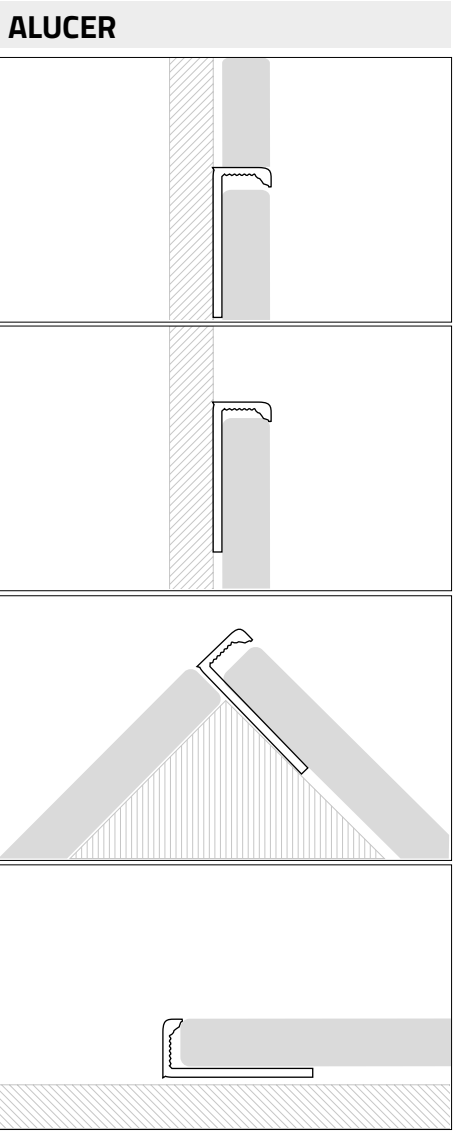

## Aluminio natural :

Los perfiles de protección Arcansas son una línea de perfiles de aluminio diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y acabados.

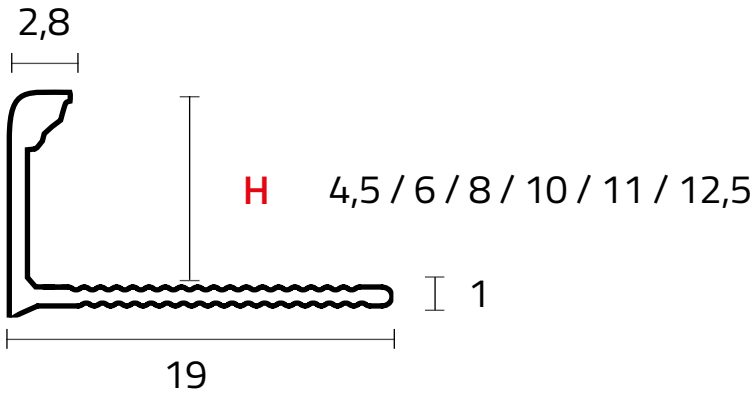

El aluminio natural tiene una alta resistencia natural a la corrosión salina, ácida o atmosférica.  
Color: plata natural semibrillante.

## Ventajas :

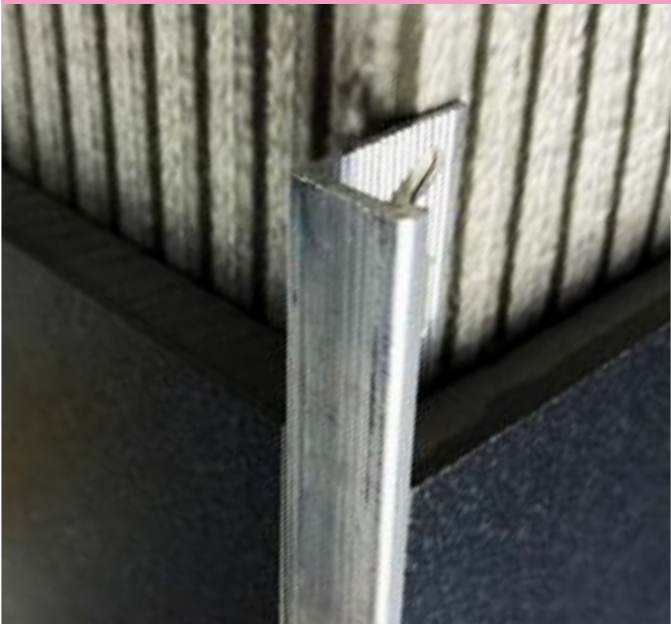

Mayor maquinabilidad que el aluminio anodizado o pintado, ya que no tiene capas añadidas.  
Soldable, pintable, transitible.  
Precio más competitivo.  
Reciclabile en el aluminio.

# Acciaio Inox e Ottone

Stainless Steel and Brass/Acier Inoxydable et Laiton/ Acero inoxidable y latón

## Acciaio Inox e Ottone:

I profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze, in due materiali pregiati, in finitura lucida e spazzolata.

## Acciaio Inox :

Ottenuti per profilatura nella lega più nobile disponibile oggi sul mercato, AISI 304 V2A , grazie alla sua elevatissima inossidabilità e resistenza agli agenti meccanici e atmosferici, è adatto per interni ed esterni. Ha un aspetto elegante e solido. Adatto in edilizia , altamente protettivo e decorativo.

## Vantaggi:

Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici. Adatto al calpestio. Idoneo per interni ed esterni. Fornito con pellicola protettiva per la massima lavorabilità senza graffi o macchie. Manutenzione assente. Riciclabile nei metalli

## Ottone lucido:

Profili ottenuti da estrusione della lega OT57 e, a seconda dell'articolo, lucidati meccanicamente con paste lucidanti. Ottima resistenza agli agenti chimici, atmosferici e alle sollecitazioni meccaniche. La superficie brillante e il colore tipico dell'ottone rendono questi profili altamente adatti in ambito decorativo.

## Vantaggi:

Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici. Adatto al calpestio. Idoneo per interni ed esterni. Fornito con pellicola protettiva per la massima lavorabilità senza graffi o macchie. Manutenzione assente. Riciclabile nei metalli

## Stainless steel and brass:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings.

Available in two precious materials, with polished or brushed finishing and in different sections and heights.

## Stainless steel:

Obtained by profiling in alloy AISI 304 V2A, the noblest alloy available on the market today, thanks to a very high resistance to rust and to mechanical and atmospheric agents, it is suitable for indoor and outdoor decoration. It has an elegant and solid appearance. Suitable for construction, highly protective and decorative.

## Advantages:

Very high resistance to acid, saline or atmospheric agent's corrosion. Suitable for foot traffic. Well-suited for indoors and outdoors. Supplied with protective film for maximum workability without scratches or stains. No maintenance. Recyclable.

## Polished brass:

Profiles obtained by extrusion of alloy OT57 and, depending on the article, mechanically polished with polishing pastes. Excellent resistance to chemical agents and mechanical stress. The bright surface and the typical color of the brass make these profiles highly suitable in the decorative field.

## Advantages:

Very high resistance to acid, saline or atmospheric agent's corrosion. Suitable for foot traffic. Well-suited for indoors and outdoors. Supplied with protective film for maximum workability without scratches or stains. No maintenance. Recyclable.

## Acier inoxydable et laiton :

Les profils de protection Arcansas sont une gamme de profils conçus pour connecter et protéger les coins externes des revêtements en céramique.

Disponible en différentes sections, hauteurs, en deux matériaux précieux, en finition polie et brossée.

## Acier inoxydable :

Obtenu par profilage dans l'alliage le plus noble disponible sur le marché aujourd'hui, l'AISI 304 V2A, grâce à sa très haute résistance à la rouille et sa résistance aux agents mécaniques et atmosphériques, convient pour l'intérieur et l'extérieur. Il a une apparence élégante et solide. Convient pour la construction. Hautement protecteur et décoratif.

## Avantages :

Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Convient pour l'intérieur et l'extérieur. Fourni avec un film protecteur pour une facilité d'usage et un résultat sans rayures ni taches. Aucun entretien. Recyclable en métaux.

## Laiton poli :

Profils obtenus par extrusion de l'alliage OT57 et, selon l'article, polis mécaniquement avec des pâtes à polir. Excellente résistance aux agents chimiques, atmosphériques et aux contraintes mécaniques. La surface brillante et la couleur typique du laiton rendent ces profils très appropriés dans le domaine décoratif.

## Avantages :

Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Convient pour l'intérieur et l'extérieur. Fourni avec un film protecteur pour une facilité d'usage et un résultat sans rayures ni taches. Aucun entretien. Recyclable en métaux.

## Acero inoxidable y latón:

Los perfiles de protección Arcansas son una línea de perfiles diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas, en dos materiales preciosados, en acabado brillo y cepillado.

## Acero inoxidable:

Obtenido al perfilar la aleación más noble disponible en el mercado hoy en día, AISI 304 V2A, gracias a su muy alta resistencia a la oxidación y resistencia a los agentes mecánicos y atmosféricos, es indicado sea para interiores y exteriores. Tiene un aspecto elegante y sólido. Idóneo en construcción, altamente protector y decorativo.

## Ventajas:

Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idóneo para interior y exterior. Se suministra con película protectora para una máxima trabajabilidad sin arañazos ni manchas. Sin mantenimiento. Reciclabile en metales.

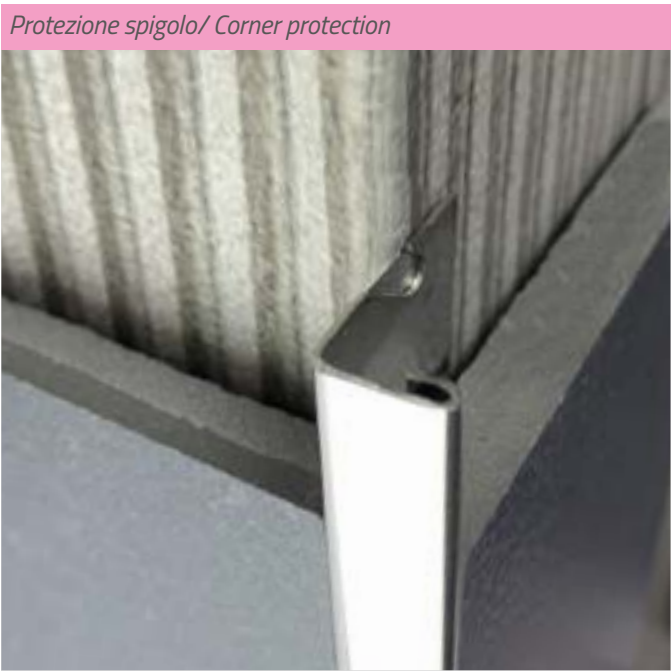

## Latón cromado:

Perfiles obtenidos por extrusión de la aleación OT57 y, según el producto, cromado mecánicamente con pastas de pulido. Excelente resistencia a agentes químicos, atmosféricos y al estrés mecánico. La superficie brillante y el color típico del latón hacen que estos perfiles sean muy adecuados en el ámbito decorativo.

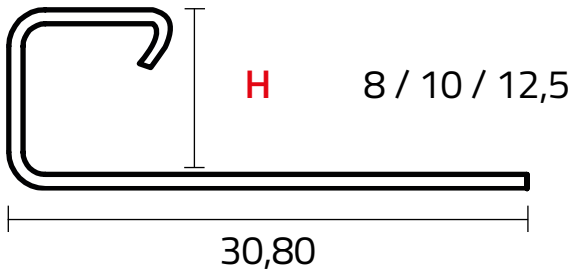

## Ventajas:

Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idóneo para interior y exterior. Se suministra con película protectora para una máxima trabajabilidad sin arañazos ni manchas. Sin mantenimiento. Reciclabile en metales.

|                                                                                  |                                                                                   |                                                                                     |               |       |         |                                                                                     |                |           |   |  |

**Ottone naturale:**  
Profili ottenuti per estrusione, non sottoposti a trattamento di lucidatura meccanica con paste lucidanti.  
Ottima resistenza agli agenti chimici e alle sollecitazione meccaniche. La superficie opaca e il colore tipico dell'ottone rendono questi profili non invasivi e adatti in ambito decorativo.

**Vantaggi:**  
Elevatissima resistenza alla corrosione acida, salina o agenti atmosferici.  
Adatto al calpestio.  
Per uso interno o esterno.  
Altamente inossidabile.  
Scarsa manutenzione.  
Riciclabile nei metalli.

**Natural brass:**  
Profiles obtained by extrusion, not mechanically polished with polishing pastes. Excellent resistance to chemical agents and mechanical stress. The opaque surface and the typical colour of the brass make these profiles discreet and suitable for decorative purposes.

**Advantages:**  
Very high resistance to acid, saline or atmospheric agent's corrosion  
Suitable for foot traffic  
Well-suited for indoors and outdoors.  
Highly stainless.  
No maintenance.  
Recyclable.

**Laiton naturel :**  
Profils obtenus par extrusion, non soumis à un traitement de polissage mécanique avec des pâtes à polir. Excellente résistance aux agents chimiques et aux contraintes mécaniques. La surface opaque et la couleur typique du laiton rendent ces profils discrets et adaptés dans le domaine décoratif.

**Avantages :**  
Très haute résistance à la corrosion acide, saline ou atmosphérique. Ne craint pas le piétinement. Pour un usage extérieur ou intérieur. Hautement inoxydable. Très peu d'entretien. Recyclable en métaux.

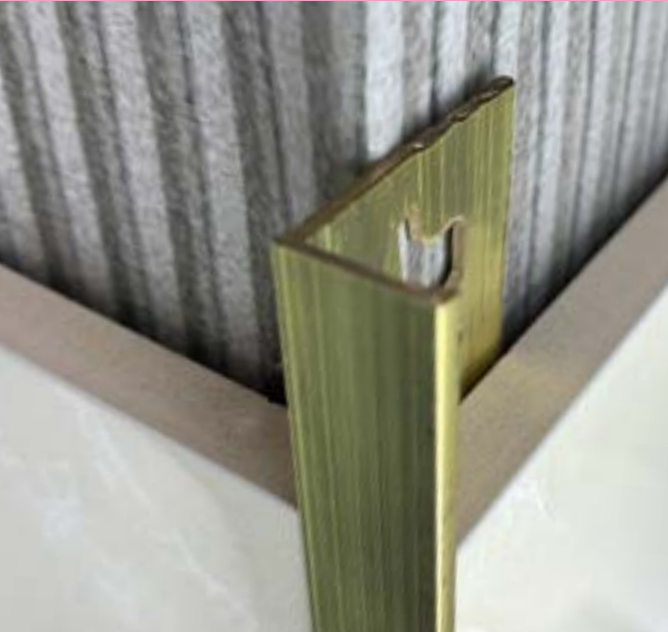

**Latón natural:**  
Perfiles obtenidos por extrusión, no sometidos a tratamiento mecánico de pulido con pastas de pulido. Excelente resistencia a los agentes químicos y al estrés mecánico. La superficie opaca y el color típico del latón hacen que estos perfiles no sean invasivos y adecuados para el ámbito decorativo.

**Ventajas:**  
Muy alta resistencia a la corrosión por agentes ácidos, salinos o atmosféricos. Resistente a las pisadas. Idoneo para interior y exterior. Altamente inoxidable. Escaso mantenimiento. Reciclabile en metales.

# PVC Satinato

Satin PVC/ PVC satiné/PVC satinado

## PVC Satinato:

i profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e colori.

Ottenuti per estrusione plastica, i profili in PVC Arcansas sono colorati in massa. Non cambiano colore se graffiati. Rappresentano la soluzione ideale per DIYers grazie alla versatilità e alla facilità di utilizzo. Disponibile in molteplici varietà di colore.

## Vantaggi :

Colorato in massa, non perde il colore se graffiato.  
Grande disponibilità di colori.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Prezzo competitivo.  
Riciclabile nella plastica.

## Satin PVC:

Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and colours. Obtained by plastic extrusion, AR-CANSAS profiles are mass coloured. They do not change colour if scratched. They represent the ideal solution for DIYers thanks to their versatility and ease of use. Available in several colour nuances.

## Advantages:

Mass-coloured, does not lose colour if scratched.  
Wide range of colours.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance  
Durability.  
Competitive price.  
Recyclable.

## PVC satiné:

Les profilés de protection Arcansas sont une gamme de profilés conçus pour connecter et protéger les coins externes du revêtement en carrelage. Disponible en différentes sections, hauteurs et couleurs. Obtenus par extrusion du plastique, les profilés PVC Arcansas sont colorés en masse. Ils ne changent pas de couleur s'ils sont rayés. Ils représentent la solution idéale pour les bricoleurs grâce à leur polyvalence et leur facilité d'utilisation. Disponible en plusieurs variétés de couleurs.

## Avantages :

Coloré en masse, il ne perd pas de couleur s'il est rayé.  
Grande disponibilité de couleur.  
Facilité d'usage : peut être coupé avec un cutter ou des ciseaux.  
Bonne résistance mécanique et aux UV.  
Durée dans le temps.  
Prix compétitif.  
Recyclable en plastique.

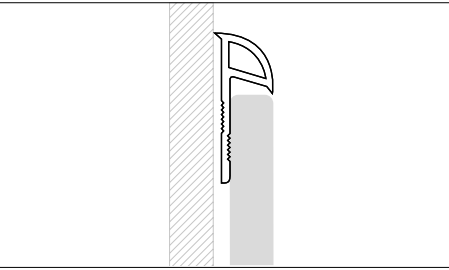

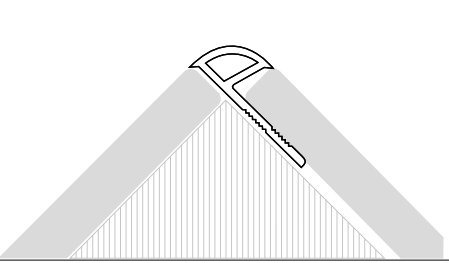

## PVC satinado:

Los perfiles de protección de Arcansas son una línea de perfiles diseñados para unir y proteger las esquinas externas del revestimiento en cerámico. Disponible en diferentes secciones, alturas y colores.

Obtenidos por extrusión de plástico, los perfiles de PVC Arcansas tienen son coloreados en la masa. No cambian de color si se rayan. Representan la solución ideal para aficionados al bricolaje gracias a su versatilidad y facilidad de uso. Disponible en múltiples variedades de color.

## Ventajas:

Coloreado en masa, no pierde color si se raya.  
Gran disponibilidad de colores.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Precio competitivo.  
Reciclabile en el plástico.

# PVC Extra Lucido

Extra Shiny PVC/ PVC Extra Brillant/ PVC Extra Brillante

## PVC Extra lucido:

Ottenuti mediante una speciale tecnica di estrusione plastica, i profili di protezione Arcansas sono una linea di profili progettati per raccordare e proteggere gli angoli esterni dei rivestimenti in ceramica. Disponibili in differenti sezioni, altezze e colori.

Speciale lavorazione che conferisce una superficie brillantissima come fosse alluminio verniciato a polveri epossidiche. Colorato in massa, nn perde il colore se graffiato. Rappresentano la soluzione ideale per professionisti e DIYers grazie alla elevata qualità estetica e alla facilità di utilizzo. Disponibile in moltissimi colori oltre agli eleganti bianco, nero .

## Vantaggi:

Grande disponibilità di colori vivaci e decorativi.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Riciclabile nella plastica.

## Extra shiny PVC:

Obtained by a special extruding technique, Arcansas protection profiles are designed to connect and protect the external corners and edges of ceramic tiles coverings. Available in different sections, heights and colours.

Thanks to a special processing, the profile has a very bright surface and looks like aluminum painted with epoxy powders. Mass-coloured, it does not lose the colour if scratched. These profiles represent the ideal solution for professionals and DIYers thanks to their high aesthetic quality and ease of use. Available in many colours besides the elegant white and black.

## Advantages:

Wide range of vivid and decorative colours.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance  
Durability.  
Recyclable.

## PVC extra brillant :

Obtenus grâce à une technique d'extrusion plastique spéciale, les profils de protection Arcansas sont une gamme de profils conçus pour connecter et protéger les coins externes des revêtements carrelage. Disponible en différentes sections, hauteurs et couleurs.

Un traitement spécifique permet de donner au profilé une surface très brillante comme s'il s'agissait d'aluminium enduit de poudre époxy. Coloré en masse, il ne la perd pas s'il est rayé. Ils représentent la solution idéale pour les professionnels et les bricoleurs grâce à leur haute qualité esthétique et leur facilité d'utilisation. Disponible en plusieurs couleurs en plus de l'élégant blanc, noir.

## Avantages:

Grande disponibilità di colori vivaci e decorativi.  
Facilità d'utilisation : peut être coupé avec un cutter ou des ciseaux.  
Bonne résistance mécanique et aux UV.  
Durée dans le temps.  
Recyclable en plastique.

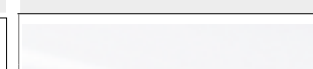

## PVC extra brillante:

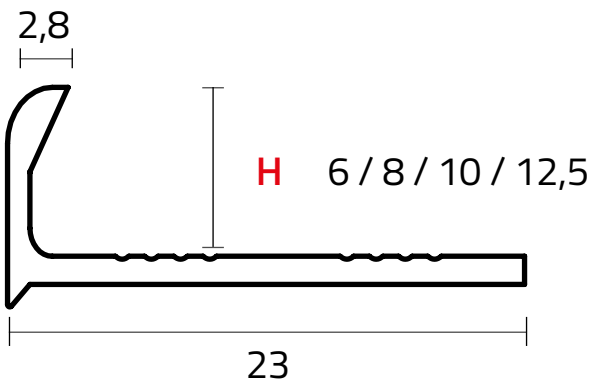

Obtenidos a través de una técnica especial de extrusión de plástico, los perfiles de protección Arcansas son una línea de perfiles diseñados para conectar y proteger las esquinas externas de los revestimientos cerámicos. Disponible en diferentes secciones, alturas y colores.

Procesamiento especial que confiere una superficie muy brillante como si fuera aluminio pintado con polvo epoxi. Coloreado en masa, no pierde color si se raya. Representan la solución ideal para profesionales y aficionados al bricolaje gracias a su alta calidad estética y facilidad de uso. Disponible en muchos colores además del elegante blanco y del elegante negro.

## Ventajas:

Gran disponibilidad de colores brillantes y decorativos.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Reciclabile en el plástico.

# PVC Rivestito

Coated PVC/ PVC enduit/ PVC recubierto

## PVC Rivestito:

Realizzato per estrusione plastica. Viene successivamente ricoperto mediante pellicole antigraffio che derivano direttamente dalle tecnologie di rivestimento utilizzate nell'industria dell'arredamento. Sono caratterizzate pertanto da elevato effetto cromatico decorativo e altissima resistenza all' acqua, umidità. Non pulire con materiale abrasivo.

## Vantaggi:

Antigraffio.  
Resistente all'acqua.  
Grande disponibilità di colori vivaci e decorativi.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Inattaccabile dai raggi UV.  
Durata nel tempo.  
Riciclabile nella plastica.

## Coated PVC:

Obtained by plastic extrusion, it is subsequently covered with scratch-resistant films which are the same as those used in the furniture industry and are therefore characterized by a high decorative colour effect and very high resistance to water and humidity.

Do not clean with abrasive material.

## Advantages:

Scratch-resistant.  
Water resistant.  
Wide range of vivid and decorative colours.  
Ease of use: can be cut with a cutter or scissors.  
Resistant to UV rays.  
Durability.  
Recyclable.

## PVC enduit :

Fabriqué par extrusion de plastique. Il est ensuite recouvert d'un film anti-rayures issu directement des technologies de revêtement utilisées dans l'industrie du meuble. Ils se caractérisent donc par un bel effet de couleur très décoratif et une très haute résistance à l'eau et à l'humidité. A ne pas nettoyer avec un matériau abrasif.

## Avantages :

Résistant aux rayures.  
Résistant à l'eau.  
Grande disponibilité de couleurs vives et décoratives.  
Facilité d'utilisation : peut être coupé avec un cutter ou des ciseaux.  
Résistant aux rayons UV.  
Durée dans le temps.  
Recyclable en plastique.

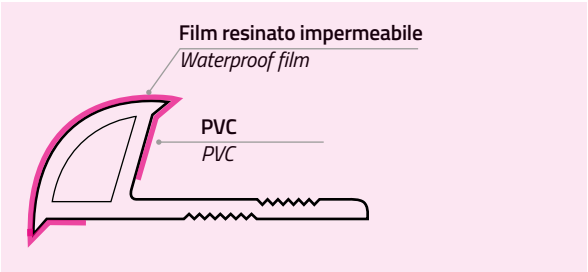

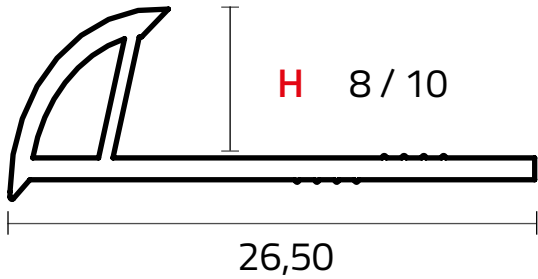

## PVC recubierto:

Hecho por extrusión de plástico. Posteriormente se cubre con películas resistentes a los arañazos con las tecnologías de revestimiento utilizadas en la industria del mueble. Por lo tanto, se caracterizan por un alto efecto de color decorativo y una resistencia muy alta al agua, a la humedad. No limpiar con material abrasivo.

## Ventajas:

Resistente a los arañazos.  
Resistente al agua.  
Gran disponibilidad de colores brillantes y decorativos.  
Facilidad de uso: se puede cortar con un cortador o tijeras.  
Resistente a los rayos UV.  
Duración en el tiempo.  
Reciclabile en plástico.

# Giunti di dilatazione

Expansion joints/ Joints de dilatation/ Juntas de expansión

## Giunti di dilatazione:

I giunti di dilatazione sono profili specificamente progettati per intervenire in maniera mirata sulle flessioni e compressioni della pavimentazione dovute principalmente alla costante pressione degli agenti atmosferici e ad escursione termica - in caso di superfici esterne - o ai continui movimenti della stessa pavimentazione che possono generare il prematuro distacco del rivestimento - anche in superfici interne.

La versatilità del profilo ne permette un'applicazione su diverse tipologie di pavimento, anche aventi diversa natura e spessore.

Si consiglia l'uso di giunti di dilatazione almeno ogni 15 Mq di superficie piastrellata.

## Expansion joints:

Expansion joints are profiles specifically designed to face the needs of thermal expansion and contraction in indoor and outdoor floors that can bring about detachment or damage to the coating.

Arcansas expansion joints are very versatile and can be used in different types of floors, even with different thickness and material.

The use of expansion joints is recommended at least every 15 square meters of tiled surface.

## Joints de dilatation :

Les joints de dilatation sont des profils spécifiquement conçus pour intervenir de manière ciblée sur les flexions et compressions du revêtement de sol dues principalement à la pression constante des agents atmosphériques et à l'excursion thermique (dans le cas de surfaces externes) ou aux mouvements continus de ce même revêtement de sol qui peuvent engendrer le détachement prématuré du revêtement - même sur les surfaces internes.

La polyvalence du profil permet de l'appliquer à différent type de revêtements de sol, ayant également une nature et une épaisseur différentes.

Nous recommandons l'utilisation de joints de dilatation au moins tous les 15 mètres carrés de surface carrelée.

## Juntas de expansión:

Las juntas de expansión son perfiles diseñados específicamente para intervenir de manera específica en las flexiones y compresiones del suelo debido principalmente a la presión constante de los agentes atmosféricos y a la amplitud térmica - en el caso de superficies externas - o a los movimientos continuos de los mismos suelos que pueden generar despegue prematuro del revestimiento, incluso en superficies internas.

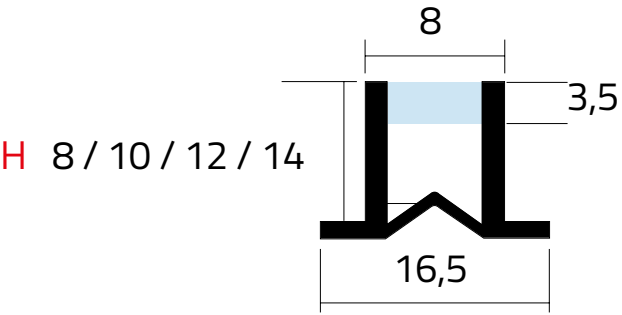

La versatilidad del perfil permite que se aplique a diferentes tipos de suelos, también con diferente naturaleza y grosor.

Recomendamos el uso de juntas de expansión al menos cada 15 metros cuadrados de superficie de baldosa.

# Listelli

Decorative listello / Equerres de finition / Listeles

## Listelli:

Il listello decorativo Arcansas è utilizzato per creare una linea elegante sul rivestimento in ceramica. Si abbina magnificamente agli accessori del bagno producendo esclusivi effetti cromatici. Disponibili in differenti dimensioni e finiture.

Viene realizzato per estrusione dell'alluminio e sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6060 per ottenere una colorazione costante per il massimo grado di finitura estetica oltre che funzionale.

## Decorative listello:

Arcansas decorative listellos are used to create an elegant line on ceramic walls. They beautifully match with bathroom accessories and creates an exclusive chromatic effect. Available in different dimensions and finishing.

It is made by aluminium extrusion and then it is anodized by immersion in electrolytic tanks and subsequently in the colour tanks, creates a protective layer that protects the colour itself. Arcansas guarantees a treatment thickness from 10 to 15µm according to the type of colour for the maximum quality of protection. Arcansas uses alloy 6060 to obtain a constant colour and the highest level of aesthetic and functionally finishing.

## Equerres de finition :

La bande décorative Arcansas est utilisée pour créer une ligne élégante sur le revêtement en carrelage. Il se combine merveilleusement bien avec des accessoires de salle de bain produisant des effets chromatiques exclusifs. Disponible en différentes tailles et finitions.

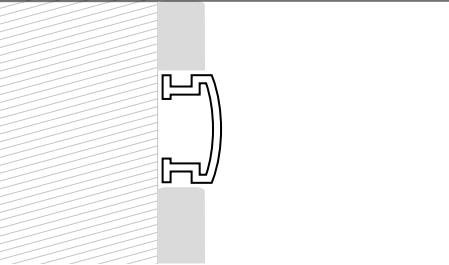

Il est fabriqué par extrusion d'aluminium et soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans des baignoires de Couleur, qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 10 à 15 µm selon le type de couleur pour la meilleure qualité de protection. Arcansas utilise l'alliage 6060 afin d'obtenir une coloration brillante et uniforme pour une finition hautement esthétique et fonctionnelle.

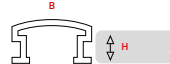

## Listeles:

El listel decorativo Arcansas se utiliza para crear una línea elegante en el revestimiento cerámico. Se combina maravillosamente con accesorios de baño produciendo efectos cromáticos exclusivos. Disponible en diferentes medidas y acabados.

Se fabrica mediante extrusión de aluminio y se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en los tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un grosor del tratamiento de 10 a 15 µm según el tipo de color para la máxima calidad de protección. Arcansas utiliza la aleación 6060 para obtener una coloración constante para el más alto grado de acabado estético y funcional.

# Paraspigoli

## Corner Profiles/ Protecteur D'angle/ Guardacantos

### Paraspigoli:

I Paraspigoli Arcansas sono progettati e prodotti per proteggere gli spigoli verticali od orizzontali dopo la posa del rivestimento. La rapidità e semplicità di posa è garantita dallo speciale adesivo presente in alcune versioni.

### Paraspigoli in Acciaio Inox:

Ottenuti per profilatura nella lega più nobile disponibile oggi sul mercato, AISI 304 V2A , grazie alla sua elevatissima inossidabilità e resistenza agli agenti meccanici e atmosferici, è adatto per interni ed esterni. Ha un aspetto elegante e solido. Adatto in edilizia , altamente protettivo e decorativo.

### Paraspigoli in Alluminio:

L'alluminio subisce un trattamento di ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il profilo

### Paraspigoli in alluminio effetto pietra:

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e pre-verniciatura per conferire resistenza e massima adesione alla successiva verniciatura.

### Paraspigoli in PVC:

Ottenuti per estrusione plastica, i profili in PVC Arcansas sono colorati in massa. Non cambiano colore se graffiati.

### Corner Profiles:

Arcansas Corners Profiles are designed and produced to protect vertical and horizontal corners with out without ceramic tiles coating. The special adhesive tape guarantees a quick and easy installation.

### Stainless-steel corner profiles:

Obtained by profiling in alloy AISI 304 V2A, the most noble alloy available on the market today, thanks to its high resistance to the rust and to mechanical and atmospheric agents, it is suitable both for indoors and outdoors. It has an elegant and solid appearance. Suitable for construction, highly protective and decorative.

### Aluminium corner profiles:

The aluminium is anodized by immersion in electrolytic tanks and subsequently in the colour tanks, creates a protective layer that protects the colour itself.

### Stone look aluminium corner profiles:

Obtained by extrusion and subsequent painting with electrostatic epoxy powders, they are previously treated with a special degreasing and pre painting process to give resistance and maximum adhesion to the subsequent painting.

### PVC corner profiles:

Obtained by plastic extrusion, Arcansas PVC profiles are mass-coloured. They do not change colour if scratched.

### Protecteur D'angle:

Les protecteur d'angle Arcansas sont conçus et fabriqués pour protéger les bords verticaux ou horizontaux après la pose du revêtement. La rapidité et la simplicité d'installation sont garanties par l'adhésif spécial présent dans certaines versions.

### Protecteur d'angle en acier inoxydable :

Obtenu par profilage dans l'alliage le plus noble disponible aujourd'hui sur le marché : l'AISI 304 V2A, grâce à sa très haute résistance à la rouille et sa résistance aux agents mécaniques et atmosphériques, convient pour l'intérieur et l'extérieur. Il a une apparence élégante et solide. Convient pour la construction. Hautement protecteur et décoratif.

### Protecteur d'angle en aluminium :

L'aluminium subit un traitement d'oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur qui est ensuite fixée dans les derniers réservoirs du long processus anodique, créant une couche protectrice qui protège le profilé.

### Protecteur d'angle en aluminium effet pierre :

Obtenus par extrusion et ensuite peint avec des poudres époxy électrostatiques, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante.

### Protecteur d'angle en PVC :

Obtenus par extrusion de plastique, les profilés PVC Arcansas sont colorés en masse. Ils ne perdent pas leur couleur s'ils sont rayés.

### Guardacantos:

Los guardacantos Arcansas están diseñados y producidos para proteger los bordes verticales u horizontales después de la colocacion de revestimientos. La rapidez y la simplicidad de la instalación están garantizadas por el adhesivo especial presente en algunas versiones.

### Guardacantos en acero inoxidable:

Obtenido al perfilar la aleación más noble disponible en el mercado hoy en día, AISI 304 V2A, gracias a su muy alta resistencia a la oxidación y resistencia a los agentes mecánicos y atmosféricos, es indicado sea para interiores y exteriores. Tiene un aspecto elegante y sólido. Idóneo en construcción, altamente protector y decorativo.

### Guardacantos de aluminio:

El aluminio se somete a un tratamiento de oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el perfil.

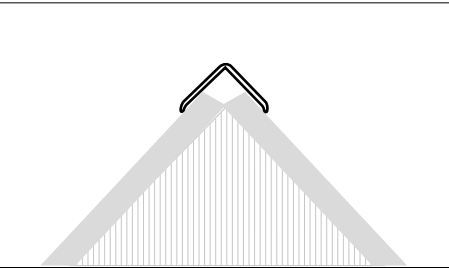

### Guardacantos de aluminio con efecto piedra:

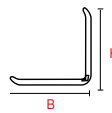

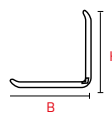

Obtenidos por extrusión y pintura posterior con polvos epoxídicos electrostáticos, se tratan previamente con un proceso especial de desengrasado y prepintura para dar resistencia y máxima adhesión a la pintura sucesiva.

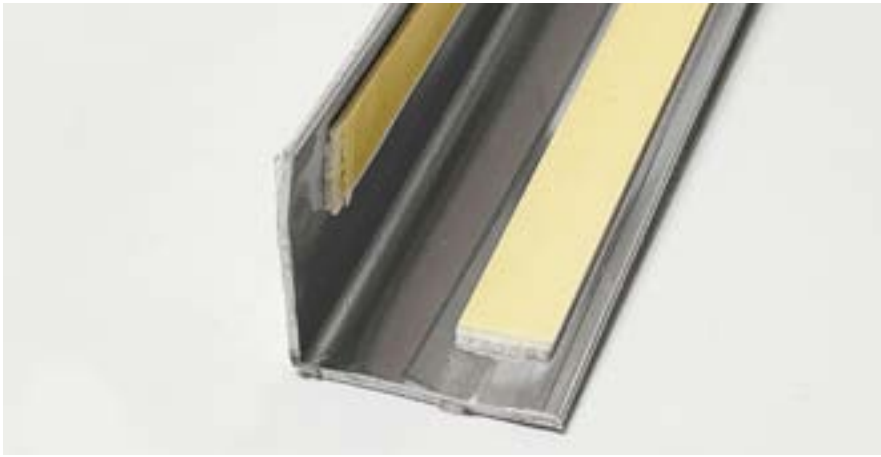

### Guardacantos de PVC:

Obtenidos por extrusión de plástico, los perfiles de PVC Arcansas son coloreados en masa. No cambian de color si se rayan.

# Profili per top cucina e di raccordo igienico

Sanitary-wear profiles and kitchen worktop cover profiles/  
 Profils de connections hygiéniques et profils pour les plans de travail de cuisine/

## Profili di raccordi igienico:

Sono profili progettati per risolvere ogni esigenza di raccordo igienico raggiato tra pavimento e parete secondo le norme igienico sanitarie europee. Si caratterizza per la semplicità di posa. Il materiale utilizzato è una speciale e pregiata composizione plastica atta ad ottenere un aspetto lucido brillante a tutto corpo, donandole un effetto porcellanato. Non pulire con materiale abrasivo.

## Vantaggi:

Non teme raggi UVA, graffi, detergenti. Può essere impiegato anche in esterno.

## Sanitary-wear profiles:

These profiles are designed to satisfy every need in terms of connection between floor and walls according to European health and hygiene standards. Easy to install, it is made by a special and fine plastic melt conceived to obtain a shiny bright porcelain look. Do not clean with abrasive materials.

## Advantages:

Resistant to UV rays, scratches and detergents it can also be used outdoors.

## Profils de connections hygiéniques :

Ces profils sont conçus pour répondre à tous besoin d'une connection hygiénique arrondie entre le sol et le mur conformément aux normes sanitaires européennes. Ils se caractérisent par la simplicité d'installation. Le matériau utilisé est une composition plastique spéciale et précieuse qui donne un aspect brillant, un effet porcelaine. Ne pas nettoyer avec un matériau abrasif.

## Avantages:

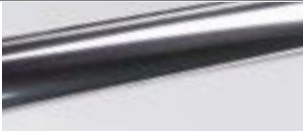

Il ne craint pas les rayons UVA, les rayures, les détergents. Il peut également être utilisé à l'extérieur.

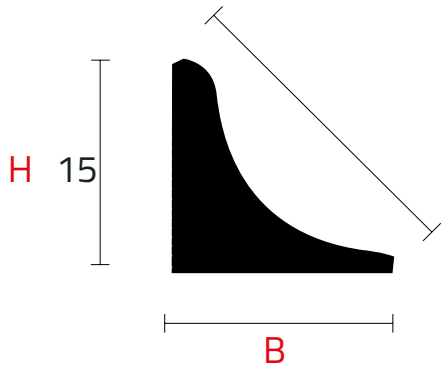

## Perfiles de conexión higiénica:

Estos perfiles están diseñados para resolver cualquier necesidad de una conexión higiénica redondeada entre el piso y la pared de acuerdo con las normas sanitarias europeas. Se caracteriza por la facilidad de instalación. El material utilizado es una composición plástica especial y preciosa capaz de obtener una apariencia brillante completa, dándole un efecto de porcelana. No limpiar con material abrasivo.

## Ventajas:

No teme a los rayos UVA, arañazos, detergentes. Se puede alpicar también al exterior.

# Profili per Balcone

Balcony profiles/ Profilés pour Balcon/ Perfiles para Balcón

## Profili balcone:

Profilo con bordo di contenimento superiore che rende idonea la posa evitando l'uso di soglie. Protegge e rifinisce i bordi esterni del balcone evitando il contatto diretto dell'acqua piovana con il massetto in cemento. La sua sezione inclinata e con fori di drenaggio consente il defluire dell'acqua e umidità penetrata attraverso le fughe della pavimentazione evitando il sollevamento delle piastrelle.

Sistema composto da 3 elementi (barra profilo perimetrale da 2,7 mt, angolo esterno, giunto di raccordo). Realizzato in alluminio e sottoposto a processo di anodizzazione che garantisce una buona resistenza agli agenti chimici ed atmosferici. Disponibile in diversi colori e in finiture lucide ed effetto pietra.

## Vantaggi:

Funzione di protezione. Assicurano un corretto deflusso delle acque meteoritiche. Evitano le infiltrazioni. Profili resistenti e leggeri.

## Balcony profiles:

Innovative edging profile specifically designed to permit the efficient run-off of water and to replace the old marble edges. It covers the external edges of the balcony and protects the screed from rainwater. Its sloped section and its perforated anchoring flange allow the run-off of the water and humidity seeped through the flooring grout lines, avoiding tiles damages.

Besides the 2,7mt profile, Arcansas supplies also precutted external corners and joints. All components are made from aluminium and are available in several different colours and finishing.

## Advantages:

Protection of the external edges of the balcony. Ensure the efficient run-off of rainwater. Prevent seepages. Light and resistant profiles.

## Profilés pour balcon :

Profilé avec bord de confinement supérieur qui le rend approprié pour l'installation en évitant l'utilisation de seuil. Il protège et termine les bords extérieurs du balcon en évitant le contact direct de l'eau de pluie avec la chape en béton. Sa section inclinée et avec des trous de drainage permet l'écoulement de l'eau et de l'humidité qui pénètrent à travers les joints du plancher en évitant le soulèvement des carreaux.

Système composé de 3 éléments (barre profilée de 2,7 m de périmètre, coin extérieur, joint de raccordement). Fabriqué en aluminium et soumis à un processus d'anodisation qui garantit une bonne résistance aux agents chimiques et atmosphériques. Disponible en différentes couleurs et dans des finitions brillantes et effet pierre.

## Avantages:

Fonction de protection. Ils assurent un bon écoulement des eaux météoriques. Ils évitent les infiltrations. Profils résistants et légers.

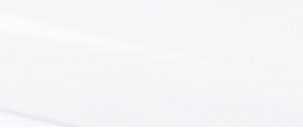

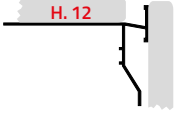

## Perfiles para balcón:

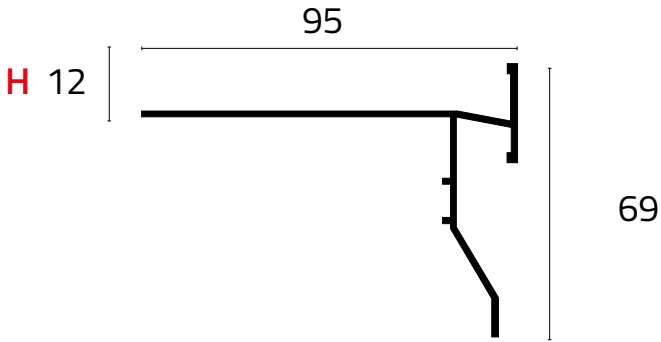

Perfil con borde de contención superior que hace que la instalación sea adecuada evitando el uso de umbrales. Protege y termina los bordes externos del balcón evitando el contacto directo del agua de lluvia con la solera de hormigón. Su sección inclinada y con orificios de drenaje permite que el agua y la humedad penetren a través de las juntas del piso evitando el levantamiento de las baldosas.

Sistema compuesto por 3 elementos (barra de perfil perimetral de 2,7 m, esquina externa, junta de conexión). Fabricado en aluminio y sometido a un proceso de anodización que garantiza una buena resistencia a los agentes químicos y atmosféricos. Disponible en diferentes colores y en acabados brillantes y efecto piedra.

## Ventajas:

Función de protección. Aseguran la salida adecuada de las aguas meteorológicas. Evitan las infiltraciones. Perfiles resistentes y ligeros.

# Alluminio

*Aluminium/ Aluminum/ Aluminio*

**Leggerezza:** l'alluminio è un materiale leggero ma resistente, il che lo rende ideale per i profili per il suolo che devono fornire protezione e resistenza senza aggiungere troppo peso al pavimento.

**Resistenza alla corrosione:** l'alluminio è resistente alla corrosione, il che lo rende ideale per i profili per il suolo utilizzati in ambienti umidi o esposti all'acqua, come bagni, cucine o aree esterne.

**Facilità di lavorazione:** l'alluminio è facile da lavorare e può essere piegato, tagliato e forato per adattarsi a qualsiasi forma o dimensione richiesta.

**Durabilità:** l'alluminio è resistente all'usura e all'abrasione, il che lo rende un materiale ideale per i profili per il suolo che devono resistere all'usura quotidiana.

**Design flessibile:** l'alluminio è disponibile in diverse finiture e colori, il che lo rende un materiale flessibile per i profili per il suolo che devono adattarsi a diversi stili e design di interni.

**Lightness:** Aluminum is a lightweight yet strong material, making it ideal for floor profiles that need to provide protection and strength without adding too much weight to the floor.

**Corrosion resistance:** Aluminum is resistant to corrosion, making it ideal for floor profiles used in humid or water-exposed environments such as bathrooms, kitchens, or outdoor areas.

**Easy to work with:** Aluminum is easy to work with and can be bent, cut, and drilled to fit any required shape or size.

**Durability:** Aluminum is resistant to wear and abrasion, making it an ideal material for floor profiles that must withstand daily wear and tear.

**Flexible design:** Aluminum is available in various finishes and colors, making it a flexible material for floor profiles that need to adapt to different interior styles and designs.

**Légèreté:** L'aluminium est un matériau léger mais résistant, ce qui le rend idéal pour les profilés de sol qui doivent offrir une protection et une résistance sans ajouter trop de poids au sol.

**Résistance à la corrosion:** L'aluminium est résistant à la corrosion, ce qui le rend idéal pour les profilés de sol utilisés dans des environnements humides ou exposés à l'eau tels que les salles de bains, les cuisines ou les espaces extérieurs.

**Facilité de travail:** L'aluminium est facile à travailler et peut être plié, coupé et percé pour s'adapter à n'importe quelle forme ou taille requise.

**Durabilité:** L'aluminium est résistant à l'usure et à l'abrasion, ce qui en fait un matériau idéal pour les profilés de sol qui doivent résister à l'usure quotidienne.

**Design flexible:** L'aluminium est disponible dans différentes finitions et couleurs, ce qui en fait un matériau flexible pour les profilés de sol qui doivent s'adapter à différents styles et designs d'intérieur.

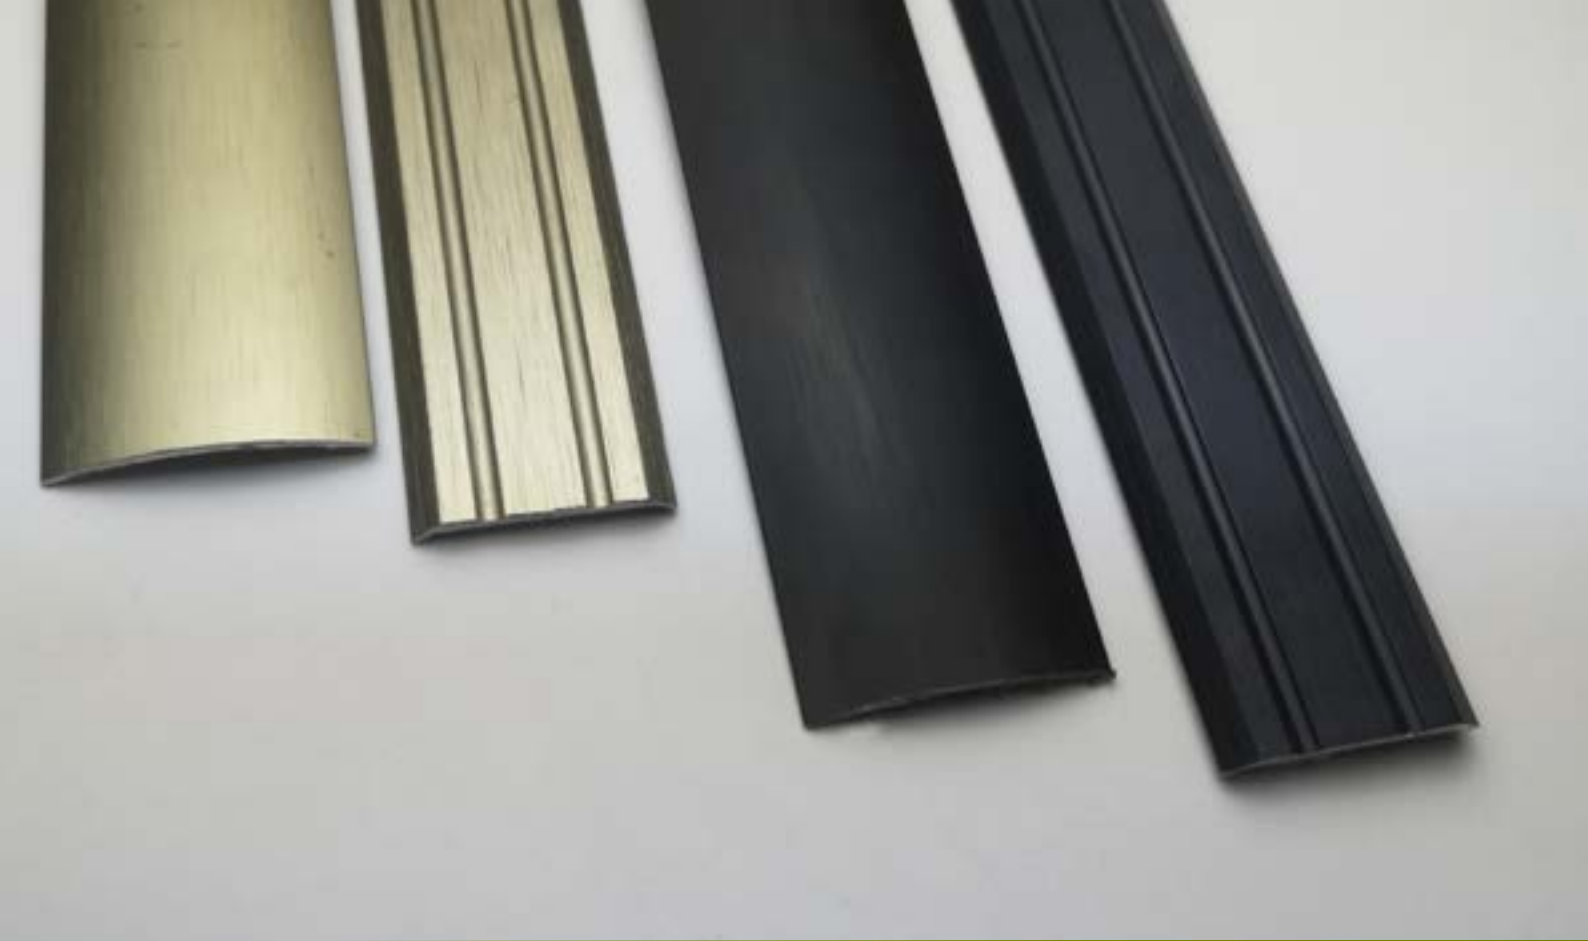

**Ligereza:** El aluminio es un material ligero pero resistente, lo que lo hace ideal para perfiles de suelo que deben proporcionar protección y resistencia sin agregar demasiado peso al piso.

**Resistencia a la corrosión:** El aluminio es resistente a la corrosión, lo que lo hace ideal para perfiles de suelo utilizados en ambientes húmedos o expuestos al agua, como baños, cocinas o áreas exteriores.

**Fácil de trabajar:** El aluminio es fácil de trabajar y puede ser doblado, cortado y perforado para adaptarse a cualquier forma o tamaño requerido.

**Durabilidad:** El aluminio es resistente al desgaste y a la abrasión, lo que lo convierte en un material ideal para perfiles de suelo que deben soportar el desgaste diario.

**Diseño flexible:** El aluminio está disponible en varios acabados y colores, lo que lo convierte en un material flexible para perfiles de suelo que necesitan adaptarse a diferentes estilos y diseños de interiores..

# Coprigiunti

## Covers/ Couvre-joints/Tapas de juntas

I Coprigiunti Arcansas sono una linea di profili progettata per coprire in modo elegante eventuali imperfezioni del pavimento, dovute al taglio o alla posa fra pavimenti di differenti materiali come ceramica, parquet o moquette. Offerti in differenti materiali e finiture, sono realizzati in versione raccordata o planare. La vasta gamma è abbinabile alle finiture dei profili per il rivestimento. La diversità dei materiali impiegati, rendono tali profili utilizzabili sia in ambito civile che pubblico.

### Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Facilità di applicazione (con viti o colla/adesivo)
- Scarsa manutenzione
- Abbinabili alla gamma di profili per rivestimento e profili fai da te
- Ampia gamma di colori

Arcansas' wide range of covering profiles is specifically designed to create a pleasing result to fix flooring imperfections due to the cuttings and the installations of different kind of floorings such as tiles, parquet or moquette. The best solution comes not only from the aesthetic design given by the joint function, but it is also conceived for a smooth passage thanks to the planar-shape. All finishing can be matched with the finishings of the rest of covering profiles. Arcansas proposes different materials to give flexibility in usage: these profiles can be used in both public and private settings.

### Strong points:

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Can be matched with covering profiles and DIY profiles
- Wide range of colours

Les couvre-joints Arcansas sont une gamme de profilés conçus pour couvrir avec élégance les imperfections du sol, dues à la coupe ou à l'installation entre les sols de différents matériaux tels que la céramique, le parquet ou la moquette. Proposés en différents matériaux et finitions, ils sont réalisés en version articulée ou plate. La large gamme peut être combinée avec les finitions des profilés de revêtement. La diversité des matériaux utilisés rend ces profilés utilisables à la fois dans des contextes civils et publics.

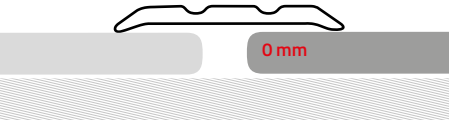

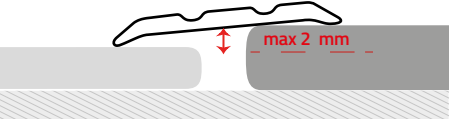

### Avantages:

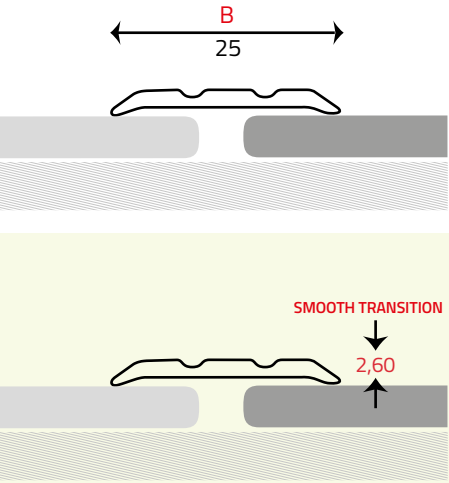

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Leur application permet l'utilisation de différents sols
- Facile à appliquer (avec vis ou colle/adhésif)
- Faible entretien
- Peut être combiné avec la gamme de profilés de revêtement et de profilés de bricolage
- Large gamme de couleur

Los tapajuntas Arcansas son una línea de perfiles diseñados para cubrir con elegancia cualquier imperfección en el suelo debido al corte o instalación entre suelos de diferentes materiales como cerámica, parquet o moqueta. Ofrecidos en diferentes materiales y acabados, se realizan en versión curva o plana. La amplia gama se puede combinar con los acabados de los perfiles de revestimiento. La diversidad de los materiales utilizados hace que estos perfiles sean utilizables tanto en contextos residenciales como públicos.

### Ventajas:

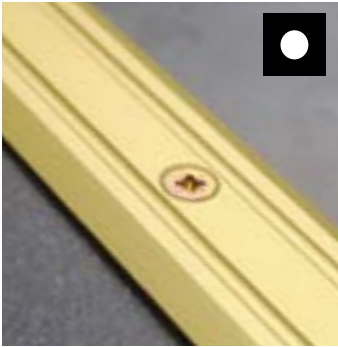

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Su aplicación permite el uso de diferentes suelos
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Se puede combinar con la gama de perfiles de revestimiento y perfiles de bricolaje
- Amplia gama de colores

# Giunti decorativi

Deco trimps/ Joints décoratifs/ Juntas decorativas

Il Giunto decorativo è un prodotto progettato per una giunzione ottimale di pavimenti di differente materiale o pavimenti di diversa natura e spessore e per nascondere le imperfezioni perimetrali. Il prodotto possiede anche una funzione estetica e decorativa grazie alla varietà di materiali degli articoli presenti in gamma, abbinabili alle finiture dei profili per il rivestimento e profili per fai da te. La struttura del giunto garantisce una perfetta resistenza sia ai movimenti di compressione che di trazione del pavimento. Finiture disponibili: Acciaio Inox aisi 304, ottone, alluminio

## Vantaggi:

- Altamente decorativo
- Resistenza ai graffi
- Resistenti al calpestio
- Scarsa manutenzione
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Ampia gamma di colori

Arcansas' decorative trims are designed for the best junction of floorings from different material or thickness, thanks to their ability to hide perimetrical imperfections. The result is not only functional, but also beautiful thanks to the wide range of materials. All decorative trims can be matched with covering profiles and DIY profiles of the same finishing. Available finishings: AISI 304 Stainless-steel, brass-aluminium

## Strong points:

- Highly decorative
- Resistant to foot traffic
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Le joint décoratif est un produit conçu pour la jonction optimale des sols de différents matériaux ou de sols de nature et d'épaisseur différente ainsi que pour masquer les imperfections du périmètre. Le produit facile à appliquer (avec vis ou colle/adhésif) a également une fonction esthétique et décorative grâce à la variété des matériaux des articles de la gamme qui peuvent être combinés avec les finitions des profilés pour le revêtement et des profilés pour le bricolage. La structure du joint garantit une résistance parfaite aux mouvements de compression et de traction du sol. Finitions disponibles : acier inoxydable AISI 304, laiton, aluminium

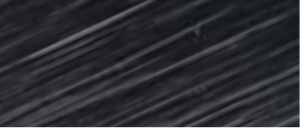

## Avantages:

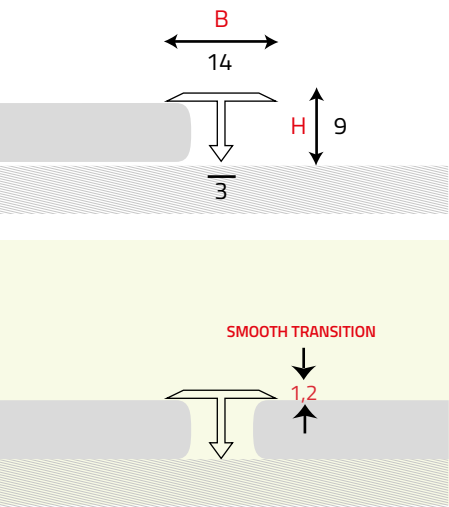

- Très décoratif
- Résistance aux rayures
- Résistant au piétinement
- Faible entretien
- Leur application permet l'utilisation de différents sols
- Large gamme de couleur

La junta decorativa es un producto diseñado para una precisa junta de suelos de diferentes materiales o suelos de diferentes naturaleza y espesor y para disimular imperfecciones perimetrales. El producto también tiene una función estética y decorativa gracias a la variedad de materiales de los artículos de la gama, que se pueden combinar con los acabados de los perfiles para el revestimiento y perfiles para bricolaje. La estructura de la junta garantiza una perfecta resistencia tanto a los movimientos de compresión como a los de tracción del suelo. Acabados disponibles: acero inoxidable AISI 304, latón, aluminio

## Ventajas:

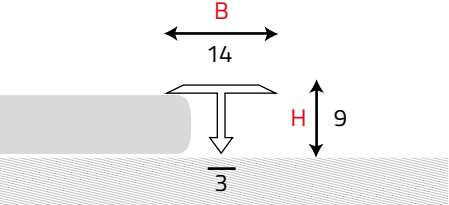

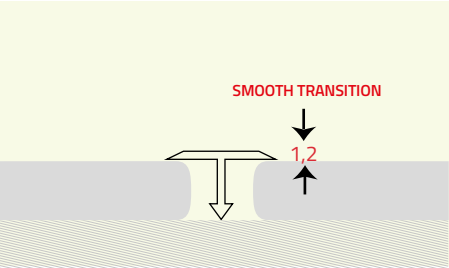

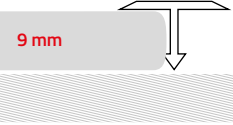

- Altamente decorativo
- resistente al tráfico peatonal
- resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

# Terminali

Sloped cover strips/ Terminaisons/ Terminales

I profili Terminali Arcansas, sovrapposa e sottoposa sono progettati per eliminare qualsiasi dislivello che si può creare al momento della posa di un pavimento nuovo su uno vecchio. Progettato con sezione obliqua, è in grado di colmare qualsiasi gap minimizzando il rischio di incidenti e armonizzare le differenze fra diverse pavimentazioni di diversa finitura. La sua funzione di raccordo tra pavimenti di diversa natura e spessore permette di coprire eventuali scheggiature dei bordi in ceramica e tagli imperfetti dei pavimenti in legno. finiture disponibili: acciaio inox aisi 304, ottone, alluminio.

#### Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- Scarsa manutenzione
- Possibilità di applicazioni: con viti e/ o autoadesivo inclusi)
- Diversi colori disponibili

Arcansas' end profiles, under-tile and over-tile, are conceived to fix any difference in level caused by the application of a new flooring on an old one. Designed with an oblique section this product can manage to fill any gap in order to minimize the risk of accidents but also to nicely link different floorings of different finishings. Its joint function leads to cover any chipping in the tiles edges and the imperfections in wood cutting.

#### Strong points:

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Les profilés de terminaison Arcansas, de sur-pose et de sous-pose sont conçus pour éliminer toute irrégularité pouvant être créée lors de la pose d'un nouveau sol sur un ancien. Conçu avec une section oblique, il comble tout espace en minimisant les risques d'accident et en harmonisant les différences entre les sols aux finitions diverses. Sa fonction de liaison entre des planchers de nature et d'épaisseur différente permet de couvrir tout ébrèchement des bords en céramique et coupes imparfaites des planchers en bois. Finitions disponibles : acier inoxydable aisi 304, laiton, aluminium.

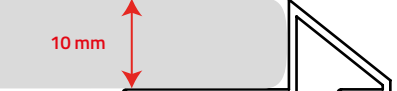

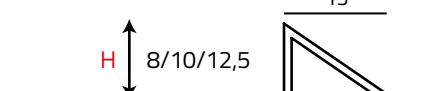

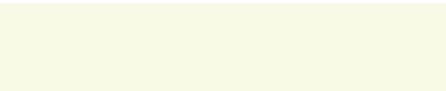

#### Avantages:

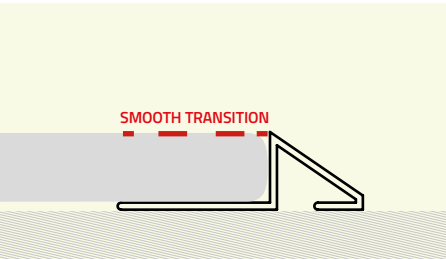

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Faible entretien
- Facile à appliquer (avec vis ou colle/adhésif inclus)
- Différentes couleurs disponibles

Los perfiles terminales Arcansas, sobrepuestos y contrapuestos, están diseñados para eliminar los desniveles que se puedan crear al colocar un nuevo suelo sobre uno antiguo. Diseñado con una sección oblicua, es capaz de llenar cualquier hueco minimizando el riesgo de accidentes y armonizando las diferencias entre distintos suelos de distintos acabados. Su función de unión entre suelos de diferente naturaleza y espesores permite tapar cualquier desportillado de los cantos cerámicos y cortes imperfectos de los suelos de madera. acabados disponibles: acero inoxidable aisi 304, latón, aluminio.

#### Ventajas:

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

# Paragradini

Stair Edges/ Nez de marche/ Nariz de escalera

I Paragradini Arcansas sono stati progettati per proteggere il bordo del gradino e nascondere la giunzione tra la pedata e l'alzata, il che ne fa a tutti gli effetti un vero e proprio elemento d'arredo. Indispensabile per dare un tocco di design all'ambiente e per migliorare la salita e la discesa delle scale.

La sua linea moderna ed essenziale fa sì che i gradini acquistino una nuova luce, donando all'intera struttura un risultato estetico ad alto impatto visivo. La praticità del prodotto consente un utilizzo rapido e semplice anche ai neofiti del 'fai da te', senza dover ricorrere ai professionisti del settore. Finiture disponibili: Acciaio Inox aisi 304, Ottone, Alluminio, pvc

## Vantaggi:

- Altamente decorativi e pratici
- Resistenti al calpestio
- Scarsa manutenzione
- La loro applicazione con viti o adesivo garantisce alla struttura un impiego stabile e continuativo

Arcansas' stair nosing are designed to protect stair edges and hide the junction between the riser and the tread, but with the result of a design element in any case of application. This product is essential to give a design touch to the setting of application and to empower the safety in the ascent and descent of the stairs. The essential and modern style of the product let the stairs gain a new light, giving an high aesthetical impact to the whole structure. The advantage comes also from the easiness and fastness of application, so anybody can make the application himself/herself without the aid of professionals.

Available finishings: AISI 304 Stainless-steel, brass, aluminium, PVC

## Strong points:

- Highly decorative
- Resistant to foot traffic
- Easy application thanks to screws or glue/adhesive tape, with a long-lasting and stable result
- Little maintenance is required

Le nez de marche Arcansas a été conçu pour protéger le bord de la marche et cacher la jonction entre le giron et la contremarche, ce qui en fait un véritable complément d'ameublement. Indispensable pour donner une touche de design à l'environnement et pour améliorer la montée et la descente des escaliers. Sa ligne moderne et essentielle donne aux marches une nouvelle lumière, donnant à l'ensemble de la structure un résultat esthétique au fort impact visuel. La praticité du produit permet une utilisation rapide et facile même pour les débutants en bricolage, sans avoir à recourir à des professionnels du secteur.

Finitions disponibles : acier inoxydable AISI 304, laiton, aluminium, pvc

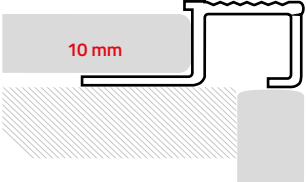

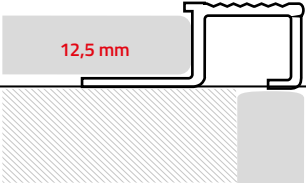

## Avantages:

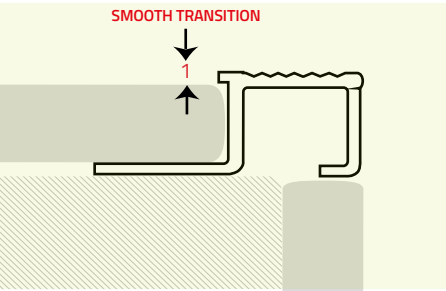

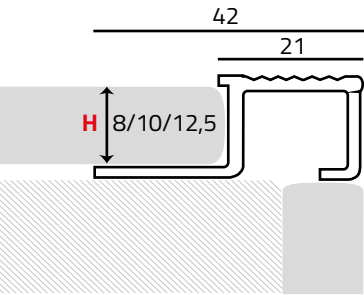

- Très décoratif et pratique
- Résistant au piétinement
- Faible entretien
- L'application avec des vis ou de la colle garantit une utilisation stable et permanente de la structure

Los perfiles para escalón Arcansas fue diseñado para proteger el borde del escalón y ocultar la unión entre la huella y la contrahuella, lo que en efecto lo convierte en un producto indispensable. Imprescindible para dar un toque de diseño al entorno y para mejorar la subida y bajada de escaleras. Su línea moderna y esencial asegura que los escalones adquieran un nuevo design, dando a toda la estructura un resultado estético de alto impacto visual. La practicidad del producto permite un uso rápido y sencillo incluso para los novatos del 'hágalo usted mismo', sin tener que recurrir a profesionales del sector. Acabados disponibles: acero inoxidable AISI 304, latón, aluminio, pvc

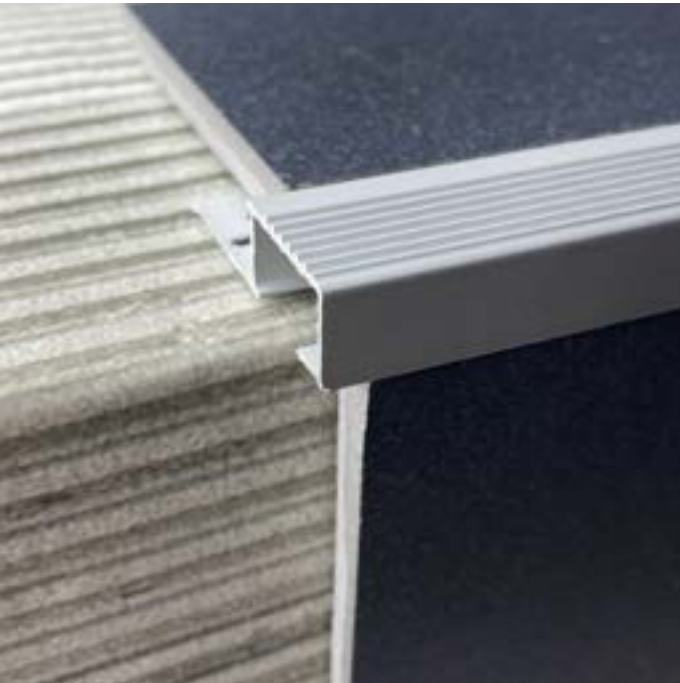

## Ventajas:

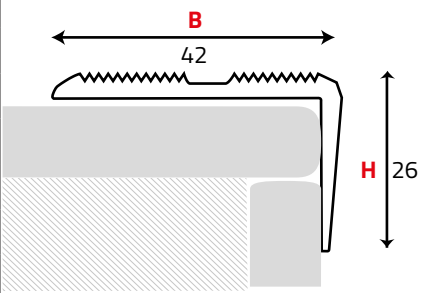

- Muy decorativo y práctico.
- Resistente al tráfico peatonal
- Se necesita de poco mantenimiento
- Su aplicación con tornillos o adhesivo garantiza a la estructura un uso estable y continuo

ARCANSAS ha progettato un sistema completo di profili per ambienti in parquet e laminati.

Tutte le finiture legno sono disponibili sia per batilam, che per le varie forme di profili parquet.

Catalogo Suolo/ Flooring catalogue

## Speciale laminati e parquet

Laminates and Parquet/ Stratifiés et parquet/ Laminadas y Parquet

Sono progettati espressamente per risolvere i grandi problemi di dilatazione e rifinitura di tutti i pavimenti di parquet laminato. L'effetto legno è ottenuto mediante ricopertura a caldo del profilo di alluminio con speciale pellicola in Pvc che riproduce fotograficamente la superficie del parquet. Straordinario realismo, resistenza a i graffi, all'usura, ai detersivi, all'acqua, al colore, sono le sue insostituibili peculiarità.

Finiture disponibili: Alluminio

### Vantaggi:

- Altamente decorativi
- Resistenti ai graffi
- Soluzione per problemi di dilatazione
- Facilità di applicazione
- Scarsa manutenzione
- Perfettamente abbinabili con profili dotati di pellicola color legno

Special range for laminate flooring. They are specifically designed to solve the tough issues in the expansion and finishing of all laminate parquet flooring. The wooden effect is obtained by the hot-covering of the aluminium profile with a specific PVC film, which replicates photographically the surface of the parquet flooring. The irreplaceable peculiarity of these products is not only the extraordinary realism, but also the resistance to scratches and usury, to any kind of soap, to water and colours. Available finishings: Aluminium

### Strong points:

- Highly decorative
- Resistant to scratches
- Ideal to solve flooring expansion issues
- Easy to apply
- Little maintenance is required
- Match perfectly with any other kind of wooden effect film-coated profiles from Arcansas range

Spécifiques pour les stratifiés et parquets : ils sont expressément conçus pour résoudre les grands problèmes de dilatation et de finition de tous les parquets stratifiés. L'effet bois est obtenu en recouvrant à chaud le profilé en aluminium d'un film PVC spécial qui reproduit photographiquement la surface du parquet. Un réalisme extraordinaire, une résistance aux rayures, à l'usage, aux détergents, à l'eau, à la couleur, sont ses particularités irremplaçables. Finitions disponibles : aluminium

### Avantages:

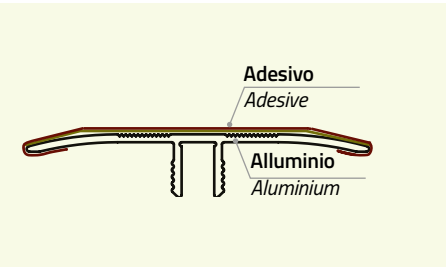

- Très décoratif
- Résistant aux rayures
- Solution pour les problèmes de dilatation
- Facilité d'application
- Faible entretien
- Parfaitement combinable avec des profilés avec un film de couleur bois

Laminados especiales y parquet: Están expresamente diseñados para solucionar los grandes problemas de dilatación y acabado de todos los suelos de parquet laminados. El efecto madera se obtiene cubriendo el perfil con una película especial de PVC bajo calor que reproduce fotográficamente la superficie del parquet. Realismo extraordinario, resistencia a los arañazos, al desgaste, a los detergentes, al agua, al color, son sus peculiaridades insustituibles. Acabados disponibles: Aluminio

### Ventajas:

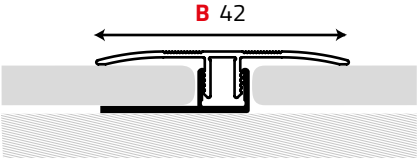

- Muy decorativo
- Resistente al rayado
- Solución para problemas de dilatación
- Facilidad de aplicación
- Se necesita de poco mantenimiento
- Perfectamente combinable con perfiles con película color madera

# ACCIAIO INOX

*Stainless steel/ Acier inoxydable/ Acero inoxidable*

**Resistenza alla corrosione:** l'acciaio inox è resistente alla corrosione, il che lo rende ideale per i profili per il suolo utilizzati in ambienti umidi o esposti all'acqua, come bagni, cucine o aree esterne.

**Durabilità:** l'acciaio inox è resistente all'usura e all'abrasione, il che lo rende un materiale ideale per i profili per il suolo che devono resistere all'usura quotidiana.

**Facilità di pulizia:** l'acciaio inox è facile da pulire e non si macchia facilmente, il che lo rende ideale per i profili per il suolo utilizzati in ambienti dove l'igiene è importante, come cucine e bagni.

**Estetica:** l'acciaio inox ha un aspetto elegante e moderno, il che lo rende un materiale ideale per i profili per il suolo che devono adattarsi a diversi stili e design di interni.

**Resistenza alle alte temperature:** l'acciaio inox ha una buona resistenza alle alte temperature, il che lo rende ideale per i profili per il suolo utilizzati in ambienti ad alta temperatura come cucine commerciali o forni.

**Resistenza agli agenti chimici:** l'acciaio inox è resistente agli agenti chimici, il che lo rende ideale per i profili per il suolo utilizzati in ambienti dove sono presenti sostanze chimiche, come laboratori e impianti chimici.

**Corrosion resistance:** Stainless steel is resistant to corrosion, making it ideal for floor profiles used in humid or water-exposed environments, such as bathrooms, kitchens, or outdoor areas.

**Durability:** Stainless steel is resistant to wear and abrasion, making it an ideal material for floor profiles that must withstand daily wear and tear.

**Ease of cleaning:** Stainless steel is easy to clean and does not stain easily, making it ideal for floor profiles used in environments where hygiene is important, such as kitchens and bathrooms.

**Aesthetics:** Stainless steel has an elegant and modern appearance, making it an ideal material for floor profiles that must adapt to different interior styles and designs.

**Resistance to high temperatures:** Stainless steel has good resistance to high temperatures, making it ideal for floor profiles used in high-temperature environments such as commercial kitchens or ovens.

**Resistance to chemical agents:** Stainless steel is resistant to chemical agents, making it ideal for floor profiles used in environments where chemical substances are present, such as laboratories and chemical plants.

**Résistance à la corrosion:** L'acier inoxydable est résistant à la corrosion, ce qui en fait un matériau idéal pour les profilés de sol utilisés dans les environnements humides ou exposés à l'eau, tels que les salles de bains, les cuisines ou les espaces extérieurs.

**Durabilité:** L'acier inoxydable est résistant à l'usure et à l'abrasion, ce qui en fait un matériau idéal pour les profilés de sol qui doivent résister à l'usure quotidienne.

**Facilité de nettoyage:** L'acier inoxydable est facile à nettoyer et ne se tache pas facilement, ce qui en fait un matériau idéal pour les profilés de sol utilisés dans des environnements où l'hygiène est importante, tels que les cuisines et les salles de bains.

**Esthétique:** L'acier inoxydable a une apparence élégante et moderne, ce qui en fait un matériau idéal pour les profilés de sol qui doivent s'adapter à différents styles et designs d'intérieurs.

**Résistance aux hautes températures:** L'acier inoxydable a une bonne résistance aux hautes températures, ce qui en fait un matériau idéal pour les profilés de sol utilisés dans des environnements à haute température tels que les cuisines commerciales ou les fours.

**Résistance aux agents chimiques:** L'acier inoxydable est résistant aux agents chimiques, ce qui en fait un matériau idéal pour les profilés de sol utilisés dans des environnements où des substances chimiques sont présentes, tels que les laboratoires et les usines chimiques.

**Resistencia a la corrosión:** El acero inoxidable es resistente a la corrosión, lo que lo hace ideal para perfiles de suelo utilizados en ambientes húmedos o expuestos al agua, como baños, cocinas o áreas exteriores.

**Durabilidad:** El acero inoxidable es resistente al desgaste y a la abrasión, lo que lo convierte en un material ideal para perfiles de suelo que deben soportar el desgaste diario.

**Facilidad de limpieza:** El acero inoxidable es fácil de limpiar y no se mancha fácilmente, lo que lo hace ideal para perfiles de suelo utilizados en ambientes donde la higiene es importante, como cocinas y baños.

**Estética:** El acero inoxidable tiene un aspecto elegante y moderno, lo que lo convierte en un material ideal para perfiles de suelo que deben adaptarse a diferentes estilos y diseños de interiores.

**Resistencia a altas temperaturas:** El acero inoxidable tiene una buena resistencia a altas temperaturas, lo que lo hace ideal para perfiles de suelo utilizados en ambientes de alta temperatura como cocinas comerciales u hornos.

**Resistencia a agentes químicos:** El acero inoxidable es resistente a agentes químicos, lo que lo hace ideal para perfiles de suelo utilizados en ambientes donde hay sustancias químicas presentes, como laboratorios y plantas químicas.

# Coprigiunti

Covers/ Couvre-joints/Tapas de juntas

I Coprigiunti Arcansas sono una linea di profili progettata per coprire in modo elegante eventuali imperfezioni del pavimento, dovute al taglio o alla posa fra pavimenti di differenti materiali come ceramica, parquet o moquette. Offerti in differenti materiali e finiture, sono realizzati in versione raccordata o planare. La vasta gamma è abbinabile alle finiture dei profili per il rivestimento. La diversità dei materiali impiegati, rendono tali profili utilizzabili sia in ambito civile che pubblico.

Arcansas' wide range of covering profiles is specifically designed to create a pleasing result to fix flooring imperfections due to the cuttings and the installations of different kind of floorings such as tiles, parquet or moquette. The best solution comes not only from the aesthetic design given by the joint function, but it is also conceived for a smooth passage thanks to the planar-shape. All finishing can be matched with the finishings of the rest of covering profiles. Arcansas proposes different materials to give flexibility in usage: these profiles can be used in both public and private settings.

Les couvre-joints Arcansas sont une gamme de profilés conçus pour couvrir avec élégance les imperfections du sol, dues à la coupe ou à l'installation entre les sols de différents matériaux tels que la céramique, le parquet ou la moquette. Proposés en différents matériaux et finitions, ils sont réalisés en version articulée ou plate. La large gamme peut être combinée avec les finitions des profilés de revêtement. La diversité des matériaux utilisés rend ces profilés utilisables à la fois dans des contextes civils et publics.

Los tapajuntas Arcansas son una línea de perfiles diseñados para cubrir con elegancia cualquier imperfección en el suelo debido al corte o instalación entre suelos de diferentes materiales como cerámica, parquet o moqueta. Ofrecidos en diferentes materiales y acabados, se realizan en versión curva o plana. La amplia gama se puede combinar con los acabados de los perfiles de revestimiento. La diversidad de los materiales utilizados hace que estos perfiles sean utilizables tanto en contextos residenciales como públicos.

## Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Facilità di applicazione (con viti o colla/adesivo)
- Scarsa manutenzione
- Abbinabili alla gamma di profili per rivestimento e profili fai da te
- Ampia gamma di colori

## Strong points:

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Can be matched with covering profiles and DIY profiles
- Wide range of colours

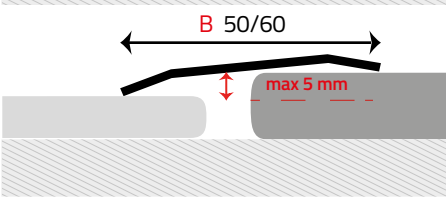

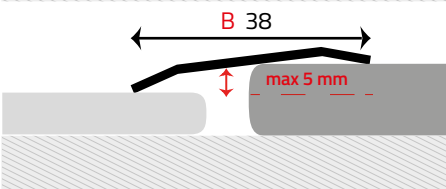

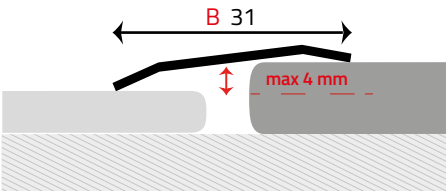

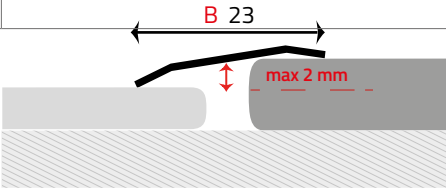

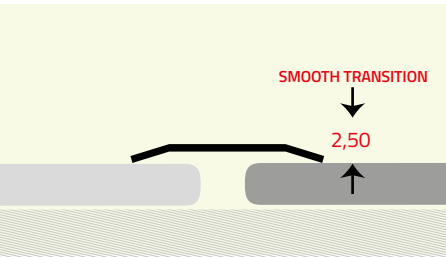

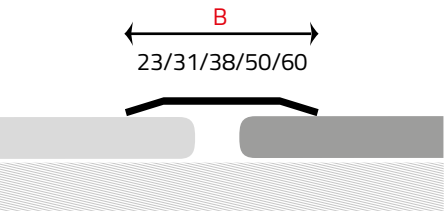

## Avantages:

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Leur application permet l'utilisation de différents sols
- Facile à appliquer (avec vis ou colle/adhésif)
- Faible entretien
- Peut être combiné avec la gamme de profilés de revêtement et de profilés de bricolage
- Large gamme de couleur

## Ventajas:

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Su aplicación permite el uso de diferentes suelos
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Se puede combinar con la gama de perfiles de revestimiento y perfiles de bricolaje
- Amplia gama de colores

# Giunti decorativi

Deco trimps/ Joints décoratifs/ Juntas decorativas

Il Giunto decorativo è un prodotto progettato per una giunzione ottimale di pavimenti di differente materiale o pavimenti di diversa natura e spessore e per nascondere le imperfezioni perimetrali. Il prodotto possiede anche una funzione estetica e decorativa grazie alla varietà di materiali degli articoli presenti in gamma, abbinabili alle finiture dei profili per il rivestimento e profili per fai da te. La struttura del giunto garantisce una perfetta resistenza sia ai movimenti di compressione che di trazione del pavimento. Finiture disponibili: Acciaio Inox aisi 304, ottone, alluminio

## Vantaggi:

- Altamente decorativo
- Resistenza ai graffi
- Resistenti al calpestio
- Scarsa manutenzione
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Ampia gamma di colori

Arcansas' decorative trims are designed for the best junction of floorings from different material or thickness, thanks to their ability to hide perimetrical imperfections. The result is not only functional, but also beautiful thanks to the wide range of materials. All decorative trims can be matched with covering profiles and DIY profiles of the same finishing. Available finishings: AISI 304 Stainless-steel, brass-aluminium

## Strong points:

- Highly decorative
- Resistant to foot traffic
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Le joint décoratif est un produit conçu pour la jonction optimale des sols de différents matériaux ou de sols de nature et d'épaisseur différente ainsi que pour masquer les imperfections du périmètre. Le produit facile à appliquer (avec vis ou colle/adhésif) a également une fonction esthétique et décorative grâce à la variété des matériaux des articles de la gamme qui peuvent être combinés avec les finitions des profilés pour le revêtement et des profilés pour le bricolage. La structure du joint garantit une résistance parfaite aux mouvements de compression et de traction du sol. Finitions disponibles : acier inoxydable AISI 304, laiton, aluminium

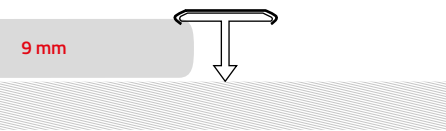

## Avantages:

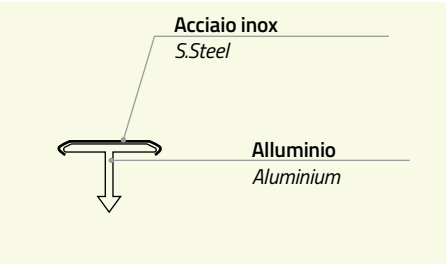

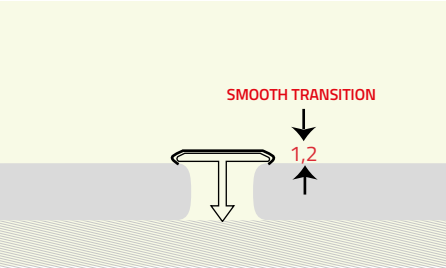

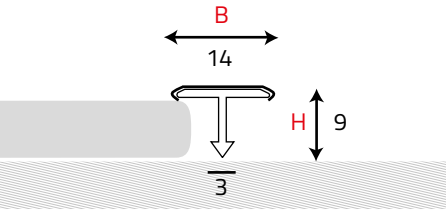

- Très décoratif
- Résistance aux rayures
- Résistant au piétinement
- Faible entretien
- Leur application permet l'utilisation de différents sols
- Large gamme de couleur

La junta decorativa es un producto diseñado para una precisa junta de suelos de diferentes materiales o suelos de diferentes naturaleza y espesor y para disimular imperfecciones perimetrales. El producto también tiene una función estética y decorativa gracias a la variedad de materiales de los artículos de la gama, que se pueden combinar con los acabados de los perfiles para el revestimiento y perfiles para bricolaje. La estructura de la junta garantiza una perfecta resistencia tanto a los movimientos de compresión como a los de tracción del suelo. Acabados disponibles: acero inoxidable AISI 304, latón, aluminio

## Ventajas:

- Altamente decorativo
- resistente al tráfico peatonal
- resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

# Terminali

Sloped cover strips/ Terminaisons/ Terminales

I profili Terminali Arcansas, sovrapposa e sottoposa sono progettati per eliminare qualsiasi dislivello che si può creare al momento della posa di un pavimento nuovo su uno vecchio. Progettato con sezione obliqua, è in grado di colmare qualsiasi gap minimizzando il rischio di incidenti e armonizzare le differenze fra diverse pavimentazioni di diversa finitura. la sua funzione di raccordo tra pavimenti di diversa natura e spessore permette di coprire eventuali scheggiature dei bordi in ceramica e tagli imperfetti dei pavimenti in legno. finiture disponibili: acciaio inox aisi 304, ottone, alluminio.

#### Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- Scarsa manutenzione
- Possibilità di applicazioni: con viti e/ o autoadesivo inclusi)
- Diversi colori diponibili

Arcansas' end profiles, under-tile and over-tile, are conceived to fix any difference in level caused by the application of a new flooring on an old one. Designed with an oblique section this product can manage to fill any gap in order to minimize the risk of accidents but also to nicely link different floorings of different finishings. Its joint function leads to cover any chipping in the tiles edges and the imperfections in wood cutting.

#### Strong points:

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Les profilés de terminaison Arcansas, de sur-pose et de sous-pose sont conçus pour éliminer toute irrégularité pouvant être créée lors de la pose d'un nouveau sol sur un ancien. Conçu avec une section oblique, il comble tout espace en minimisant les risques d'accident et en harmonisant les différences entre les sols aux finitions diverses. Sa fonction de liaison entre des planchers de nature et d'épaisseur différente permet de couvrir tout ébrèchement des bords en céramique et coupes imparfaites des planchers en bois. Finitions disponibles : acier inoxydable aisi 304, laiton, aluminium.

#### Avantages:

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Faible entretien
- Facile à appliquer (avec vis ou colle/adhésif inclus)
- Différentes couleurs disponibles

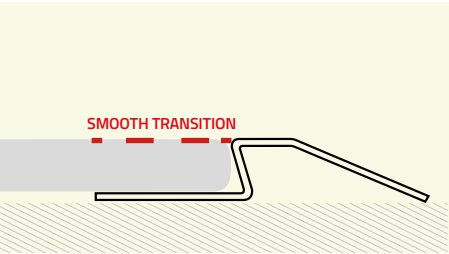

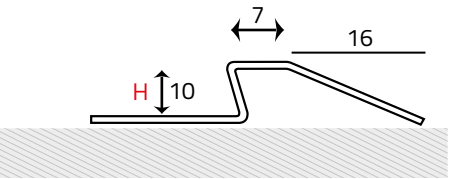

Los perfiles terminales Arcansas, sobrepuestos y contrapuestos, están diseñados para eliminar los desniveles que se puedan crear al colocar un nuevo suelo sobre uno antiguo. Diseñado con una sección oblicua, es capaz de llenar cualquier hueco minimizando el riesgo de accidentes y armonizando las diferencias entre distintos suelos de distintos acabados. Su función de unión entre suelos de diferente naturaleza y espesores permite tapar cualquier desportillado de los cantos cerámicos y cortes imperfectos de los suelos de madera. acabados disponibles: acero inoxidable aisi 304, latón, aluminio.

#### Ventajas:

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

# OTTONE

*Stainless steel/ Acier inoxydable/ Acero inoxidable*

**Estetica:** l'ottone ha un aspetto elegante e raffinato, con una finitura lucida che lo rende adatto per ambienti di alta gamma.

**Durabilità:** l'ottone è un materiale resistente all'usura e all'abrasione, il che lo rende ideale per i profili per il suolo che devono resistere all'usura quotidiana.

**Resistenza alla corrosione:** l'ottone ha una buona resistenza alla corrosione, il che lo rende adatto per i profili per il suolo utilizzati in ambienti umidi o esposti all'acqua.

**Facilità di lavorazione:** l'ottone è facile da lavorare e può essere piegato, tagliato e forato per adattarsi a qualsiasi forma o dimensione richiesta.

**Bassa manutenzione:** l'ottone non richiede molta manutenzione, poiché non si ossida facilmente e non richiede la verniciatura periodica come altri materiali.

**Conduttività termica:** l'ottone ha una buona conduttività termica, il che lo rende adatto per i profili per il suolo utilizzati in ambienti dove è importante mantenere la temperatura costante, come in ambienti climatizzati o riscaldati.

**Aesthetic:** Brass has an elegant and refined appearance, with a shiny finish that makes it suitable for high-end environments.

**Durability:** Brass is a material that is resistant to wear and abrasion, making it ideal for floor profiles that need to withstand daily use.

**Corrosion resistance:** Brass has good corrosion resistance, making it suitable for floor profiles used in damp or water-exposed environments.

**Ease of processing:** Brass is easy to work with and can be bent, cut, and drilled to fit any shape or size required.

**Low maintenance:** Brass does not require much maintenance as it does not easily rust and does not require periodic painting like other materials.

**Thermal conductivity:** Brass has good thermal conductivity, making it suitable for floor profiles used in environments where it is important to maintain a constant temperature, such as air-conditioned or heated environments.

**Esthétique:** Le laiton a un aspect élégant et raffiné, avec une finition brillante qui le rend adapté aux environnements haut de gamme.

**Durabilité:** Le laiton est un matériau résistant à l'usure et à l'abrasion, ce qui le rend idéal pour les profils de sol qui doivent résister à une utilisation quotidienne.

**Résistance à la corrosion :** Le laiton a une bonne résistance à la corrosion, ce qui le rend adapté aux profils de sol utilisés dans des environnements humides ou exposés à l'eau.

**Facilité de traitement :** Le laiton est facile à travailler et peut être plié, coupé et percé pour s'adapter à n'importe quelle forme ou taille requise.

**Faible entretien :** Le laiton ne nécessite pas beaucoup d'entretien car il ne rouille pas facilement et ne nécessite pas de peinture périodique.

**Resistencia a la corrosión:** el latón es resistente a la corrosión, lo que lo hace ideal para perfiles de suelo utilizados en ambientes húmedos o expuestos al agua, como baños, cocinas o áreas externas.

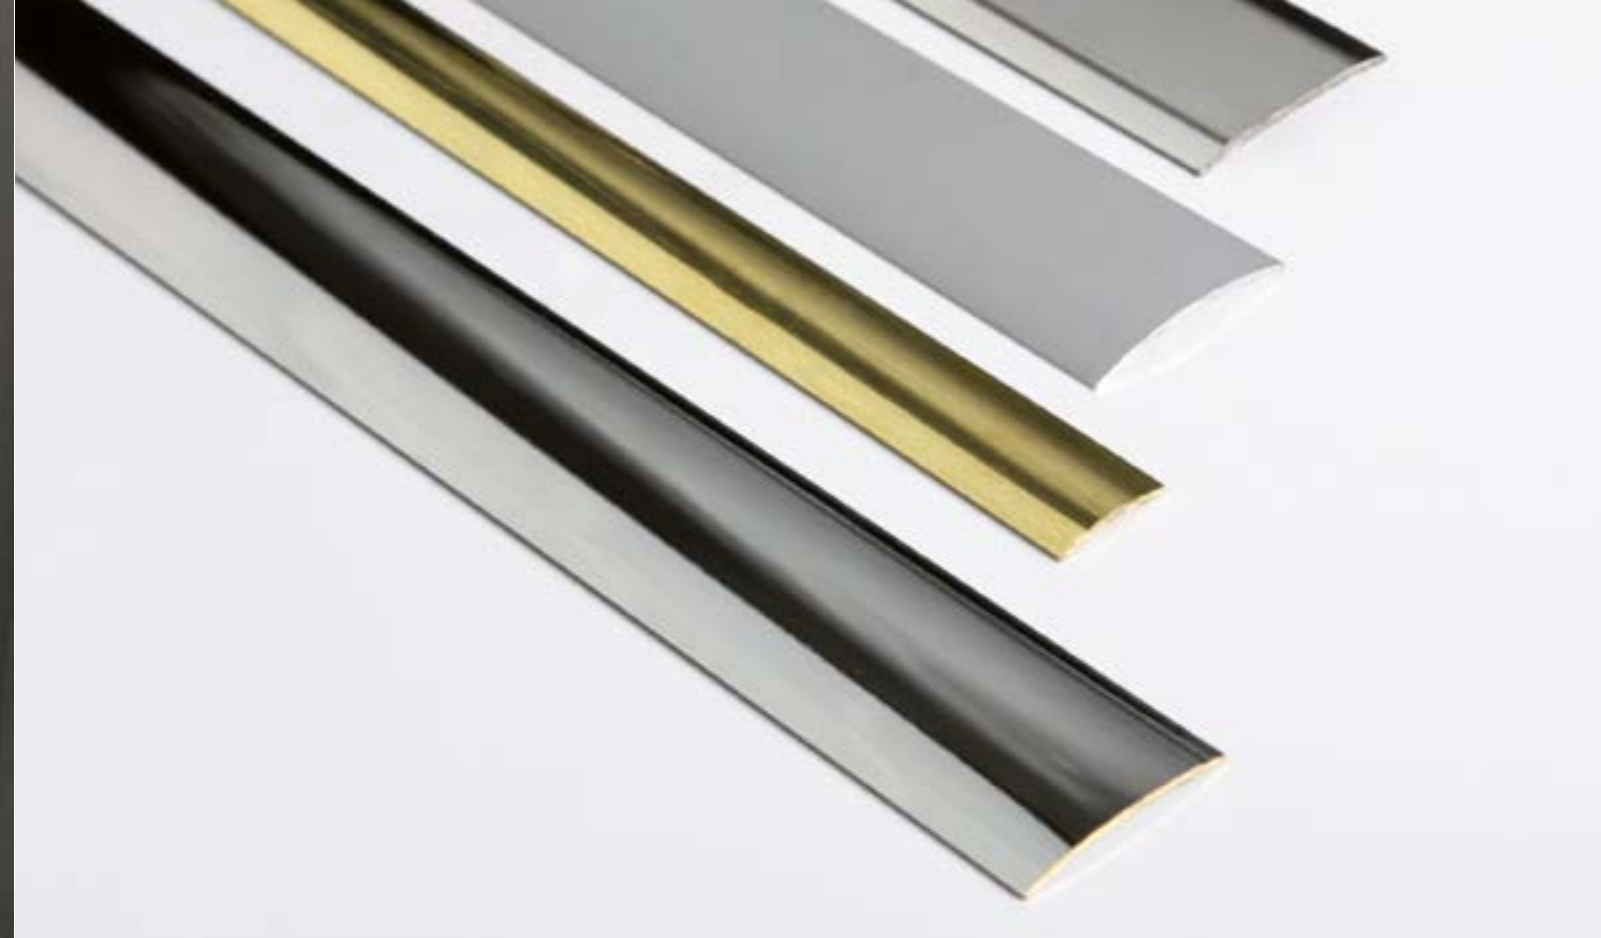

**Durabilidad:** el latón es resistente al desgaste y la abrasión, lo que lo convierte en un material ideal para perfiles de suelo que deben resistir el desgaste diario.

**Estética:** el latón tiene una apariencia elegante y atractiva, lo que lo convierte en un material ideal para perfiles de suelo que deben adaptarse a diferentes estilos y diseños de interiores.

**Conductividad térmica:** el latón tiene una buena conductividad térmica, lo que lo convierte en un material ideal para perfiles de suelo utilizados en sistemas de calefacción radiante.

**Facilidad de conformado:** el latón es fácil de conformar y se puede moldear en diferentes formas y tamaños para adaptarse a las necesidades de diseño.

**Valor estético:** el latón es un material atractivo y de alta calidad que agrega valor a cualquier proyecto de diseño de interiores.

# Coprigiunti

## Covers/ Couvre-joints/Tapas de juntas

I Coprigiunti Arcansas sono una linea di profili progettata per coprire in modo elegante eventuali imperfezioni del pavimento, dovute al taglio o alla posa fra pavimenti di differenti materiali come ceramica, parquet o moquette. Offerti in differenti materiali e finiture, sono realizzati in versione raccordata o planare. La vasta gamma è abbinabile alle finiture dei profili per il rivestimento. La diversità dei materiali impiegati, rendono tali profili utilizzabili sia in ambito civile che pubblico.

Arcansas' wide range of covering profiles is specifically designed to create a pleasing result to fix flooring imperfections due to the cuttings and the installations of different kind of floorings such as tiles, parquet or moquette. The best solution comes not only from the aesthetic design given by the joint fuction, but it is also conceived for a smooth passage thanks to the planar-shape. All finishing can be matched with the finishings of the rest of covering profiles. Arcansas proposes different materials to give flexibility in usage: these profiles can be used in both public and private settings.

Les couvre-joints Arcansas sont une gamme de profilés conçus pour couvrir avec élégance les imperfections du sol, dues à la coupe ou à l'installation entre les sols de différents matériaux tels que la céramique, le parquet ou la moquette. Proposés en différents matériaux et finitions, ils sont réalisés en version articulée ou plate. La large gamme peut être combinée avec les finitions des profilés de revêtement. La diversité des matériaux utilisés rend ces profilés utilisables à la fois dans des contextes civils et publics.

Los tapajuntas Arcansas son una línea de perfiles diseñados para cubrir con elegancia cualquier imperfección en el suelo debido al corte o instalación entre suelos de diferentes materiales como cerámica, parquet o moqueta. Ofrecidos en diferentes materiales y acabados, se realizan en versión curva o plana. La amplia gama se puede combinar con los acabados de los perfiles de revestimiento. La diversidad de los materiales utilizados hace que estos perfiles sean utilizables tanto en contextos residenciales como públicos.

### Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Facilità di applicazione(con viti o colla/adesivo)
- Scarsa manutenzione
- Abbinabili alla gamma di profili per rivestimento e profili fai da te
- Ampia gamma di colori

### Strong points:

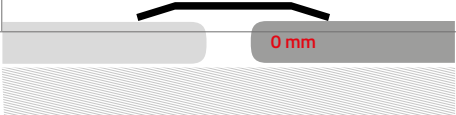

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Can be matched with covering profiles and DIY profiles
- Wide range of colours

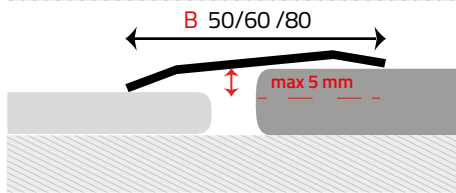

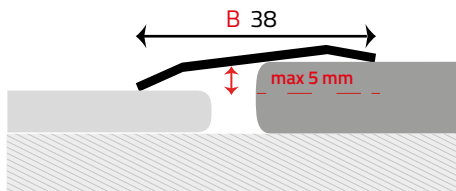

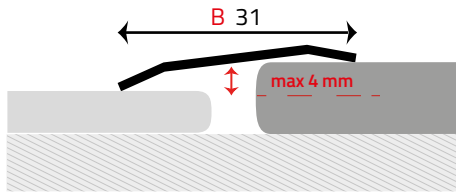

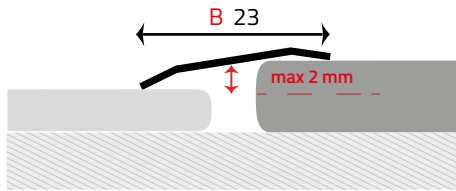

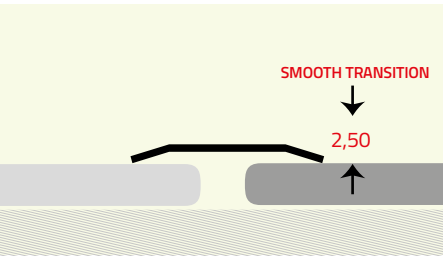

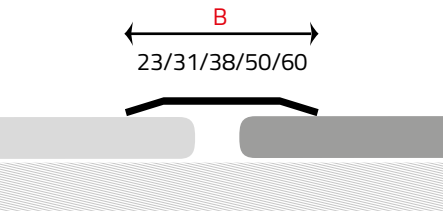

### Avantages:

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Leur application permet l'utilisation de différents sols
- Facile à appliquer (avec vis ou colle/adhésif)
- Faible entretien
- Peut être combiné avec la gamme de profilés de revêtement et de profilés de bricolage
- Large gamme de couleur

### Ventajas:

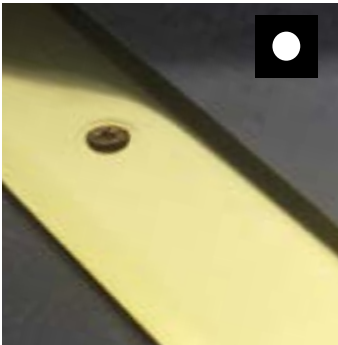

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Su aplicación permite el uso de diferentes suelos
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Se puede combinar con la gama de perfiles de revestimiento y perfiles de bricolaje
- Amplia gama de colores

# Giunti decorativi

Deco trimps/ Joints décoratifs/ Juntas decorativas

Il Giunto decorativo è un prodotto progettato per una giunzione ottimale di pavimenti di differente materiale o pavimenti di diversa natura e spessore e per nascondere le imperfezioni perimetrali. Il prodotto possiede anche una funzione estetica e decorativa grazie alla varietà di materiali degli articoli presenti in gamma, abbinabili alle finiture dei profili per il rivestimento e profili per fai da te. La struttura del giunto garantisce una perfetta resistenza sia ai movimenti di compressione che di trazione del pavimento. Finiture disponibili: Acciaio Inox aisi 304, ottone, alluminio

## Vantaggi:

- Altamente decorativo
- Resistenza ai graffi
- Resistenti al calpestio
- Scarsa manutenzione
- La loro applicazione consente l'utilizzo di diversi pavimenti
- Ampia gamma di colori

Arcansas' decorative trims are designed for the best junction of floorings from different material or thickness, thanks to their ability to hide perimetrical imperfections. The result is not only functional, but also beautiful thanks to the wide range of materials. All decorative trims can be matched with covering profiles and DIY profiles of the same finishing. Available finishings: AISI 304 Stainless-steel, brass-aluminium

## Strong points:

- Highly decorative
- Resistant to foot traffic
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Le joint décoratif est un produit conçu pour la jonction optimale des sols de différents matériaux ou de sols de nature et d'épaisseur différente ainsi que pour masquer les imperfections du périmètre. Le produit facile à appliquer (avec vis ou colle/adhésif) a également une fonction esthétique et décorative grâce à la variété des matériaux des articles de la gamme qui peuvent être combinés avec les finitions des profilés pour le revêtement et des profilés pour le bricolage. La structure du joint garantit une résistance parfaite aux mouvements de compression et de traction du sol. Finitions disponibles : acier inoxydable AISI 304, laiton, aluminium

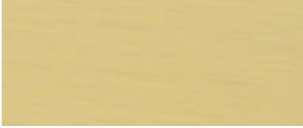

## Avantages:

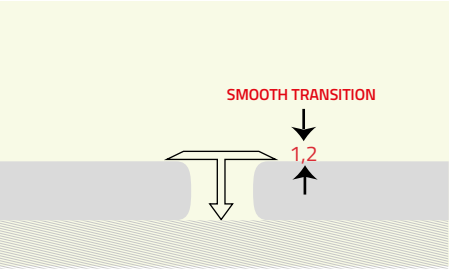

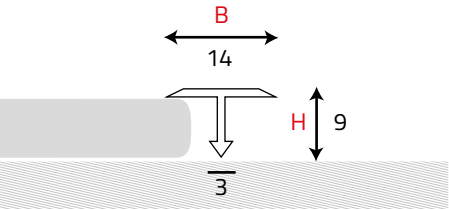

- Très décoratif
- Résistance aux rayures
- Résistant au piétinement
- Faible entretien
- Leur application permet l'utilisation de différents sols
- Large gamme de couleur

La junta decorativa es un producto diseñado para una precisa junta de suelos de diferentes materiales o suelos de diferentes naturaleza y espesor y para disimular imperfecciones perimetrales. El producto también tiene una función estética y decorativa gracias a la variedad de materiales de los artículos de la gama, que se pueden combinar con los acabados de los perfiles para el revestimiento y perfiles para bricolaje. La estructura de la junta garantiza una perfecta resistencia tanto a los movimientos de compresión como a los de tracción del suelo. Acabados disponibles: acero inoxidable AISI 304, latón, aluminio

## Ventajas:

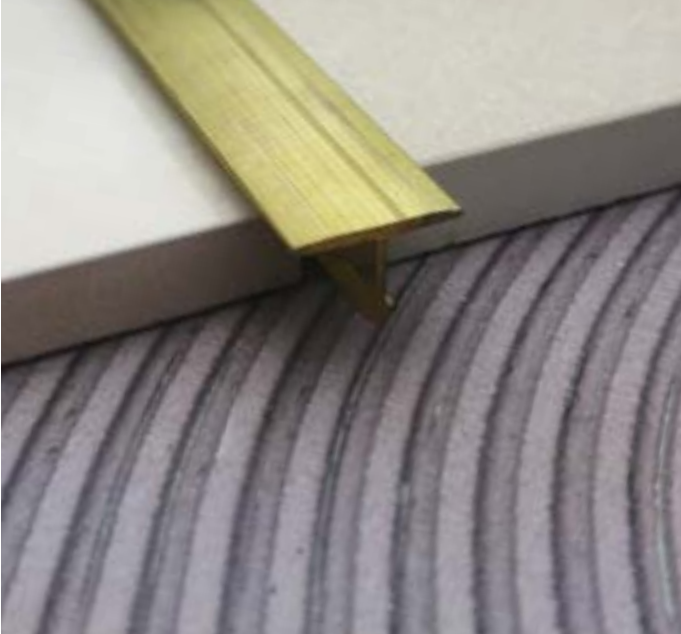

- Altamente decorativo
- resistente al tráfico peatonal
- resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

Profilo blisterato

*Profile with blister*

# Terminali

Sloped cover strips/ Terminaisons/ Terminales

I profili Terminali Arcansas, sovrapposa e sottoposa sono progettati per eliminare qualsiasi dislivello che si può creare al momento della posa di un pavimento nuovo su uno vecchio. Progettato con sezione obliqua, è in grado di colmare qualsiasi gap minimizzando il rischio di incidenti e armonizzare le differenze fra diverse pavimentazioni di diversa finitura. La sua funzione di raccordo tra pavimenti di diversa natura e spessore permette di coprire eventuali scheggiature dei bordi in ceramica e tagli imperfetti dei pavimenti in legno. finiture disponibili: acciaio inox aisi 304, ottone, alluminio.

## Vantaggi:

- Altamente decorativi
- Resistenti al calpestio
- Resistenza ai graffi
- Scarsa manutenzione
- Possibilità di applicazioni: con viti e/ o autoadesivo inclusi)
- Diversi colori disponibili

Arcansas' end profiles, under-tile and over-tile, are conceived to fix any difference in level caused by the application of a new flooring on an old one. Designed with an oblique section this product can manage to fill any gap in order to minimize the risk of accidents but also to nicely link different floorings of different finishings. Its joint function leads to cover any chipping in the tiles edges and the imperfections in wood cutting.

## Strong points:

- Highly decorative
- Resistant to foot traffic and scratches
- Applicable to different kind of floorings
- Easy application thanks to screws or glue/adhesive tape
- Little maintenance is required
- Wide range of colours

Les profilés de terminaison Arcansas, de sur-pose et de sous-pose sont conçus pour éliminer toute irrégularité pouvant être créée lors de la pose d'un nouveau sol sur un ancien. Conçu avec une section oblique, il comble tout espace en minimisant les risques d'accident et en harmonisant les différences entre les sols aux finitions diverses. Sa fonction de liaison entre des planchers de nature et d'épaisseur différente permet de couvrir tout ébrèchement des bords en céramique et coupes imparfaites des planchers en bois. Finitions disponibles : acier inoxydable aisi 304, laiton, aluminium.

## Avantages:

- Très décoratif
- Résistant au piétinement
- Résistance aux rayures
- Faible entretien
- Facile à appliquer (avec vis ou colle/adhésif inclus)
- Différentes couleurs disponibles

Los perfiles terminales Arcansas, sobrepuestos y contrapuestos, están diseñados para eliminar los desniveles que se puedan crear al colocar un nuevo suelo sobre uno antiguo. Diseñado con una sección oblicua, es capaz de llenar cualquier hueco minimizando el riesgo de accidentes y armonizando las diferencias entre distintos suelos de distintos acabados. Su función de unión entre suelos de diferente naturaleza y espesores permite tapar cualquier desportillado de los cantos cerámicos y cortes imperfectos de los suelos de madera. Acabados disponibles: acero inoxidable aisi 304, latón, aluminio.

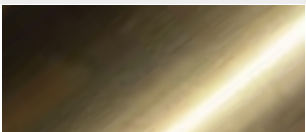

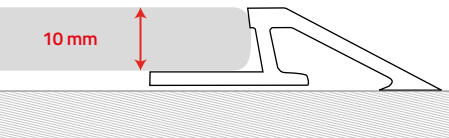

## Ventajas:

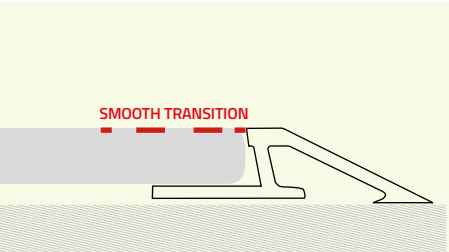

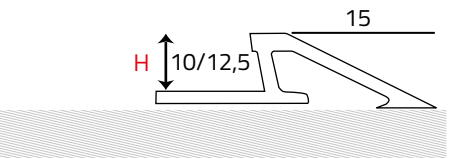

- Altamente decorativo
- Resistente al tráfico peatonal
- Resistencia al rayado
- Fácil aplicación (con tornillos o pegamento/adhesivo)
- Se necesita de poco mantenimiento
- Amplia gama de colores

# Battiscopa

Skirtings/ Plinthe/Rodapié

Realizzati e progettati per una facile "posa fai da te", i battiscopa arcansas sono flessibili e resistenti, impermeabili e antimuffa. Disponibili anche nella versione adesiva.

#### Vantaggi:

- Altamente decorativi
- Facilità di applicazione con adesivo o silicone
- Perfettamente abbinabili con profili per laminati e parquet e profili per rivestimento/fai da te in alluminio effetto pietra
- Funzione di protezione per la parete
- Scarsa manutenzione

Designed and produced for an easy DIY application, Arcansas' skirting board are flexible and resistant, waterproof and anti-mold. The adhesive version of these products is available.

#### Strong points:

- Highly decorative
- Easy to apply with adhesive or silicon
- Match perfectly with profiles for laminate floorings and parquet, stone-effect covering profiles and DIY profiles
- Protect the wall
- Little maintenance is required

Fabriquées et conçues pour une installation facile à faire soi-même, les plinthes Arcansas sont souples et résistantes, étanches et anti-moisissures. Egalement disponible en version adhésive.

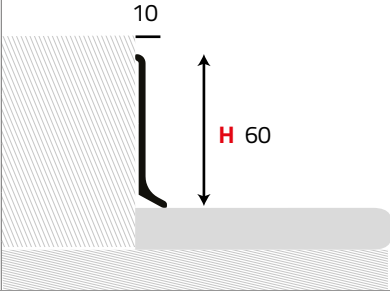

#### Avantages:

- Très décoratives
- Application facile avec adhésif ou silicone
- Parfaitement combinable avec des profilés pour stratifié et parquet et des profilés de revêtement/bricolage en aluminium effet pierre
- Fonction de protection murale
- Faible entretien

Fabricados y diseñados para una fácil instalación "hágalo usted mismo", los rodapiés arcansas son flexibles y resistentes, impermeables y antimoho. También disponible en versión adhesiva.

#### Ventajas:

- Altamente decorativo
- Fácil aplicación con adhesivo o silicona.
- Perfectamente combinable con perfiles para laminados y parquet y perfiles para revestimiento/bricolaje en aluminio con efecto piedra
- Función de protección de la pared
- Se necesita de poco mantenimiento

# Nastro Antisdrucchiolo

Anti-Slip Adhesive Tape/ Antidérapant/ Cinta Adhesiva Antideslizante

## Antisdrucchiolo :

I Nastri Antiscivolo autoadesivi sono la risposta più efficace, semplice ed economica per sanare superfici sdrucciolevoli eliminando il rischio di pericolose cadute per scivolamento . Un rischio che andrebbe valutato con attenzione sia in ambienti domestici, che industriali. Le superfici a rischio più frequenti in casa sono ad esempio le vasche da bagno o le docce. In casa o in esterni superfici potenzialmente pericolose sono le scale . I modelli si dividono per uso calzati o calzati.  
Colori : nero, bianco, trasparente, segnaletico.

## Vantaggi :

Utilizzabile in interni ed esterni su superfici lisce, non porose. Facile, veloce, pulito, economico.

## Anti-slip adhesive tape :

Self-adhesive anti-slip tapes are the most effective, simple and economical answer to remedy slippery surfaces, eliminating the risk of dangerous falls due to slipping. A risk that should be carefully evaluated in both domestic and industrial environments. The most risky indoor surfaces are, for example, bathtubs or showers as well as stairs that are dangerous surfaces both for indoor and outdoor. Our range also includes item suitable for barefoot.  
Colours: black, white, transparent, warning tape.

## Advantages :

Can be used indoors and outdoors on smooth, non-porous surfaces. Easy, fast, clean, cheap.

## Antidérapant :

Les rubans antidérapants auto-adhésifs sont la réponse la plus efficace, simple et économique pour remédier aux surfaces glissantes, éliminant le risque de chutes dangereuses dues au glissement. Un risque qui doit être soigneusement évalué dans les environnements domestiques et industriels. Les surfaces à risque les plus fréquentes dans la maison sont, par exemple, les baignoires ou les douches. À la maison ou à l'extérieur, les surfaces potentiellement dangereuses sont des escaliers. Les modèles sont divisés par utilisation pieds nus ou chaussés. Couleurs: noir, blanc, transparent, signalisation.

## Les avantages :

Peut être utilisé à l'intérieur et à l'extérieur sur des surfaces lisses et non poreuses. Facile, rapide, propre, pas cher.

## Cinta Adhesiva Antideslizante :

Las cintas antideslizantes auto-adhesivas son la respuesta más eficaz, simple y económica para corregir superficies resbaladizas, eliminando el riesgo de caídas peligrosas debido al deslizamiento. Un riesgo que debe evaluarse cuidadosamente sea en entornos domésticos que industriales. Las superficies de riesgo más frecuentes en el hogar son, por ejemplo, bañeras o duchas. En el hogar o al aire libre, las superficies potencialmente peligrosas son las escaleras. Los modelos se dividen por uso descalzo o calzado. Colores: negro, blanco, transparente, señalización.

## Ventajas :

Se puede usar en interiores y exteriores en superficies lisas, no porosas. Fácil, rápido, limpio y económico.

# Alluminio Anodizzato Satinato

*Anodised Satin Alu/ Alu Anodisé Satiné/ Alu Anodizado Satinado*

## Alluminio Anodizzato Satinato :

Subisce un trattamento di ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il profilo. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6000 per ottenere una colorazione uniforme dal massimo grado di finitura estetica oltre che funzionale. Colori disponibili : argento oro e nero satinati.

## Satin Anodised Aluminum :

The aluminum profile undergoes an anodic oxidation treatment by immersion in electrolytic tanks first and subsequently in colour tanks to create a protective layer that protects the profile. For the highest quality of protection, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. Arcansas uses the 6000 alloy to obtain a uniform colouring with the highest degree of aesthetic as well as functional finish. Available satin colours: silver, gold and black.

## Aluminium Anodisé Satiné :

La transformation de ce matériau commence par sa plongée dans des cuves électrolytiques qui en permettent l'oxydation anodique. Dans la phase suivante les produits passent dans des cuves de peinture. Dans les dernières cuves de ce long procédé la couleur est fixée et une couche protectrice qui protège le profilé est créée. L'épaisseur du traitement Arcansas est de 10 à 15 micron (selon la couleur) pour garantir une protection optimale. Afin d'obtenir une coloration uniforme Arcansas utilise une ligue 6000, qui donne au produit une finition esthétique maximale mais aussi fonctionnelle. Couleurs disponibles : argent, or, noir.

## Aluminio Anodizado Satinado :

Se somete a un tratamiento de oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el perfil. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm según el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6000 para obtener una coloración uniforme con el más alto grado de acabado estético y funcional. Colores disponibles: plata, oro y negro satinado.

## Vantaggi :

Facilmente lavorabili grazie alla duttilità di questa lega. Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale. Elevata resistenza ai graffi (non propria dell'alluminio naturale). Adatto per interni ed esterni. Riciclabile nell'alluminio.

## Advantages :

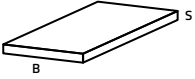

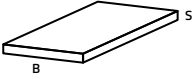

Easily workable thanks to the ductility of this alloy. High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum. High scratch resistance. Suitable for indoors and outdoors. Recyclable.

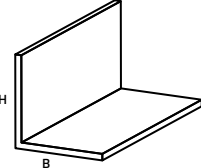

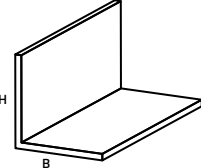

## Les avantages :

Facile à utiliser grâce à la ductilité conférée par la ligue 6000. Résistance à la corrosion acide, saline et aux intempéries (majeure par rapport aux profilés en aluminium naturel). Adaptables à l'intérieur et extérieur. Aluminium 100% recyclable.

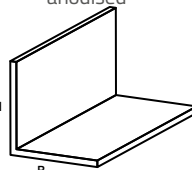

## Ventajas :

Fácilmente mecanizable gracias a la ductilidad de esta aleación. Elevado aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural. Alta resistencia al rayado. Adecuado para interiores y exteriores. Reciclabile en el aluminio.

# Alluminio Anodizzato Lucido

Anodised Polished Alu/ Alu Anodisé Poli/ Alu Anodizado Brillo

## Alluminio Anodizzato Lucido :

Prima di poter essere anodizzato, subisce un trattamento meccanico di lucidatura a specchio per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura brillante a specchio, altamente decorativa. Viene sottoposto all'ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 5 a 10µm secondo il tipo di colore per la massima qualità di brillantezza. Arcansas impiega la lega 6063 per ottenere una colorazione brillante ed uniforme dal massimo grado di finitura estetica oltre che funzionale. Colori disponibili : similcromo, ramato, titanio, similottone.

## Vantaggi :

Altamente decorativo.  
Facilmente lavorabile grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all'alluminio naturale.  
Buona resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell'alluminio.

## Anodised Polished Aluminum :

Before being anodised, it undergoes a mechanical mirror polishing treatment to eliminate any imperfections typical of the extrusion process and give the profile a highly decorative mirror finish. It is then dipped in the electrolytic tanks for anodic oxidation and subsequently in the colour tanks to create a protective layer that protects the profile. For the maximum quality of brilliance, Arcansas guarantees a treatment thickness of 5 to 10 µm depending to the colour type. Arcansas uses alloy 6063 to obtain a bright and uniform colouring with the highest degree of aesthetic as well as functional finish.  
Available colours: chrome-effect, copper, titanium and brass-effect.

## Advantages :

Highly decorative.  
Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum.  
Good scratch resistance (not typical of natural aluminum).  
Suitable for indoors and outdoors.  
Recyclable.

## Aluminium Anodisé Poli :

Avant d'être anodisé, il subit un traitement mécanique de polissage effet miroir pour éliminer les imperfections typiques au processus d'extrusion et donner au profilé une finition miroir très décorative. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur celle-ci sera ensuite fixée grâce au passage dans les derniers réservoirs de ce long processus d'anodisation, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 5 à 10µm selon le type de couleur pour une qualité de brillance maximale. Arcansas utilise l'alliage 6063 pour obtenir une coloration brillante et uniforme au plus grand degré d'esthétique tout en étant fonctionnelle. Couleurs disponibles: effet chrome, cuivre, titane, effet laiton.

## Les avantages :

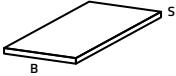

Très décoratif.  
Facile à travailler grâce à la ductilité de cet alliage.  
Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel.  
Bonne résistance aux rayures (non typique de l'aluminium naturel).  
Convient pour l'intérieur et l'extérieur.  
Recyclable en aluminium.

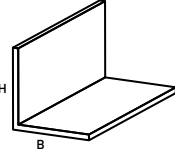

## Aluminio Anodizado Brillo :

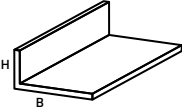

Antes de ser anodizado, se somete a un tratamiento mecánico de pulido espejo para eliminar las imperfecciones típicas del proceso de extrusión y dar al perfil un acabado brillante espejo, muy decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en los tanques del color que luego se fija en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 5 a 10 µm según el tipo de color para obtener la máxima calidad de brillo. Arcansas utiliza la aleación 6063 para obtener una coloración brillante y uniforme con el más alto grado de acabado estético además que funcional. Colores disponibles: aspecto cromo, cobreado, titanio, aspecto latón.

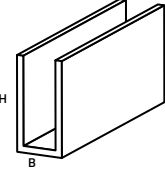

## Ventajas :

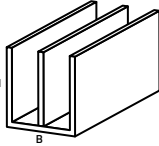

Altamente decorativo.  
Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Buena resistencia al rayado (no es típico del aluminio natural).  
Adecuado para interiores y exteriores.  
Reciclabile en el aluminio.

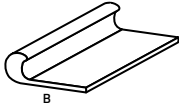

| PIATTO                                                                            |                                                                                   | Caratteristiche - Specifications: |                 |               |        |        |           |  |

# Alluminio Anodizzato Spazzolato

## Anodised Brushed Alu/Alu Anodisé Brossé/ Alu Anodizado Cepillado

**Alluminio Anodizzato Spazzolato :**  
Prima di poter essere anodizzato, subisce un trattamento meccanico di speciale spazzolatura in acqua per eliminare ogni imperfezione tipica del processo di estrusione e conferire al profilo una finitura spazzolata e dai riflessi lucidi , altamente decorativa. Viene sottoposto all' ossidazione anodica per immersione in vasche elettrolitiche e successivamente nelle vasche del colore che viene poi fissato nelle ultime vasche del lungo processo anodico, dando vita ad uno strato protettivo che protegge il colore. Arcansas garantisce uno spessore del trattamento da 10 a 15 µm secondo il tipo di colore per la massima qualità di protezione. Arcansas impiega la lega 6060 per ottenere una colorazione spazzolata e dai riflessi variegati per il massimo grado di finitura estetica oltre che funzionale. Colori disponibili : argento, ramato, titanio, nero.

**Vantaggi :**  
Altamente decorativo.  
Facilmente lavorabile grazie alla duttilità di questa lega.  
Elevato aumento della resistenza alla corrosione acida, salina o agenti atmosferici rispetto all' alluminio naturale.  
Buona resistenza ai graffi (non propria dell'alluminio naturale).  
Adatto per interni ed esterni.  
Riciclabile nell' alluminio.

**Anodised Brushed Aluminum :**  
Before being anodised, it undergoes a mechanical treatment of special brushing in water to eliminate any imperfection typical of the extrusion process and give the profile a highly decorative brushed finish with glossy reflections. It is then dipped in the electrolytic tanks for anodic oxidation and subsequently in the colour tanks to create a protective layer that protects the profile. For the maximum quality of brilliance, Arcansas guarantees a treatment thickness of 10 to 15 µm depending to the colour type. For the maximum degree of aesthetic as well as functional finish, Arcansas uses the alloy 6060 to obtain a brushed color and variegated reflections. Available colours: silver, copper, titanium and black.

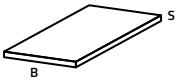

**Advantages :**  
Highly decorative.  
Easily workable thanks to the ductility of this alloy.  
High increase in resistance to acid, saline or weathering corrosion compared to natural aluminum.  
Good scratch resistance (not typical of natural aluminum).  
Suitable for indoors and outdoors.  
Recyclable.

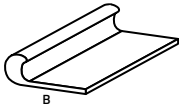

**Aluminium Anodisé Brossé :**  
Avant d'être anodisé, il subit un traitement mécanique de brossage spécial à l'eau pour éliminer toute imperfection typique du processus d'extrusion et donner au profilé une finition brossée très décorative aux reflets brillants. Il est soumis à une oxydation anodique par immersion dans des réservoirs électrolytiques puis dans les réservoirs de couleur ou celle-ci est fixée dans les derniers réservoirs de ce long processus anodique, créant une couche protectrice qui protège la couleur. Arcansas garantit une épaisseur de traitement de 10 à 15 µm selon le type de couleur pour une protection de la plus grande qualité. Arcansas utilise l'alliage 6060 pour obtenir une couleur brossée et des reflets moirés avec un degré maximal de finition esthétique et fonctionnelle. Couleurs disponibles: argent, cuivre, titane, noir.

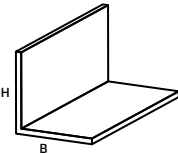

**Les avantages :**  
Très décoratif.  
Facile à travailler grâce à la ductilité de cet alliage.  
Grande augmentation de la résistance à la corrosion acide, saline ou aux intempéries par rapport à l'aluminium naturel.  
Bonne résistance aux rayures (non typique de l'aluminium naturel).  
Convient pour l'intérieur et l'extérieur.  
Recyclable en aluminium.

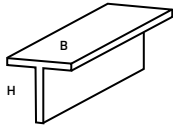

**Aluminio Anodizado Cepillado :**  
Antes de ser anodizado, se somete a un tratamiento mecánico de cepillado especial en agua para eliminar cualquier imperfección típica del proceso de extrusión y darle al perfil un acabado cepillado con reflejos brillantes altamente decorativo. Se somete a oxidación anódica por inmersión en tanques electrolíticos y posteriormente en tanques de color que luego se fijan en los últimos tanques del largo proceso anódico, creando una capa protectora que protege el color. Arcansas garantiza un espesor de tratamiento de 10 a 15 µm de acuerdo con el tipo de color para la más alta calidad de protección. Arcansas utiliza la aleación 6060 para obtener un color cepillado y reflejos variados para obtener el máximo grado de acabado estético además que funcional. Colores disponibles: plata, cobreado, titanio, negro

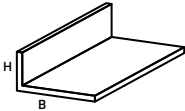

**Ventajas :**  
Altamente decorativo.  
Fácilmente mecanizable gracias a la ductilidad de esta aleación.  
Alto aumento de la resistencia a la corrosión ácida, salina o por agentes atmosféricos en comparación con el aluminio natural.  
Buena resistencia al rayado (no es típico del aluminio natural).  
Adecuado para interiores y exteriores.  
Reciclable en el aluminio.

# Alluminio Verniciato

## Powder Coated Alu/ Alu Verni/ Alu Pintado

### Alluminio Verniciato :

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche invrudite a forno, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e preverniciatura per conferire resistenza e massima adesione alla successiva verniciatura.

Arcansas garantisce uno spessore minimo di 80 micron e una brillantezza di 100 gloss. Disponibile nei colori bianco RAL 9003 e nero RAL 9005.

### Vantaggi :

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Resistente ai graffi.  
Riciclabile.

### Powder Coated Aluminum :

Obtained by extrusion and subsequent painting with electrostatic epoxy powders hardened in the oven, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting.

Arcansas guarantees a minimum thickness of 80 microns and a gloss of 100 gloss. Available in white RAL 9003 and black RAL 9005.

### Advantages :

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Scratch resistant.  
Recyclable.

### Aluminium Verni :

Obtenu par extrusion et ultérieur vernissage avec des poudres époxy électrostatiques durcies au four, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante.

Arcansas garantit une épaisseur minimale de 80 microns et un brillant de 100 brillants. Disponible en blanc RAL 9003 et noir RAL 9005.

### Les avantages :

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Résistant aux rayures.  
Recyclable.

### Aluminio Pintado :

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos endurecidos en el horno, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior.

Arcansas garantiza un espesor mínimo de 80 micras y un brillo de 100 gloss. Disponible en los colores blanco RAL 9003 y negro RAL 9005.

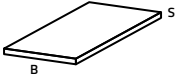

### Vantajas :

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Resistente a los arañazos.  
Reciclabile.

# Alluminio effetto pietra

Stone Finish Alu/ Alu Effet Pierre/ Alu Efecto Piedra

## Alluminio Effetto pietra :

Ottenuti per estrusione e successiva verniciatura a polveri epossidiche elettrostatiche, sono precedentemente trattati con uno speciale procedimento di sgrassaggio e preverniciatura per conferire resistenza e massima adesione alla successiva verniciatura. La nuova linea di angolari in alluminio Arcansas NATURAL TOUCH dona agli ambienti un carattere unico e ricercato, grazie alla particolare effetto materico granuloso. Queste finiture si adattano perfettamente alle nuove tendenze di arredamento delle ceramiche effetto pietra, con finiture opache e naturali. Arcansas garantisce uno spessore minimo di 80 micron, disponibile nei colori pietra naturali.

## Vantaggi :

Finitura estetica di pregio.  
Resistente ai raggi ultravioletti.  
Molto resistente ai graffi.  
Riciclabile.

## Stone Finish Aluminum :

Obtained by extrusion and subsequent painting with electrostatic epoxy powders, they are previously treated with a special degreasing and pre-painting process to give resistance and maximum adhesion to the subsequent painting. The new Arcansas NATURAL TOUCH aluminum corner line gives the rooms a unique and refined character, thanks to the particular grainy material effect. These finishes are perfectly suited to the new furnishing trends of stone effect ceramics, with matte and natural finishes. Arcansas guarantees a minimum thickness of 80 microns, available in natural stone colors.

## Advantages :

Fine aesthetic finish.  
Resistant to ultraviolet rays.  
Very resistant to scratches.  
Recyclable.

## Aluminium Effet Pierre :

Obtenus par extrusion et peinture ultérieure avec des poudres époxy électrostatiques, ils sont préalablement traités par un procédé spécial de dégraissage et de pré-peinture pour donner une résistance et une adhérence maximale à la peinture suivante. La nouvelle ligne d'angles en aluminium Arcansas NATURAL TOUCH confère aux pièces un caractère unique et raffiné, grâce à l'effet particulier du matériau granuleux. Ces finitions sont parfaitement adaptées aux nouvelles tendances d'ameublement du céramique effet pierre, avec des finitions mates et naturelles. Arcansas garantit une épaisseur minimale de 80 microns, disponible en couleurs de pierre naturelle.

## Les avantages :

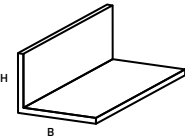

Finition esthétique de haute qualité.  
Résistant aux rayons ultraviolets.  
Très résistant aux rayures.  
Recyclable.

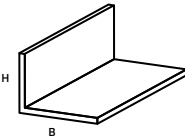

## Aluminio Efecto Piedra :

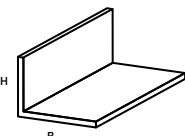

Obtenidos por extrusión y pintura sucesiva con polvos epoxídicos electrostáticos, se tratan previamente con un proceso especial de desengrasado y pre-pintura para dar resistencia y máxima adhesión a la pintura posterior. La nueva línea de ángulos en aluminio Arcansas NATURAL TOUCH le da a los espacios un carácter único y refinado, gracias al particular efecto de material granulado. Estos acabados se adaptan perfectamente a las nuevas tendencias de decoración de cerámica con efecto de piedra, con acabados mate y natural. Arcansas garantiza un espesor mínimo de 80 micras, disponible en colores de piedra natural.

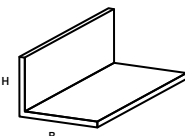

## Ventajas :

Acabado estético de alta calidad.  
Resistente a los rayos ultravioleta.  
Muy resistente a los arañazos.  
Reciclabile.

# Alluminio Naturale

## Natural Alu/ Alu Naturel/ Alu Natural

### Alluminio Naturale :

L'alluminio naturale della lega 6000 utilizzata da Arcansas è caratterizzata da una elevata resistenza naturale (al contrario dell' acciaio naturale) alla corrosione salina, acida o atmosferica. Colore : argento naturale semilucido.

### Vantaggi :

Maggior lavorabilità rispetto all'aluminio anodizzato o verniciato in quanto privo di strati aggiunti. Saldabile, verniciabile, calpestabile. Prezzo più competitivo. Riciclabile nell'alluminio.

### Natural Aluminum :

The natural aluminum of the 6000 alloy used by Arcansas is characterized by a high natural resistance (as opposed to natural steel) to saline, acid or atmospheric corrosion. Colour: semi-gloss natural silver.

### Advantages :

Greater workability than anodised or painted aluminum as it has no added layers. Weldable, paintable, walkable. More competitive price. Recyclable.

### Aluminium Naturel :

L'aluminium naturel Arcansas est obtenu par la ligue 6000, qui lui donne une haute résistance naturelle à la corrosion acide, saline et aux intempéries (au contraire de l'acier naturel). Couleurs disponibles : argent naturel.

### Les avantages :

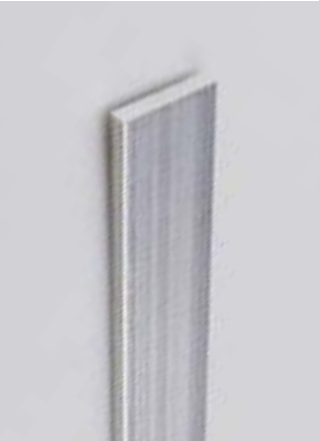

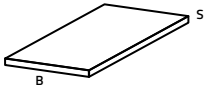

Aucune couche n'est rajoutée au profilé. Cela permet une transformation plus aisée par rapport à l'aluminium anodisé ou laqué. Possibilité de vernir ou souder le matériel. Piétiner sur ces profilés n'abime pas le matériel. Prix plus compétitif que les autres matériels. Aluminium 100% recyclable.

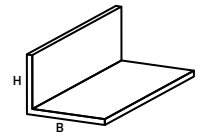

### Aluminio Natural :

El aluminio natural de la aleación 6000 utilizada por Arcansas se caracteriza por una alta resistencia natural (a diferencia del acero natural) a la corrosión salina, ácida o atmosférica. Color: plata natural semibrillante.

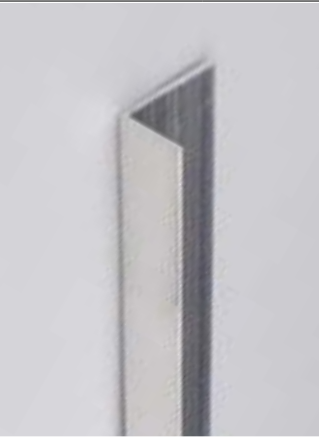

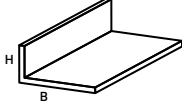

### Ventajas :

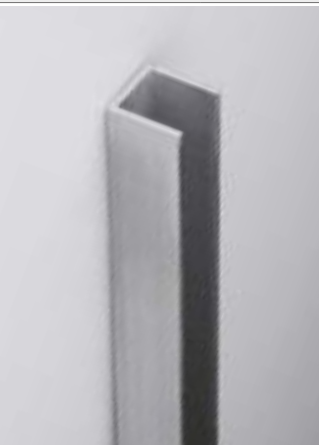

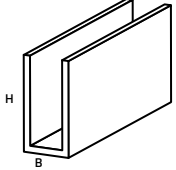

Mayor maquinabilidad que el aluminio anodizado o pintado, ya que no tiene capas añadidas. Soldable, pintable, transitable. Precio más competitivo. Reciclabile en el aluminio.

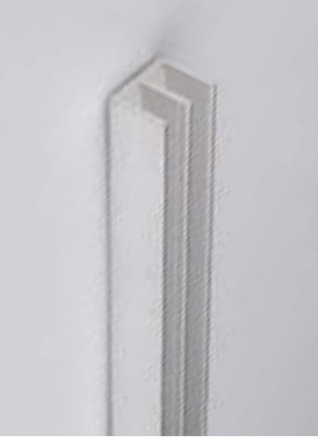

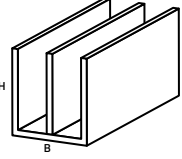

| PIATTO                                                                           |                                                                                   | Caratteristiche - Specifications: |               |        |        |           |  |  |

Profiles compatible with connections on page 185

**Alluminio Naturale Mandorlato :**  
La speciale lavorazione superficiale ottenuta per pressa rotativa, conferisce una speciale lucentezza di base e figure a rilievo con funzione antiscivolo adatte per scalini o superfici sdrucciolevoli.  
Adatto anche alla protezione degli spigoli o superfici nelle zone di passaggio.  
Colore: argento naturale lucido.

**Checkered Natural Aluminium :**  
The special surface processing obtained by rotary press gives a special basic shine and relief figures with non-slip function suitable for stairs and slippery surfaces. Also suitable for corners protection and for surfaces in transit areas.  
Color: shiny natural silver.

**Aluminium Damiers :**  
Le traitement à travers lequel la surface de ces profilés est obtenu grâce à une presse rotative. Cela donne une brillance à la base du profilé et une texture en relief apte pour escaliers ou surfaces glissantes, mais aussi pour protéger les coins ou les surfaces dans des espaces de transition.  
Couleurs disponibles : argent naturel brillant.

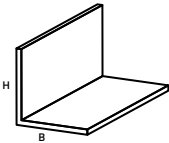

**Aluminio Ajedrez :**  
El procesamiento especial de la superficie obtenido por la prensa rotativa proporciona un especial brillo de base y figuras en relieve con función antideslizante apropiado para escalones o superficies resbaladizas. También es adecuado para proteger esquinas o superficies en áreas de tránsito.  
Color: plata natural brillante.

# Acciaio Inox e Ottone

Stainless Steel and Brass/Acier Inoxydable et Laiton/  
Acero inoxidable y latón

## Acciaio Inox 304 :

Ottenuti per profilatura nella lega più nobile disponibile oggi sul mercato grazie alla sua elevatissima inossidabilità e resistenza agli agenti meccanici e atmosferici, ha un aspetto elegante e solido. Adatto in edilizia e altamente protettivo e decorativo.

## Vantaggi :

Buona lavorabilità.  
Idoneo per interni ed esterni.  
Fornito con pellicola protettiva per la massima lavorabilità senza graffi o macchie.  
Manutenzione assente.

## 304 Stainless Steel :

Obtained by profiling in the most noble alloy available on the market today, thanks to its very high rust resistance and resistance to mechanical and atmospheric agents, it has an elegant and solid appearance. Suitable for construction and highly protective and decorative.

## Advantages :

Good workability.  
Suitable for indoors and outdoors.  
Supplied with protective film for maximum workability without scratches or stains.  
No maintenance.

## Acier Inoxydable 304 :

Obtenu par profilage dans l'alliage le plus noble disponible sur le marché aujourd'hui grâce à sa très haute résistance à la rouille et sa résistance aux agents mécaniques et atmosphériques, il a un aspect élégant et solide. Convient pour la construction, il est hautement protecteur et décoratif.

## Les avantages :

Bonne maniabilité.  
Convient pour l'intérieur et l'extérieur.  
Fourni avec un film protecteur pour une ouvrabilité maximale sans rayures ni taches.  
Aucun entretien.

## Acero Inoxidable 304 :

Obtenido por perfiladura en la aleación más noble disponible en el mercado hoy en día gracias a su elevada resistencia a la oxidación y resistencia a los agentes mecánicos y atmosféricos, tiene un aspecto elegante y sólido. Apto para construcción y altamente protector y decorativo.

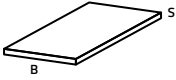

## Ventajas :

Buena mecanizabilidad.  
Adecuado para interiores y exteriores.  
Se suministra con película protectora para una máxima mecanizabilidad sin arañazos ni manchas.  
No necesita mantenimiento.

PIATTO

# Acciaio

## Natural Steel/Acier Naturel/ Acero Natural

### Acciaio Naturale :

Profili ottenuti mediante laminazione a caldo gli uni e profilatura a freddo gli altri, sono sbavati e protetti con un lieve strato di grasso protettivo atto a conservarlo nel tempo. I profili in Acciaio sono forniti in confezione trasparente e termoretratta per permetterne la maggior conservazione e il prelievo, manipolazione e trasporto senza sporcare le mani e le superfici dell'auto.

### Vantaggi :

Adatti a sopportare pesi molto maggiori dei profili in alluminio. Saldabile, zincabile verniciabile. Tagliabile con sega a ferro manuale. Riciclabile nei metalli.

### Natural Steel :

Profiles obtained by hot rolling or cold profiling process, are both deburred and protected with a light layer of protective grease to preserve it over time. The steel profiles are supplied in a transparent and thermo-retracted package to allow greater preservation of the product and to avoid getting your hands dirty during picking up and handling as well as avoid getting your car interior dirty during transportation.

### Advantages :

Suitable to withstand much greater weights than aluminum profiles. Weldable, paintable and galvanizable. Can be cut with manual iron saw. Recyclable.

### Acier Naturel :

Ces profilés sont obtenus par le laminage direct, grâce à une profiluse à froid et par l'ébavurage. Ils sont aussi protégés par une subtile couche de graisse afin d'en garantir la longue durée. Les articles se présentent dans un emballage thermo rétractable pour garantir une manipulation en sécurité à partir de l'usine jusqu'au transport en voiture.

### Les avantages :

Aptés à supporter un poids beaucoup plus grand que les profilés en aluminium. Soudable, galvanizable et peintable. Possibilité de zinguer, vernir ou souder le matériel. Recyclable.

### Acero Natural :

Perfiles obtenidos por laminación en caliente y perfiladura en frío, se desbarban y protegen con una capa ligera de grasa protectora para preservarlo en el tiempo. Los perfiles de acero se suministran en envases transparentes y termo-retraídos para permitir una mayor conservación y recolección, manipulación y transporte sin ensuciar las manos y las superficies del coche.

### Ventajas :

Adecuado para soportar mucho mas peso que los perfiles de aluminio. Soldable, galvanizable y pintable. Cortable con sierra de hierro manual. Reciclabile en los metales.

PIATTO a caldo / hot

**Acciaio trafilato :**  
Ha le medesime caratteristiche generali dell’ acciaio naturale, ma la sezione ha una precisione decimale e una superficie liscia.

**Vantaggi:**  
Adatto per inserti di precisione.  
Riciclabile nei metalli.

**Drawn steel :**  
It has the same general characteristics as natural steel but the section has decimal precision and a smooth surface.

**Advantages :**  
Suitable for precision inserts.  
Recyclable.

**Acier tréfilé :**  
Caractérisé par les mêmes qualités que l’acier naturel, sa section offre une précision décimale et une surface lisse.

**Les avantages :**  
Apte pour insertion de précision.  
Métal 100% recyclable.

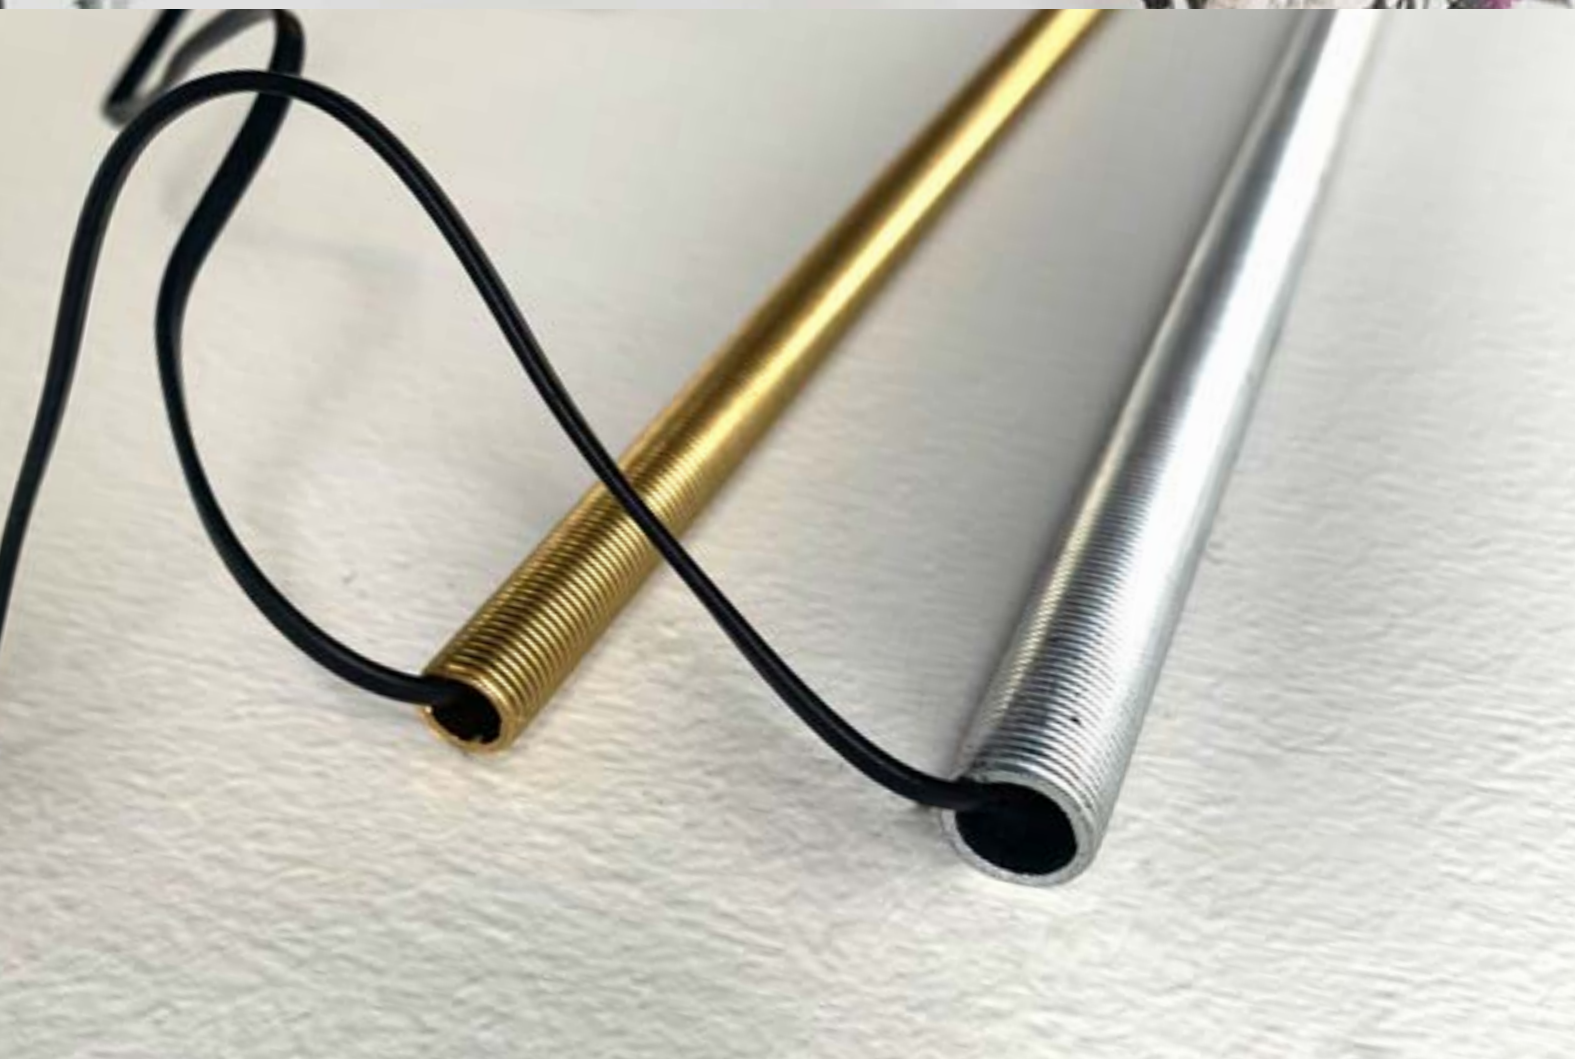

**Acero estirado :**  
Tiene las mismas características generales que el acero natural, pero la sección tiene una precisión decimal y una superficie lisa.

**Ventajas :**  
Apto para insertos de precisión.  
Reciclabile en los metales.

# Barre Filettate

## Threaded Rods/ Tiges Filetées /Varillas Roscadas

### Barre Filettate :

Piene o cave per uso industriale e/o hobbistico sono fornite nei seguenti materiali: acciaio zincato, acciaio inox, acciaio naturale, ottone.  
Le aste filettate cave sono adatte al passaggio di cavi e fili elettrici (es: lampadari).  
Magnificamente presentate in pratici espositori e contrassegnati singolarmente con descrizione e codice EAN per una facile identificazione.  
Tranne quelle in acciaio naturale tutte le altre sono altamente inossidabili. Riciclabile nei metalli.

### Threaded Rods :

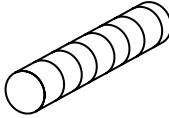

Solid or hollow for industrial and / or hobby usage, they are available in the following materials: galvanized steel, stainless steel, natural steel, brass.  
The hollow threaded rods are suitable for the passage of cables and electric wires (e.g. chandeliers).  
Magnificently presented in practical displays and individually marked with description and EAN code for easy identification.  
Except those in natural steel, all the others are highly resistant to the rust. Recyclable.

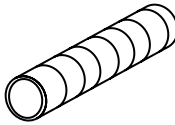

### Tiges filetées :

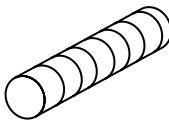

Disponibles en acier zingué, acier inox, acier naturel et laiton, les tiges filetées pleines ou creuses sont aptes aux professionnels et aux amateurs.  
En particulier, les tiges caves sont idéales pour faire passer les câbles et les fils électriques (par exemple les lustres).  
Elles sont exposées dans des présentoirs pratiques, chacune a sa description et code EAN pour une identification facile .  
Elles sont aussi inoxydables sauf celles en acier naturel.  
Métal 100% recyclable.

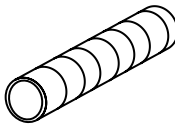

### Varillas Roscadas :

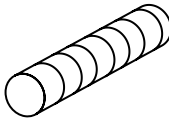

Llenas o huecas para uso industrial y/o bricolaje se suministran en los siguientes materiales: acero cincado, acero inoxidable, acero natural, latón. Las varillas roscadas huecas son adecuadas para el pasaje de cables y alambres eléctricos (por ejemplo, lámparas de araña).  
Magnificamente presentadas en prácticos expositores y marcadas individualmente con la descripción y el código EAN para una fácil identificación.  
Excepto las de acero natural, todas las demás son altamente inoxidables. Reciclabile en los metales.

# Profili in PVC Satinato

## Satin PVC Profiles/ Profilés en PVC Satiné/Perfiles de PVC Satinado

### Profili in PVC Satinato :

I profili in PVC Arcansas sono colorati in massa. Non cambiano colore se graffiati. Rappresentano la soluzione ideale per DIYers grazie alla versatilità e alla facilità di utilizzo. Disponibile in colore bianco, nero, trasparente, grigio e imitazione legno. La versione trasparente consente l'abbinabilità con qualsiasi colore di fondo.

### Vantaggi :

Grande disponibilità di colori.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Prezzo competitivo.  
Riciclabile nella plastica.

### Satin PVC Profiles :

Arcansas PVC profiles are mass-coloured. They do not change colour if scratched. They represent the ideal solution for DIYers thanks to their versatility and ease of use. Available in different colours and finish: white, transparent, black, grey and wood-effect. The transparent profiles can be perfectly combined with any background colour.

### Advantages :

Wide range of colours.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance.  
Durability.  
Competitive price.  
Recyclable.

### Profilés en PVC Satiné :

Les profilés en PVC Arcansas sont laqués en masse et ne changent pas de couleur si se rayés. Ils représentent la solution idéale pour le bricolage grâce à l'utilisation facile et à la versatilité de ce produit. Couleurs disponibles : noir transparent, blanc, gris et effet bois. La version transparente garantit la combinaison des nuances entre le profilé et toute couleur de base.

### Les Avantages :

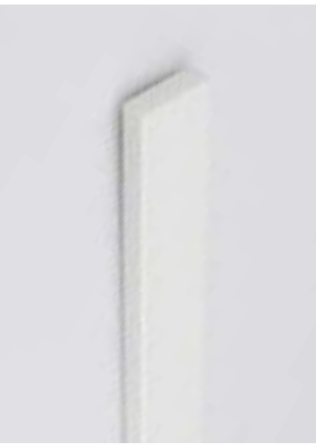

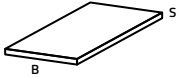

Grande disponibilité en couleur.  
Faciles à utiliser avec les ciseaux ou le cutter.  
Résistance mécanique et aux rayons UV.  
Produit durable, prix compétitif.  
Matériel 100% recyclable (plastique).

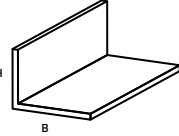

### Perfiles de PVC Satinado:

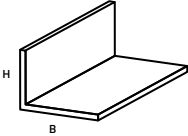

Los perfiles de PVC Arcansas tienen el color en masa. No cambian de color si se rayan. Representan la solución ideal para los aficionados al bricolaje gracias a su versatilidad y facilidad de uso. Disponible en blanco, negro transparente, gris e imitación madera. La versión transparente permite combinarlo con cualquier color de fondo.

### Ventajas :

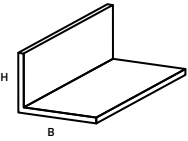

Gran disponibilidad de colores.  
Facilidad de uso: cortable con un cúter o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Precio competitivo.  
Reciclable en el plástico.

# Profili in PVC Extra Lucido

Super Shiny PVC profiles/ Profilés en PVC extra brillant/  
Perfiles en PVC extra brillante

**Profili in PVC extralucido in massa :**  
Speciale lavorazione che conferisce una superficie brillantissima come fosse alluminio verniciato a polveri epossidiche.  
Rappresentano la soluzione ideale per professionisti e DIYers grazie alla elevata qualità estetica e alla facilità di utilizzo. Disponibile in moltissimi colori oltre agli eleganti bianco, nero e trasparente. Quest'ultima consente l'abbinabilità con qualsiasi colore di fondo.

**Vantaggi :**  
Grande disponibilità di colori vivaci e decorativi.  
Facilità d'uso: tagliabile con taglierino o forbici.  
Buona resistenza meccanica e ai raggi UV.  
Durata nel tempo.  
Riciclabile nella plastica.

**Super shiny mass-coloured PVC profiles :**  
Special processing that gives a very shiny surface as if it were epoxy powder coated aluminum.  
They represent the ideal solution for professionals and DIYers thanks to their high aesthetic quality and ease of use. Available in many colours in addition to the elegant white, black and transparent. The latter allows it to be combined with any background colour.

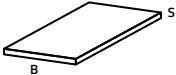

**Advantages :**  
Great availability of bright and decorative colors.  
Ease of use: can be cut with a cutter or scissors.  
Good mechanical and UV resistance.  
Duration in time.  
Recyclable.

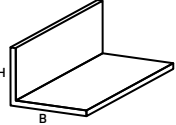

**Profilés en PVC extra brillant en vrac :**  
Traitement spécial qui donne une surface très brillante comme s'il s'agissait d'aluminium enduit de poudre époxy. Ils représentent la solution idéale pour les professionnels et les bricoleurs grâce à leur haute qualité esthétique et leur facilité d'utilisation.  
Disponible en plusieurs couleurs en plus des élégants blanc, noir et transparent. Ce dernier permet de le combiner avec n'importe quelle couleur de fond.

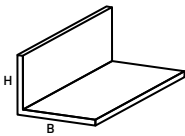

**Les avantages :**  
Grande disponibilité de couleurs vives et décoratives.  
Facilité d'utilisation: peut être coupé avec un cutter ou des ciseaux.  
Bonne résistance mécanique et aux UV.  
Durée dans le temps.  
Recyclable en plastique.

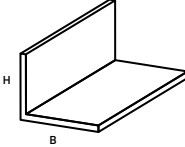

**Perfiles en PVC extra brillante en masa :**  
Procesamiento especial que proporciona una superficie muy brillante como si fuera aluminio pintado con polvo epoxi. Representan la solución ideal para profesionales y aficionados al bricolaje gracias a su alta calidad estética y facilidad de uso. Disponible en muchos colores además del elegante blanco, negro y transparente. Este último permite combinarlo con cualquier color de fondo.

**Ventajas :**  
Gran disponibilidad de colores brillantes y decorativos.  
Facilidad de uso: se puede cortar con un cúter o tijeras.  
Buena resistencia mecánica y a los rayos UV.  
Duración en el tiempo.  
Reciclabile en el plástico.

# Paraspigolo *Friendly*

Friendly Corner Profiles/ Protecteur D'angle Friendly/ Esquinero Friendly

## Paraspigolo Friendly :

Realizzato per estrusione in PVC espanso per conferire flessibilità e minor rigidità a vantaggio della protezione. L'angolare Friendly viene successivamente ricoperto mediante pellicole antigraffio che derivano direttamente dalle tecnologie di rivestimento utilizzate nell'industria dell'arredamento. Sono caratterizzate pertanto da elevato effetto cromatico decorativo e altissima resistenza all'acqua, umidità, abrasione. Nella versione autoadesiva, il montaggio è ancora più semplice, rapido e sicuro.

## Vantaggi :

Antigraffio.  
Resistente all'acqua.  
Nella versione autoadesiva è applicabile sulle pareti verniciate di qualsiasi tipo.  
Riciclabile nella plastica.

## Friendly Corner Profiles :

Made by extrusion in expanded PVC to give flexibility and less rigidity for the benefit of protection. The "Friendly" series corner is then covered with anti-scratch films that derive directly from the coating technologies used in the furniture industry. A high decorative colour effect and very high resistance to water, humidity and abrasion are therefore the specific characteristic of this product. In the self-adhesive version, assembly is even simpler, faster and safer.

## Advantages :

Scratchproof.  
Waterproof.  
In the self-adhesive version, it is applicable on painted walls of any type.  
Recyclable.

## Protecteur d'angle Friendly :

Fabriqu  par extrusion dans du PVC expans  pour donner flexibilit  et moins de rigidit  au profit de la protection. La corni re d'angle « Friendly » est ensuite recouverte d'un film anti-rayures issu directement des technologies de rev tement utilis es dans l'industrie du meuble. Ils se caract risent donc par un effet de couleur d coratif  lev  et une tr s haute r sistance   l'eau,   l'humidit  et   l'abrasion. Dans la version autocollante, le montage est encore plus simple, plus rapide et plus s r.

## Les avantages :

R sistant aux rayures.  
 tanche.  
Dans la version autocollante, il est applicable sur les murs peints de tout type.  
Recyclable en plastique.

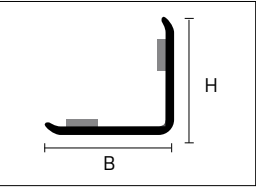

## Esquinero Friendly :

Hecho por extrusi n en PVC expandido para dar flexibilidad y menos rigidez en beneficio de la protecci n. El perfil Friendly sucesivamente se recubre con pel culas antiara azos que se derivan directamente de las tecnolog as de revestimiento utilizadas en la industria del mueble. Por lo tanto, se caracterizan por un alto efecto decorativo de color y una resistencia muy alta al agua, la humedad y la abrasi n. En la versi n autoadhesiva, la colocaci n es a n m s simple, r pida y segura.

## Ventajas :

Resistente a los ara azos  
Impermeable.  
En la versi n autoadhesiva es aplicable en paredes pintadas de cualquier tipo.  
Reciclabile en el plastico.

# Lamiere

## Metal Sheets/ Tôles/ Chapas

### Lamiere :

Lamiere in alluminio ed acciaio, con differenti finiture e lavorazioni superficiali. Inossidabili o verniciabili, facilmente lavorabili. Il prodotto ideale per infinite soluzioni per l'hobbista e il professionista.

Sono fornite in confezioni blister, a tutela del materiale e dell'utilizzatore.

### Vantaggi :

Facilmente piegabili o modellabili. Quelle in alluminio si tagliano con le forbici.

### Metal-sheets :

Aluminum and steel metal-sheets, with different finishes and surface processes. Stainless or paintable, easily workable. The ideal product for infinite solutions for the hobbyist and the professional.

They are supplied in blister packs, to protect the material and the user.

### Advantages :

Easily foldable or mouldable. The aluminum ones can be cut with scissors.

### Tôles :

Tôles d'aluminium et d'acier, avec différentes finitions et motifs en surface. Inoxydable, pouvant être verni, et facile à travailler. Le produit idéal pour de multiple solutions autant pour l'amateur que le professionnel. Ils sont fournis sous blister, pour protéger le matériel et l'utilisateur.

### Les avantages :

Facilement pliable ou modelable. Celles en aluminium se coupent aux ciseaux.

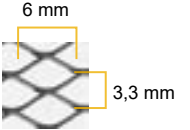

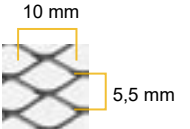

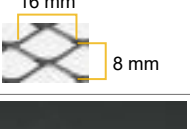

### Chapas :

Chapas de aluminio y acero, con diferentes acabados y procesos superficiales. Inoxidable o pintable, fácilmente mecanizable. El producto ideal para soluciones infinitas para el aficionado del bricolaje y para el profesional. Se suministran en blisters, para proteger el material y el usuario.

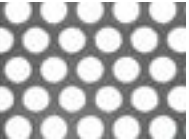

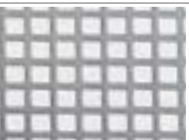

### Ventajas :

Fácilmente plegable o moldeable. Las chapas de aluminio se cortan con las tijeras.

# Quicktech

## Connections/Connexions/Conexiones

### Quicktech :

Sistema di giunzione per profili in acciaio e alluminio a pressione. Realizzate in resina pregiata "ABS". Robustissime. La gamma è resistente agli agenti atmosferici, raggi UVA, al sole, alle temperature estive o invernali, agli urti. Consente la costruzione di una struttura in modo veloce, rapido, pulito ed economico.

### Vantaggi :

Permette la giunzione rapida dei profili. Non servono colla o viti.

### Quicktech :

Joining system for steel and aluminum pressure profiles. Made of precious "ABS" resin. Resilient. The range is resistant to atmospheric agents, UVA rays, sun, summer or winter temperatures, shocks. It allows the construction of a structure quickly, quickly, cleanly and economically.

### Advantages :

It allows the rapid joining of profiles. No glue or screws needed.

### Quicktech :

Système de joints pour profilés de pression en acier et aluminium. Fabriqué en résine précieuse "ABS". Extrêmement solide. La gamme est résistante aux agents atmosphériques, aux rayons UV, au soleil, aux températures estivales ou hivernales, aux chocs. Il permet la construction d'une structure rapidement, proprement et à un prix modique.

### Les avantages :

Il permet la jonction rapide des profilés. Aucune colle ni visse sont nécessaires.

### Quicktech :

Sistema de unión para perfiles de acero y aluminio a presión. Realizados en resina fina "ABS". Muy resistente. La gama es resistente a agentes atmosféricos, rayos UVA, sol, temperaturas de verano o invierno, golpes. Permite la construcción de una estructura de forma rápida, veloz, limpia y económica.

### Ventajas :

Permite la unión rápida de perfiles. No se necesita pegamento ni tornillos.

CONDIZIONI COMMERCIALI

Ordini, pagamenti e consegne:

1. Se non diversamente indicato, tutte le quantità sugli ordini vengono arrotondate alla quantità per convenzione del presente listino, altrimenti sarà applicato un incremento del prezzo di listino pari al 10%. La maggiorazione sarà del 20% nel caso in cui le quantità richieste siano inferiori a 10 pezzi. (Esempio di arrotondamento: da 11 a 14 arrotondamento a 10, da 15 a 19 arrotondamento a 20)
2. Pagamenti: prima fornitura, contrassegno.
3. Non saranno evase forniture con importi inferiori a €100,00 netto sconti.
4. Tutti gli ordini ricevuti entro le ore 11.00 verranno evasi entro le 24 ore.
5. Per consegne su appuntamento verificare con ufficio ordini fattibilità e sovrapprezzo.
6. Per spese di trasporto consultare l'ufficio commerciale di riferimento.

Spese varie:

1. Porto Franco per importi fattura superiori a € 250,00.
  2. Per importi Fattura inferiori a € 250,00 verranno addebitati € 15,00 per spese amministrative.
- Rischi nel trasporto: La merce viaggia a rischio e pericolo dell'acquirente, anche se in porto Franco.

CONDIZIONI GENERALI

Disegni e documenti descrittivi:  
Tutte le Fotografie, i disegni e i dati tecnici dei prodotti a catalogo hanno carattere informativo ed esemplificativo, quindi non impegnativo.

Modifiche:

Arcansas Profili s.r.l si riserva il diritto di apportare modifiche ai propri prodotti, imballi e quant'altro senza obbligo di preavviso.

Reclami:

I reclami per vizi o difetti apparenti (es. mancanza o danneggiamento) vanno presentati al corriere direttamente all'atto del ricevimento della merce e tempestivamente anche ad Arcansas Profili s.r.l, a mezzo riserva scritta sulla bolla di consegna specificando il tipo di anomalia, pena la decadenza di qualunque diritto di garanzia e del diritto di risarcimento. I reclami per vizi o difetti non individuabili con un diligente controllo al momento del ricevimento della merce (vizi o difetti occulti), dovranno essere notificati, a pena di decadenza, ad Arcansas Profili s.r.l mediante lettera raccomandata A.R. entro sette giorni dalla scoperta del vizio o difetto e comunque non oltre 12 mesi dalla consegna. Eventuali reclami non daranno diritto all'acquirente di sospendere o ritardare i pagamenti dovuti ad Arcansas Profili s.r.l.

Garanzia e vizi:

Arcansas Profili s.r.l si impegna a sostituire i prodotti che presentino vizi, mancanza di qualità o difetti di conformità ad essa imputabili, verificatisi entro dodici mesi dalla consegna dei prodotti, purché gli stessi siano stati presentati tempestivamente nelle modalità precedentemente riportate. Arcansas Profili s.r.l. non garantisce la rispondenza dei prodotti a particolari specifiche o caratteristiche tecniche o la loro idoneità ad usi e/o utilizzi particolari, se non nella misura in cui tali caratteristiche siano state espressamente convenute nel contratto. In caso di vizi apparenti e/o occulti riconosciuti da Arcansas Profili s.r.l., l'acquirente ha diritto esclusivamente alla sostituzione del prodotto, che verrà accettato in reso solo in confezioni originali, integre e complete. Nessun prodotto potrà essere sostituito senza una preliminare autorizzazione scritta di Arcansas Profili s.r.l. La presente garanzia è sostitutiva delle garanzie e responsabilità previste per legge ed esclude ogni altra responsabilità di Arcansas Profili s.r.l comunque originata dai prodotti venduti, salvo il caso di dolo e colpa grave.

Riserva di proprietà:

I prodotti rimangono di proprietà di Arcansas Profili s.r.l sino al loro completo pagamento da parte dell'acquirente. Il mancato pagamento, anche parziale, dà diritto ad Arcansas Profili s.r.l di recuperare la merce oggetto di fornitura, anche se in deposito presso terzi.

Proprietà industriale e intellettuale:

Segni distintivi, fotografie di prodotti e/o tecnologie produttive e commerciali di Arcansas Profili s.r.l, non dovranno essere utilizzati o divulgati senza la previa autorizzazione scritta di Arcansas Profili s.r.l.

Privacy:

I dati personali anagrafici e fiscali acquisiti direttamente e/o tramite terzi da Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), titolare del trattamento, vengono utilizzati per esigenze contrattuali e di legge, nonché per consentire un'efficace gestione dei rapporti commerciali. Tali dati potranno essere comunicati in Italia e/o all'estero alla rete di agenti Arcansas Profili s.r.l, società di factoring, istituti di credito, società di recupero crediti, società di assicurazione del credito, società di informazioni commerciali, professionisti e consulenti, trasportatori.

Foro competente:

Per eventuali controversie derivanti dalle condizioni commerciali e/o dagli ordini ad essa connessi, sarà esclusivamente competente il tribunale di Pesaro.

BUSINESS TERMS

Orders, payments, and deliveries:

- 1. Unless otherwise indicated, all quantities on orders are rounded to the quantity per agreement of this price list: otherwise, a 10% increase in the list price will be applied.  
The increase will be 20% if the required quantities are less than 10 items. (Example of rounding: from 11 to 14 rounding to 10, from 15 to 19 rounding to 20)
- 2. Payments: first delivery, cash on delivery.
- 3. Supplies with amounts less than €100.00 net of discounts will not be processed.
- 4. All orders received before 11:00 am will be processed within 24 hours.
- 5. For deliveries by appointment, check with the order feasibility and surcharge office.
- 6. For transport costs, consult the sales department of reference.

Other expenses:

- 1. FOB designated port for invoice amounts over €250.00.
  - 2. For Invoice amounts lower than €250.00, €15.00 will be charged for administrative expenses.
- Transportation risks: The goods travel at the buyer's risk, even if in an FOB designated port.

GENERAL CONDITIONS

Designs and descriptive documents:  
All the Photographs, designs, and technical data of the products in the catalogue are informative and illustrative, and so therefore not binding.

Modifications:

Arcansas Profili s.r.l reserves the right to make changes to its own products, packaging, and anything else without notice.

Complaints:

Claims for apparent defects (e.g. missing parts or damage) must be presented to the courier directly upon receipt of the goods and also promptly to Arcansas Profili s.r.l, by means of a written reservation on the delivery note specifying the type of anomaly, under penalty of forfeiture of any warranty claims and compensation claims.  
Claims for defects that cannot be identified with a thorough check upon receipt of the goods (hidden defects) must be notified, under penalty of forfeiture, to Arcansas Profili s.r.l by registered letter with return receipt within seven days from the discovery of the defect and no later than 12 months from delivery.  
Any complaints will not entitle the purchaser to suspend or delay payments due to Arcansas Profili s.r.l.

Warranty and defects:

Arcansas Profili s.r.l undertakes to replace products that present defects, lack of quality or lack of conformity attributable to it, which occurred within twelve months of delivery of the products, provided they have been promptly presented in the manner previously reported. Arcansas Profili s.r.l does not guarantee the compliance of the products with particular specifications or technical characteristics or their suitability for particular uses, except to the extent that these characteristics have been expressly agreed in the contract.  
In the event of apparent and/or hidden defects recognised by Arcansas Profili s.r.l, the purchaser is only entitled to the replacement of the product, which will be accepted as a return only in original, intact, and complete packaging.  
No product may be replaced without prior written authorisation from Arcansas Profili s.r.l.  
This warranty replaces the warranties and responsibilities provided for by law and excludes any other liability of Arcansas Profili s.r.l originating from the products sold, except in cases of willful misconduct and gross negligence.

Retention of title:

The products remain the property of Arcansas Profili s.r.l until their full payment by the purchaser.  
Failure to pay, even partial, entitles Arcansas Profili s.r.l to recover the delivered goods, even if they are on deposit with third parties.

Industrial and intellectual property:

Distinctive signs, photographs of Arcansas Profili s.r.l products and/or production and business technologies must not be used or disclosed without the prior written permission of Arcansas Profili s.r.l.

Privacy:

The personal and tax data acquired directly and/or through third parties from Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), the data controller, are used for contractual and legal requirements, as well as to allow effective management of business relationships.  
Such data may be communicated in Italy and/or abroad to the network of Arcansas Profili s.r.l agents, factoring companies, credit institutions, debt collection companies, credit insurance companies, business information companies, professionals and consultants, transporters.

Jurisdiction:

For any disputes arising from the business conditions and/or from the orders connected to it, the Pesaro court will have exclusive jurisdiction.

CONDITIONS COMMERCIALES

Commandes, paiements et délais de livraison :

- 1. Sauf indication contraire, toutes les quantités en commande sont arrondies à la quantité par convention de cette liste de prix, sinon une majoration du prix de liste de 10 % sera appliquée.  
L'augmentation sera de 20 % si les quantités requises sont inférieures à 10 pièces. (Exemple d'arrondi : de 11 à 14 arrondis à 10, de 15 à 19 arrondis à 20)
- 2. Paiements : première livraison, contre remboursement.
- 3. Les livraisons d'un montant inférieur à 100,00 € net de remises ne seront pas traitées.
- 4. Toutes les commandes reçues avant 11h00 seront traitées dans les 24 heures.
- 5. Pour les livraisons sur rendez-vous, vérifiez auprès du bureau de commande de faisabilité et en supplément.
- 6. Pour les frais de port, consultez le bureau commercial de référence.

Frais divers :

- 1. Frais de ports offerts pour les montants de facture supérieurs à 250,00 €.
  - 2. Pour les montants de facture inférieurs à 250,00 €, 15,00 € de frais administratifs seront facturés.
- Risques liés au transport : les marchandises circulent aux risques et périls de l'acheteur, même si les frais de port sont offerts.

CONDITIONS GÉNÉRALES

Dessins et documents descriptifs :  
Toutes les photographies, dessins et données techniques des produits du catalogue sont à titre informatif et illustratif, donc non contraignants.

Modifications :

Arcansas Profili s.r.l se réserve le droit d'apporter des modifications à ses propres produits, emballages et toute autre chose sans préavis.

Réclamations :

Les réclamations pour vices ou défauts apparents (par exemple, manque ou dommage) doivent être présentées au transporteur directement à la réception de la marchandise et également dans les meilleurs délais à Arcansas Profili s.r.l, au moyen d'une réserve écrite sur le bon de livraison précisant le type d'anomalie, sous peine de déchéance de tout droit de garantie et de réparation.  
Les réclamations pour vices ou défauts qui ne peuvent être identifiés avec un contrôle diligent à la réception de la marchandise (vices ou défauts cachés) doivent être notifiées, sous peine de déchéance, à Arcansas Profili s.r.l par lettre recommandée avec accusé de réception dans les sept jours à compter de la découverte du vice ou du défaut, cependant, au plus tard 12 mois après la livraison.  
Toute réclamation ne donnera pas le droit à l'acheteur de suspendre ou de retarder les paiements dus à Arcansas Profili s.r.l.

Garantie et défauts :

Arcansas Profili s.r.l s'engage à remplacer les produits présentant des dommages, des défauts de qualité ou des défauts de conformité qui lui sont imputables, survenus dans les douze mois suivant la livraison des produits, à condition qu'ils aient été présentés dans les meilleurs délais de la manière précédemment signalée.  
Arcansas Profili s.r.l ne garantit pas la conformité des produits à des spécifications ou caractéristiques techniques particulières ou leur adéquation à des usages et/ou usages particuliers, sauf dans la mesure où ces caractéristiques ont été expressément convenues dans le contrat.  
Si des défauts apparents et/ou cachés sont décelés par Arcansas Profili s.r.l, l'acheteur n'a droit qu'au remplacement du produit, qui ne sera accepté en retour que dans son emballage d'origine, intact et complet.  
Aucun produit ne peut être remplacé sans l'autorisation écrite préalable d'Arcansas Profili s.r.l.  
Cette garantie remplace les garanties et responsabilités prévues par la loi et exclut toute autre responsabilité d'Arcansas Profili s.r.l provenant des produits vendus, sauf en cas de faute intentionnelle et de négligence grave.

Réserve de propriété :

Les produits restent la propriété d'Arcansas Profili s.r.l jusqu'à leur paiement intégral par l'acheteur.  
Le défaut de paiement, même partiel, autorise Arcansas Profili s.r.l à récupérer les marchandises livrées, même si elles sont en dépôt auprès de tiers.

Propriété industrielle et intellectuelle :

Les signes distinctifs, photographies des produits Arcansas Profili s.r.l et/ou technologies de production et commerciales ne doivent pas être utilisés ou divulgués sans l'autorisation écrite préalable d'Arcansas Profili s.r.l.

Confidentialité :

Les données personnelles et fiscales personnelles acquises directement et/ou par l'intermédiaire de tiers auprès d'Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), responsable du traitement, sont utilisées pour les exigences contractuelles et légales, ainsi que pour permettre une gestion efficace des relations commerciales.  
Ces données peuvent être communiquées en Italie et/ou à l'étranger au réseau d'agents Arcansas Profili s.r.l, aux sociétés d'affacturage, aux établissements de crédit, aux sociétés de recouvrement de créances, aux sociétés d'assurance-crédit, aux sociétés d'informations commerciales, aux professionnels et consultants, ainsi qu'aux transporteurs.

Tribunal compétent :

Pour tout litige découlant des conditions commerciales et/ou des commandes qui y sont liées, le tribunal de Pesaro sera seul compétent.

## CONDICIONES COMERCIALES

### Pedidos, pagos y entregas:

1. A menos que se indique lo contrario, todas las cantidades de los pedidos se redondean a la cantidad por convención en esta lista de precios. De lo contrario se aplicará un aumento del 10 % sobre el precio de lista. El aumento será del 20 % si las cantidades requeridas son inferiores a 10 piezas. (Ejemplo de redondeo: de 11 a 14 redondeo a 10, de 15 a 19 redondeo a 20)
2. Pagos: primera entrega, contrarreembolso.
3. No se procesarán los suministros con cantidades inferiores a 100 € netos de descuentos.
4. Todos los pedidos recibidos antes de las 11:00 se procesarán en un plazo de 24 horas.
5. Para entregas con cita previa, consulte con la oficina de pedidos la viabilidad y los recargos.
6. Para los costes de transporte, consulte la oficina comercial de referencia.

### Gastos varios:

1. Puerto franco para facturas superiores a 250 €.
  2. Por los importes de las facturas inferiores a 250 euros se cobrarán 15 euros en concepto de gastos administrativos.
- Riesgos de transporte: la mercancía viaja por cuenta y riesgo del comprador, incluso en el caso de puerto franco.

## CONDICIONES GENERALES

### Diseños y documentos descriptivos:

Todas las fotografías, diseños y datos técnicos de los productos del catálogo son informativos e ilustrativos, por lo que no son vinculantes.

### Modificaciones:

Arcansas Profili s.r.l se reserva el derecho de hacer cambios a sus propios productos, embalajes y cualquier otro elemento sin previo aviso.

### Reclamaciones:

Las reclamaciones por defectos o vicios aparentes (por ejemplo, falta o daños) deben presentarse al mensajero directamente al recibir la mercancía y sin demora a Arcansas Profili s.r.l mediante notificación escrita en el albarán de entrega especificando el tipo de anomalía, a cambio de la pérdida de todo derecho de garantía y de compensación.

Las quejas por defectos o vicios no detectables con un control diligente al recibir la mercancía (defectos o vicios ocultos), deben notificarse, so pena de caducidad, a Arcansas Profili s.r.l por carta certificada con acuse de recibo en un plazo de siete días a partir del descubrimiento del defecto o vicio y, en cualquier caso, en un plazo máximo de 12 meses a partir de la entrega.

Cualquier queja no dará derecho al comprador a suspender o retrasar los pagos debidos a Arcansas Profili s.r.l.

### Garantía y defectos:

Arcansas Profili s.r.l se compromete a sustituir los productos que presenten defectos, falta de calidad o falta de conformidad que le sean imputables, que se hayan producido dentro de los doce meses siguientes a la entrega de los productos, siempre y cuando se hayan presentado sin demora en la forma anteriormente comunicada.

Arcansas Profili s.r.l no garantiza la conformidad de los productos con especificaciones o características técnicas particulares o su idoneidad para usos y/o usos particulares, salvo en la medida en que dichas características hayan sido expresamente acordadas en el contrato. En caso de defectos aparentes y/u ocultos reconocidos por Arcansas Profili s.r.l, el comprador tiene el derecho exclusivo a la sustitución del producto, que se aceptará a cambio únicamente en el embalaje original, intacto y completo.

Ningún producto se podrá reemplazar sin una autorización previa por escrito de Arcansas Profili s.r.l.

Esta garantía sustituye a las garantías y responsabilidades previstas por la ley y excluye cualquier otra responsabilidad de Arcansas Profili s.r.l en cualquier caso que se derive de los productos vendidos, excepto en caso de intención y negligencia grave.

### Reserva de propiedad:

Los productos son propiedad de Arcansas Profili s.r.l hasta que el comprador los pague en su totalidad.

El impago, aunque sea parcial, da a Arcansas Profili s.r.l el derecho de recuperar los bienes suministrados, aunque estén almacenados con terceros.

### Propiedad industrial e intelectual:

Los signos distintivos, las fotografías de los productos de Arcansas Profili s.r.l y/o las tecnologías de producción y comerciales no se utilizarán o revelarán sin el permiso previo por escrito de Arcansas Profili s.r.l.

### Privacidad:

Los datos personales y fiscales adquiridos directamente y/o a través de terceros por Arcansas Profili s.r.l (Località Cerbara, 61030 Terre Roveresche PU), el controlador de datos, se utilizan para los requisitos contractuales y legales, así como para permitir una gestión eficaz de las relaciones comerciales.

Dichos datos se podrán comunicar en Italia y/o en el extranjero a la red de agentes de Arcansas Profili s.r.l, empresas de factoring, instituciones de crédito, empresas de cobro de deudas, compañías de seguros de crédito, empresas de información comercial, profesionales y consultores, transportistas.

### Jurisdicción competente:

Para cualquier controversia que surja en relación con las condiciones comerciales y/o las órdenes conexas, el tribunal de Pesaro tendrá jurisdicción exclusiva.
